Iran to back \$20 a barrel for crude at OPEC meeting

On the eve of the OPEC ministerial conference in Geneva, Iran has indicated it will be supporting a substantial rise in the basic export price of crude to more than \$20 a barrel, more than 36 per cent above the rate prevailing since barrels a day, equal to about April 1.

barrels a day, equal to about 85 per cent of UK domestic oil consumption. Nevertheless, the

eccount the three rounds of surcharges Iran has applied since April, which have taken its present price for Arabian light crude to \$18.47.

The Iranian demand is in line with the general OPEC consensus — with only Saudi Arabian at present dissenting— that surcharges imposed by member states since the beginning of April should be consoli-dated and increased in a basic, unified price of \$20 per barrel at least

Mr. Hassan Nazih, the Chairman of the National Iranian Oil Company (NIOC) was reported in the Persian language daily Ayandegan yesterday as saving "most" other OPEC members favoured the \$20 figure, though he quoted Sheikh Zaki Yamani, the Saudi Oil Minister, as believing \$18 to be a reasonable

Iran has made clear it sup-ports a consolidation of the surcharges imposed by different OPFC members into a new uniordinating its position with that

countries to follow."

UK sector of the North Sea reached a new peak last month with output averaging 1.6m A GROUP of about 40 major British companies has launched a last-minute campaign to have the Double long-delayed UK-U.S. Treaty Taxation amended, to prevent the use of the controversial unitary tax present shortfall of world crude supplies means that the UK is running almost 100,000 barrels system in the U.S.

The group, which includes BAT Industries, EMI, Regitt and Colman, Bowater and Glaxo, is meeting at the House of Commons tomorrow. A motion tabled in the House by a day short of its needs, The main reason for the latest production increase is the rapid rise in output from the Ninian Field, the UK's third largest sector, where production six Conservative backbenchers supporting the British com-panies' stance has already been in May, at an average of 181,000 barrels a day, was almost double the April figure. signed by nearly 100 MPs.

According to the latest North Sea report by Wood Mackenzie, the stockbrokers, UK crude oil output reached 1.63m barrels a apparently the main outcome of day in May, compared with talks in London last week 1.47m barrels a day in April. between a NIOC delegation The previous peak for North The previous peak for North Sea production was in February. when output averaged slightly

OIL PRODUCTION from the

more than 1.5m barrels a day. The UK is expected to reach net self-sufficiency in crude oil production in the second half of next year. More than 45 per cent of North Sea output is being exported, however, with the balance of UK needs met by imports of less expensive, heavier foreign crudes, mainly from the Middle East.

In the second half of the year, however, more North Sea oil might remain in the UK as the British National Oil Corporation renegotiates some existing contracts with overseas buyers to direct more crude sales to the home market.

Exploration

Apart from the growing con-tribution from the Ninian Field, the Occidental Group's Piper Field also showed a big increase in production last month, with output rising to an average of 307,000 barrels a day, compared with 296,000 a day in April.
Production from the Forties
Field averaged 484,000 barrels
a day, and from the Brent Field, rent Field. turned into an issue of state 216,000 a day. According to Wood Mac-

kenzle, the recent steep rises in North Sea oil prices have terms to the level of world crude oil prices prevailing in North Sea prices may be expected to rise again next month after new world

Syria hunts for 12 men after Aleppo massacre

BY ROGER MATTHEWS IN CAIRO

believed to have died. Two of Syria, has mounted. the wanted men are pictured in

The death toll, originally given as 32, is understood to have risen as more cadets died from injuries received in the shooting at the artillery school in Aleppo nine days ago.

In official statements the authorities have blamed the extreme right-wing religious faction, the Moslem Brotherhood, which in contacts with journalists in Beirut over the weekend claimed that it was going to step up its violent cam-paign against the Damascus

brotherhood held a secret con-gress in West Germany recently during which a programme of action was mapped out.

The murder of the cadets is

said to have been masterminded by a Captain Ibrahim Youssef after he had been "bribed" by the brotherhood. Unconfirmed reports in Damascus say that the cadets were summoned to a meeting by Captain Youssef who told all Sunni Moslems to leave the hall. The remaining cadets were then cut down with machine-gun fire and grenades. Those remaining are said to have been almost all Alawites, a minority group which repre-sents about 13 per cent of the population and to which Presi-

THE SYRIAN authorities have senior Government and military leadership of a united Baath which more than 50 cadets are who are the majority group in party.

> avoid the possibility of spreading inter-denominational strife. The tragic example of Lebanon where Syria maintains a peace-keeping force of 26,000 is all too apparent to the Syrian leadership.

The President has been hold-ing talks over the weekend with Colonel Moammer Gaddafy, the Libyan leader. The discussions are understood to have centred on further united Arab action against President Anwar Sadat

regime.

Mr. Assad is due to visit

It is said in Beirut that the Moscow later this week for
brotherhood held a secret contalks that are expected to cover the general Middle East situa-tion, as well as his request for extra shipments of Soviet arms, which has been a source of contention between the two

It is not yet clear whether Syria's sudden pre-occupation with domestic issues and Iraq's worsening conflict with the new reginte in Iran will prove, a serious distraction from their

efforts at rapproachement.

Ihsan Hyazi reports from
Beirut: It is widely believed
in the Lebanese capital that the Moslem Brotherhood committed the Aleppo massacre in an attempt to touch off an uprising population and to which Presi- which would halt the proposed has swept the region following dent Hafez Assad and other Syrian Iraqi union under the the Iranian revolution.

Setback for **Pakistan** nuclear project

Pakistan's continuing efforts to acquire a nuclear fuel re-processing plant have received serious setback with the withdrawal of the last of the French technicians advising on its con-struction at Chashma, south west of Islamabad, Chris Sherwell reports from Islamabad.

Although the move was fore-shadowed last year, after U.S. intervention appeared to have won an end to the project, con-struction has since gone ahead rapidly. With the departure of two French engineers last week. co-operation is effectively at an end and the plant is now likely to be subjected to delays.

China refugee move

About 16,000 Chinese troops are now reported to be stationed on the Hong Kong border to stop illegal immigrants from crossing into the colony. Reuter writes from Hong Kong. Mean-while Malaysia has relented somewhat in its tough policy towards Indochina refugees by deciding to admit to official UN camps about 2,500 of the Viet-namese stranded on its beaches. AP adds from Geneva that Mr. Poul Hartling, the UN High Commissioner for refugees has urged Malaysia to immediately stop preventing Vietnamese refugees from coming ashore while in Hong Kong the first British troops to help the colony stem the flow of illegal Chinese immigrants arrived yesterday.

Vietnam assures Thais

Vietnam gave assurances at the weekend that it would not en-croach on Thai territory, Reuter reports from Bangkok. In Anchorage, Alaska, President Carter said Soviet leader Leonid Brezhnev has assured him that the Soviet Union would not establish military bases in southern Vietnam.

Sadat offer to Shah

President Anwar Sadat of Egypt has asked Parliament to pass a resolution allowing the exiled Shah of Iran and his family to take refuge in Egypt, Reuter reports from Cairo. The Shah, who was Mr. Sadat's guest after he left Iran in January is now in

New Soviet 'Concorde'

INTERIM DIVIDEND

The Directors have declared an . Interim Dividend of 0.88p per share. Last year's comparative figure was 0.785p. It is proposed to pay the declared dividend on 21 August 1979 to holders of Ordinary Shares in the Company whose names appear on the Company's register at the close of business on 13 July 1979.

COMMENT

Profit before tax for the first half of the year shows a satisfactory increase over the corresponding period of last year. However, in the light of recent unsettling events such as the world energy crisis, increasing interest rates, worsening industrial relations and the continued absence of agreement on the "National Understanding", severe disruption of communications and consequent damage to the tourist trade, it is not expected that the final results will reflect the same rate of growth as in the first half.

Curb on staff intake plans since election

BY JOHN LLOYD

MANY BIG employers have levels, scrapped plans to take on more staff since the general election, according to a survey published

Manpower, the work-contracting company, reports that one of every two employers who forecast a staff increase before the election now expects "no change" in employment levels. A survey by Manpower in late April showed that nearly 35 per cent of the 1,226 large UK companies surveyed forecast an increase in staff in the three months to the end of September, well above the proportion forecasting increases in the previous two years, about

In a survey 10 days after the election the company found that nearly half those forecastchange" to 77 per cent, well pared with just over half the above the previous two years' manufacturing companies.

26 per cent in each

Manpower says that the more pessimistic view is due to the announcement of curbs in pub-lic spending and local government recruitment, which are expected to affect many com-

panies order books.
"Others forecast a drop in consumer demand in the long term, following anticipated in-creases in direct taxation. Major pay settlements, renewed fears about inflation and the growing oil crisis have also curbed recruitment plans."

The survey shows that many companies believe that industrial production should streng-then in the next three months, following increased demand over the past 12 months.

The service sector is found more generally buoyant than the ing staff rises said "No change," industrial one. Over two-thirds bringing the proportion of service companies surveyed employers forecasting "No expected increased output, com-

Economic planners urge clearer accounting

By Michael Lafferty

THE NATIONAL Economic the system for setting company accounting standards.

The system, the office says in its evidence to the Accounting Standards Committee, "has tended to produce standards which are much, if not more, for the protection of the auditor, as for the improvement in the comparability and accurate disclosure of intelligible accounts." It adds: "We would wish to

see the present bias in favour of preparer and auditor, shifted towards the user of accountsinterpreted in the widest sense as including, for example, employees of the company."

On enforcing standards, the office is one of the few commentators to suggest that sanctions for non-compliance should include the power to recommend suspension of a com pany's share listing on the Stock Exchange.

Dirty work'

The Exchange has recently told the accounting bodies that it regards the question of accounting standards enforcement as irrelevant. London Stock Exchange officials are said to be particularly concerned that they are being asked to do the accountancy profession's "dirty work" by enforcing standards on listed companies.

However, the Exchange is considering a suggestion that a review panel be established with accounting and City institutions support to investigate departures from standards in listed companies' accounts. The office says that consistency

and the application of accounting principles should make possible valid comparison between the performance of different organisations. It considers that companies enough in common for a common accounting standard to be applied.

It wants binding and relevant standards to cover public and large private companies, and regards that as important for the proper sanctioning of financial and capital markets.

● The big London clearing banks have added their voice to suggestions that the Stock Exchange might take a more active role in enforcing accounting standards.

FINANCIAL RAND

Wilson Committee wants more scope for film-making

easier for international show business personalities when he presents the report of the Action Committee on the Film Industry

later this week.
Sir Harold's committee was set up by the Labour Government. and there is some question of how the present Cabinet will receive his recommendations. There are signs that the committee's report will be very much in favour of a self-supporting business with incentives and could therefore be smiled upon by the Government.

One particular aspect that has

captured the attention of the committee is the rules which prevent many expatriate British actors, pop stars and film executives from working in the UK on a temporary basis, while allowing foreigners, mostly Americans, to work in Britain and escape the Britain taxman. The committee is likely to urge the chancellor to take a

completely new took at taxation in a field where earnings can be very high for a very brief period. It will suggest that more and technicians wh films would be made in the UK quality productions.

SIR HAROLD WILSON will call if more of the profits or fees for substantial additional changes in tax rules to make life Another aspect of film-making Another aspect of film-making

which has interested the committee is the Eadie Fund, a scheme set up after the war which uses a levy on money paid to see all films to give bonus payments to British pictures. In recent years the money had

tended to go to X films and soft porn productions, the type of domestic film which sells well. Sir Harold is likely to recommend some sort of sifting which would award Eady money on merit rather than box-office growth.

This could prove a difficult problem, since any system apart from using box office receipts as a guide would mean setting up a select committee. There might be some pressure for the cash to go to the National Film Finance Corporation, which would substantially revive its

The broad basis of the Wilson Report recommendations will be place financially for the world film industry, and particularly to reward British investors, stars and technicians who work on

Companies facing tough time, say brokers

BY PETER RIDDELL ECONOMICS CORRESPONDENT

are about to face the toughest financial conditions since 1974 has come from the City stock-brokers L. Messel In its Weekly Gilt Monitor

the firm highlights the pressures on companies from virtually static export prices and from falling profits.

The rise in interest rates is

likely to aggravate this problem

because "the corporate sector has more interest-paying liabilities, principally bank loans, than interest-bearing assets."

Messel questions if the 12-month rate of retail price in flation can really be as high as 13½ to 17½ per cent "when the money supply is growing half as quickly and the pound seems,

for some reason, to irresistibly attractive foreigners.

A WARNING that companies possibly, but not for long and, even then, only by bankrupting British industry." In this context the apparent eagerness of Sir Geoffrey Howe, the Chancellor, to talk up the inflation rate is very unhelpful. The brokers Wood Mackenzie

say that after excluding impact of the value-added tax increase, the rate of inflation is likely to peak at about 14 per cent early next year. Inflation

charges dropped

BY SUE CAMERON

TAX OFFICIALS have abandoned plans to levy a 7 per cent value-added tax surcharge on holiday payments made before the Budget on Butlin's, one of the biggest

UK holiday operators, said yesterday that 300,000 of its customers would have been liable to pay the surcharge. The extra cost for a week's holiday for a family of four at a Butlin's centre would have worked out about £7.

Butlin's started discussions with Customs and Excise offi-

cials about the possible effects of a VAT rise before the Budget announcement that it was going up from 8 per cent to 15 per cent. At first, officials insisted that a 7 per cent VAT sur-charge would have to be

levied on all holiday payments made to Butlin's before June 18-including deposits. Butlin's more than many

holiday operators of its payments other system. All money paid to the company is treated as a retunable deposit until three weeks before the start of a holiday, when invoices are sent out for the balance of the cost.

Some customers, however, pay for their holidays in full long before they receive an invoice. That money would have been liable to a 7 per core surchase because it cent surcharge because it is treated as returnable.

Customers invoiced after June 18, however, must pay the 7 per cent VAT increase.

ndustrial Leasing:

r law

Why we were the top company last year.

Experience. We have been handling the total range of Leasing transactions including Industrial Leasing, computers and cars in the U.K. for well over a decade.

Talent. Our executives are drawn from banking, accountancy, legal and actuarial professions – professional people capable of understanding the financial aspects of a company's business and how they relate to leasing.

Strength. We are a member of the Midland Bank Group which means our financial standing and resources are of a magnitude that allows us to take on virtually any size of leasing arrangement.

Service. We endeavour to maximise your company's return on its financial commitment by carefully constructing leasing packages that take full advantage of your financial situation. We believe we are better at achieving this aim than any other leasing company. And that can not just be our belief, because, last year, we wrote more Industrial Leasing than anyone else.

To learn more about our approach to leasing and how it could help your company, please contact us.

State scientists asked to strike

BY CHRISTIAN TYLER, LABOUR EDITOR

CIVIL SERVICE scientists and technicians are being called out on strike from to-day as selected Government establishments in

support of better pay offers.
The action follows last
Friday's one-day token strike
by the Institution of Professional Civil Servants. Disruption to airline flights on that day will not be repeated, however, since the union has no plans to ask its air traffic con-trol members to strike again in

First targets for indefinite strike action include the Royal Ordnance factories at Bishopton. near Glasgow, at Chorley, Lancs, and at Radway Green, near Crewe. Production of chemical explosives and bullet and shell cases for the armed forces may

be interrupted. IPCS members at the RAF maintenance unit at Kemble and the Royal Navy Hydrographic Department at Taunton—which makes maps for the Navy-have also been called out.

Elsewhere, work is being slowed down by the union's "withdrawal of goodwill." Places affected include the four naval dockyards in Britain and one in Gibraltar, and the RAF experimental establishments at Farnbornigh and Bedford, the union said yesterday. Forersic scientists employed

by the Home Office are working to rule, which may delay analysis of breathalyser and blood tests on motorists.

The union said today's action not seriously affect

official price indicators.

be published.

GROCERY PRICES continued to ris sharply during June according to the latest Financial FINANCIAL TIMES SHOPPING BASKET Times shopping basket.
The FT Grocery Price Index increased by 2.1 per cent to reach 118.02, its highest level. Dairy produce Sugar, tea, coffee, soft drinks Bread, flour and cereals since the basket was re-launched Preserves and dry groceries Sauces and pickles in March last year. The rise in the basket-the second biggest increase this year-was mainly due to higher Meat, bacon, etc. (fresh) Fruit and vegetables Non-foods meat and dairy produce prices

of the year mainly because of the recent wet weather.

The FT shopping basket is based on data collected by 25 shoppers who monitor 100 grocers items each mouth in the Index for June: 116.02 1978: March 100; April 101.77; May 103.11; June 104.18; July 102.41; August 101.89; September 101.90; October 101.77; November 103.67; December 105.10, grocery items each month in the same food stores throughout the UK. The basket covers large

1979: January 108.54; February 108.65; March 109.12; April 110.88; May 113.59; June 116.02.

week should help to increase domestic supply and thus bring prices down. The warmer summer — when less meat is usually consumed — will also help to keep prices in check.
But some producers have warned that beef and lamb.

In this month's FT basket, the this summer. The other main reason for cost of meat rose by almost £20 to reach £490.95. Beef showed the rise in the basket's cost this month was the 1.5p per plnt increase in milk prices from June 3. The increase had been the greatest increase with a joint rising by at least 10p to reach £1.60 per pound. Although lamb prices were more stable this month, pork was generally more imposed mainly to absorb wage rises of between 15 and 17 per cent fer milkmen earlier this

prices might rise even higher

year. The milk price rise meant that the cost of the dairy produce section of the basket rose by almost £20 to reach £548.50. Butter and cheese were generally more expensive, although the extra butter subsidy agreed by EEC Ministers late last week should lead to a fall in prices in next month's

Although the steep rate of increase in fresh fruit and vegetables has been halted in this month's basket, the expected seasonal falls in price were not as great as had been expected. Lettuces, tomatoes, and cauliflowers were all and cauliflowers were all cheaper this month, But these lower prices were offset by the scarcity of root vegetables which pushed their prices up. Lettuces are now. 13p as opposed to 20p each last month while carrot were up 1p per pound to 22p. Tomatoes are 44p per pound instead of 58p while onions havie risen from 13p to 18p per pound.

all marginally more expensive this wonth. Inquiries about the grocery basket should be made to Lucinda Wetherall at the Financial Times. The F7 grocery prices index is copy right and may not be repro duced or used in any way without consent.

Drug exports 5%: down this year

BY SUE CAMERON, CHEMICALS CORRESPONDENT

THE VALUE of UK pharma- £100m down on last year during ceutical exports during the first the first five months of 1979. quarter of this year dropped by 2 per cent compared with the had been Britain's biggest pharsame period in 1978 to £147.8m, maceutical export market for However the value of imports some years. In 1978, pharma-However, the value of imports rose by 18 per cent to £53.7m which gave a pharmaceutical

less than the 1978 figure. The Association of the British Pharmaceutical Industry said yesterday that raw material cost increases were the main reason for the rise in the value of imports. Volumes had not in-creased substantially.

markets were largely respon-

The association said Nigeria ceutical sales to Nigeria were worth £51.7m. However, in an effort to cut down her import bill, Nigeria has now begun intrade surplus for the first three months of £94.1m, or 15 per cent specting all shipments of drugs before allowing them to be landed. This had caused landed. This "severe" delays.

At the same time, Iran, which was the UK's sixth largest pharmaceutical export market with sales worth £29m last year, had creased substantially.

It added that difficulties in British drugs apparently for both the Nigerian and Iranian political reasons. The revolution in Iran had also caused physical sible for the drop in UK exports problems for British exporters of pharmaceuticals. Total UK because it was proving harder sales to Iran and Nigeria were to get orders delivered there.

Shipbuilding 'heading for renewed depression'

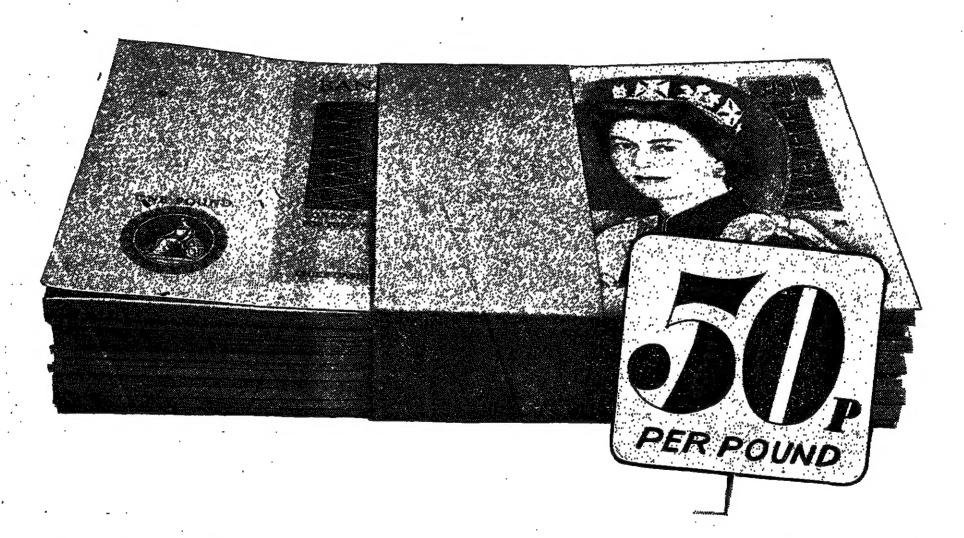

THE WORLD'S shipbuilding leading to further exacerbation industries are likely to suffer of the shipping surplus. further depression, Mr. Michael Revell, vice-president of the openly available for resident Marine Midland Bank, says in shipowners are extravagant, he

shipbuilding are being flouted, in the first quarter of this year.

NRDC can provide half the finance for developing and marketing new technology

There's always an element of risk in developing and marketing new technology. And the bigger the risk, the more difficult it is to obtain

finance. The National Research **Development Corporation** is ready to help in such

We provide finance for the development and launching of products and processes based on new technology.

NRDC finance is available to companies of all sizes, including subsidiaries, and we'll consider any project which contains a genuine technical innovation.

Through our joint venture finance we can contribute half the cash flow required and carry half the risk. The company does not have to pay anything back until the project starts generating sales. And in the event of

technical or commercial failure, we'll take our share of the loss.

Joint venture finance is unsecured and off the balance sheet. The funds received from NRDC can be treated as income to the profit and loss account.

And NRDC finance is available in addition to DOI grants.

For further information and a copy of our brochure,

please contact Brian Mann at the National Research Development Corporation, Kingsgate House, 66-74 Victoria Street, London SW1E 6SL.

Or telephone 01-828 3400.

OFFICE EQUIPMENT

All-round printer

IMTEC has produced an A1 enlarger/printer which can be tain, it has proven optical units adapted from a high-speed semi-automatic paper feed machine for low-volume use to a fully automatic production printer, to cater for the whole range of market requirements. This machine complements the Imtec AO, which has been in production for three years.

The secret of the new machine's versatility is its modular design: the customer buys only the modules he needs to suit the particular require-ments of his business or budget. He can start with the basic. low-cost printing module and then, as demand changes or his requirements become more complex, add on any or all of

Basic printing module takes any size of paper from A4 to AI, including non-standard Prints are produced electrostatically from positive or negative microfilm. toner is automatically monitored and adjusted to ensure consisttent quality. Magnification is variable within the scale 7.4x

the size of the paper offered and automatically places it in the correct printing position.

Additionally, users can have from one to five Imtec suction feeds, each capable of accommo dating a full range of interchangeable metric or Imperial size paper trays (without losing the semi-automatic paper feed ing facility), and an automatic card changer which can feed through up to 100 sperture cards for printing consecutively. None of the extra attachments increases the size of the machine or the floor-space required, as even the paper trays fit into the existing framework. Imtec has made provision for several other

With the addition of the units becomes a sophisticated production printer, which is still easy to use and maintain. Honeypot Lane, St. Middlesex; 01-204 8355.

Desk-top copy machine

COPIES CAN be produced at to allow easy copying of bound the rate of 12 a minute using documents and photographs, a new desk-top copying machine from Rank Xerox, the model

This particular machine is aimed at small businesses or for decentralised use in large organisations. A likely rate of use would be about 5,000 copies

There are only two controls -a copy counter (up to 39 may be selected) and a button

paste-ups, pencilled notes and even three-dimensional objects can be accommodated. The unit will make the copies on coloured paper, letterheads, pre-printed forms, pre-punched paper and also on to transparencies for use in overhead

or it can be leased for £52/

narked "print." Oxford Road. Uxbridge UBS
The platen has been designed 1HS, Middx. (Uxbridge 51133).

ELECTRONICS Exchanges of bubbles

BURROUGHS and Rockwell in bubble memories and other International have signed an electronic devices at facilities agreement to exchange techninin Anaheim, California, and agreement to exchange technical information and assistance in the area of bubble memory devices, one of the technologies that promises to make data processing less expensive and to accelerate the spread of electronic products to the home as well as throughout industry and commerce.

It calls for an immediate and on-going transfer of information covering certain bubble memory products of both

Pitfalls of vying with the mighty

THREE OF the companies in puters, particularly the 370/158 the forefront of the drive to hit and 148 models. IBM's dominant market position -Amdahl, Itel and Magnussonare faring very differently in the wake of the IBM 4300 launch. which set new price-performance standards for the whole industry

which has swung into line with IBM design. Amdahl is experiencing a leasing to sales ratio far higher than management expected. Net income for the second quarter is expected to be "break even" and, for the whole year 1979, to viously. In the second half of this year, Itel will be renegotiating he 'materially below' that recorded in 1978 should the

present trend continue, the company says. At the same time, deliveries for the quarter will equal or exceed any previous high while deferred income and profits will benefit company performance at a later stage. It seems, therefore, that the

unprecedented growth for this leading predator in the IBM user fold is a thing of the past and that a period oi, say, two years' consolidation can be expected. No one has, however, indicated that Amdahl cannot face and match any innovations IBM may have up its sleeve, with the Hseries of big machines with vast memories predicted for 1980.

For Itel, which has been a hot contender at all levels, but

generally for machines smaller than those put in by Amdahl, the situation is very different. This is due largely to the historical fact that the company is heavily involved in the computer leasing industry. This has been sharply hit by the latest IBM announcement which has main storage, compared — for cut the residual values of instance — with 1 megabyte in previous generation IBM com-

fuel tanks during the lost war.

the tyre stem by an appointed

agent (it is not a DIY product)

interior. It will not seal large

promises to repair

Residual value insurance at Lloyd's, under the latter's wellknown "J" policy, is expected to lead to heavy payments to the leasing companies, including one of over \$100m to Itel.

Meanwhile, the company's -or at least that part of it first-quarter results on computer sales and leasing show a loss of \$4.4m against a profit • COMMUNICATION of \$6.3m a year ago. Overall in the first quarter the company was still profitable but still far less than 12 months pre-

> the prices it pays Hitachi and National Semiconductor for the processors it sells into IBM sites. They will be, undoubtedly, very much lower than those which have prevailed hitherto. For newly fledged Magnusson ATC, which should have been hardest hit since it is competing

machines, the picture is unexpectedly rosy. The company was doubly over-subscribed recently after a bid for a further round of ven-

directly with 4300 series

ture capital amounting to \$5m. This money will be used to increase production of the M-80 which competes across all the 4300 models, with (Magnusson says) performance to spare in every instance. Modular design means cheaper expansion than by installing new systems and all models of the M-80 can be field-expanded with plug-in cards up to the most powerful. This covers the important ability to run 8 megabytes of the 4331.

Atlas Copco compressed air systems.

A force made to serve you.

Scicon

APART FROM working on two pieces of hardware that it has ieveloped itself—a communications front-end processor for its own Univac mainframes and a unit for the conversion of telex to ASCII code-Scicon Computer Services believes that it has further consolidated its position in the communications hardware market in the UK by successfully exploiting its recent liaison with Micom in the U.S. and selling 100 of the latter's statistical multiplexers in about

six months. These sales have been schieved mainly through the three agents appointed by Scicon (Borer Electronics, Master Systems and Peripheral Hardware) and they account for about one-third of all the multiplexers installed in the

UK in the past ten years, according to the company. Thus, Scicon Computer Services sees itself moving away

from purely bureau work into the area of "black box" sales in communications. According to Micom executive Roger Evans this market is rapidly unbundling in the U.S. (that is, units are being sold with no

associated support unless it is paid for) and the UK will soon Certainly. Scieon seems to have hitched its star to a fast-moving waggon. Evans moving waggon. Evans, an 15515 Englishman who was a founder member of CASE and sold up to go to California, believes work place, is a unit called that growth in communications. Conditionair 1700, announced will increasingly come from by Colt International, New sales of this sort by smaller companies and will have very

little to do with the communi-

cations majors. Mini and micro-

Already Micom is turning out and the company revenues have increased tenfold in three years with 25 per cent pre-tax profit.

HEATING Control of

It now contains a range of addibench" protection for up to three workers, cleaning and recirculating the air in the tives which includes an antifreeze and corrosion inhibitor, and fibres suspended in the solution. It has been in use in the work place, is a unit called Conditionair 1700, announced U.S. where, says the UK agent, the system has been applied to over 5m tyres.

The maker stresses that the

New court building in Chelmsford

COSTAIN Construction has won complex in Chelmsford.

This three-storey building will be of steel frame construction on reinforced concrete pad foundations with external walls of brick-faced concrete panels and hand-made bricks utilising traditional and modern design.

Six courts at first floor level will be built around a central concourse off which will run consulting rooms, witness waiting room, barristers' lounge conference room, bail surrender lobby, dining areas, etc.

Work, which has begun and is due for completion by late 1981, is being carried out under the direction of Mr. R. P. Duncan, regional architect.

jobs for **Bovis**

REFURBISHING and modernising the former Hacker Radio factory in Maidenhead, Berkfor GenRad of Bourne End. Bucks, is one of two contracts just awarded to Bovis Construction. Work here is worth £400,000 to the company and involves both the existing factory area and two office

Contract work for about £300,000 is for Coca Cola Southern Bottlers to extend bottling hall and warehouse facilities on the Eley's Estate, Made of alloy, the Zifa tower Nobel Road, Edmonton, North

STD (078 983) 3721 Jarvis gets work worth

over £2m LARGEST OF five contracts worth £2.6m awarded to Jarvis is for the construction of a plant for James Burrough on the Eastway Industrial Estate, Witham, Essex, for its Fine Alcohol Division. This initial phase will cover an area of 50 metres by 105 metres. The architect is John Phillips.

Two contracts have also been received from the Property Services Agency on behalf of the Post Office. One is in respect of a telephone service vehicle a contract worth over £3\m to centre at Staples Corner, build a new county court Cricklewood, London NW2, and complex in Chelmsford.

This of the contract worth over £3\m to centre at Staples Corner, Cricklewood, London NW2, and the other offers work at the Sutton, Surrey, telephone

In Manchester Jarvis is a building extra offices for the Royal Exchange Theatre which it completed in 1976 and it is also building a 32,000 square feet factory to enlarge the switchgear and electrical compo-nents complex in Sharston Road for George H. Scholes and Co.

Refurbishing in Mayfair

PROJECTED TO cost £2.6m to complete, refurbishment and fitting out of Esso Europe's headquarters in Stratton Street. Mayfair, is by Trollupe and Colls, which has now won work in this area totalling over

When completed, the Stratton Street premises will be linked to the Berkeley Street building of Thomas Cook's old head office there (which is also being refurbished. largely for occupancy by Esso Europe, at a cost of £6.5m) and will give Esso Europe a large self-contained headquarters with some 20,000 square metres of office space.

Latest work includes stripping out and replacing partitions and ceilings, complete redecoration and provision of casing for existing heating. The plant rooms are to be upgraded, which includes boiler rooms, lift motor rooms, and other general service rooms.

Fast, responsive, reliable horsepower.

Powering out from the starting gates at the off, race horses are a supreme example of instant response. It is that same sort of instant response

you find with generator sets powered by Rolls-Royce diesel engines. Which is why so many of the world's leading electrical generator manufacturers rely on Rolls-Royce to provide immediate power wherever and whenever it is needed-all the way from 130 to 806 hp (106 to

Based on many years of extensive research and using advanced manufacturing technology Rolls-Royce diesel engines are simply yet effectively designed, precision built, checked and rechecked during every stage of manufacture, economical and trouble-free to run, needing the very minimum of maintenance. They give immediate response and reliability whether in the blistering heat of the desert or the sub zero temperatures of the Antarctic.

Our world-wide sales and after-sales support covers 114 countries so you can be sure when you buy Rolls-Royce powered generators that parts and service are readily available. Comprehensive colour literature on all

our diesel engines is available on request.

by General Motors

American Cars by General Motors are more economical with fuel than you may think.

The Chevrolet Monte Carlo Sedan for example, returned an impressive 29.5 mpg at 56 mph when tested by the Department of Trade and Industry. And this on 2 star petrol!

There's a lot to like in the New Americans — test drive one today.

de Lieux Las

cholas Leslie reports on the winners of a "Build Your Own Business" competition

The birth of new enterprise

mince words. Even in pany of a "friendly" n—the Conservative il firms who has just d the Government's aent to the small sector—he cannot he temptation, like wist, to ask for more. ccasion of this brief was last week's fion of cash prizes £17,500 to finalists of uld Your Own Busimpetition, sponsored UK. The competition used and run by se North—a volun-ness advisory service everal years ago by ebl. a successful businessman and am University Busi-

linister, Mr. David Parliamentary Secretary at the ed the Budget tax ne step in encouragmall business sector. stressed that this olve the problems of

e when the state of bit of entrepreneurcoal mining business a possibilities. Keith ertainly reckons that rovide him with the branch out on his the judges in the our Own Business" 1 agreed - to the they awarded him orize of £7,500 cash n to mine a 15-acre Stanley, County

, aged 42, knows his e is a chartered min-er and a Fellow of e of Mining. For 16 worked for the has been with the duation Department nd Revenue. the first to admit

the competition, he light in his underfinance. The need a business plan for "introduced me to as cash flow, profit counts and balance

start-ups, particularly in the North-East, which needed more small firms to create new employment but bad a new employment but bad a less than average number of well-off people who would benefit and be tempted to start up or back new ventures.

Making a plea for people to be encouraged more to walk on their own rather than being "molly condited." We

heing "molly coddled," Mr. Loeb also emphasised his commitment to private enterprise by a reference to the sponsors and organisers of the competition. It had been helped, he said, by the support of a private company, Shell, a voluntary advisory organisation of en, and the Small Business Centre within DUBS, which is largely

financed by private enterprise.

A particularly interesting insight into the judges feelings on the strengths and weaknesses of the finalists as given at the presentation by their chairman, Professor W. G. McClelland. Among the plus points be cited, managerial ability, depth of knowledge of proposed markets and quality of

tation that there had been a weakness on the financial side of Lumsdon's presentation, but that it had been felt this could be quickly remedied. What had impressed the judges had been his knowledge of his business, the certainty of his markets and the determination he had shown, exemplified by his having worked part-time in several small private mines.

Lumsdon's plan is to lease from the NCB a disused 15-acre site, from which, he reckons, 50,000 tons could be profitably extracted over a 20-year period by an organisation as small as his. He is hopeful the NCB will grant him a lease—and that very short time of starting up, could Lumsdon thinks he would be years. employing 11 people.

The coal at his proposed site is of high quality and is suitable for household, coking and power station fuels. Lumsdon sees no problems in finding buyers and has based his costings on a conservative selling

Typically of a new vanture, Lumsdon wants to keep control of the whole project to himself. which may prove to be a probpresentation of a business plan emerged as major pluses. Minuses included difficulties in exploiting a perceived market and poor financial acumen.

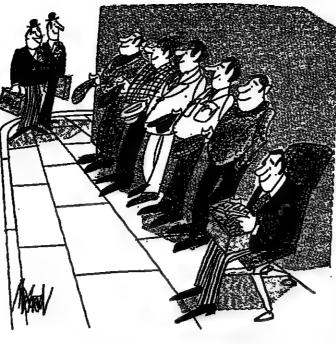

Another significant feature of the competitors' submissions was that their financial calculations invariably underestimated the amount of working capital that would be required, according to Mr. John Eversley, the competition director at DUBS. And the conditions attached to such money by financing organisations

Though the competition proper has now ended, a follow-through programme is planned. Enterprise North and DUBS will continue to maintain contact with competitors, steering them in the right directions for advice, including the small firms information centres of the Dol and the Council for Small Industries in Rural Areas (Cosira). A briefing seminar for 100 of the competition's contestants is to be held as part of the programme.

lem given that he needs a minimum £25,000 to get his mine off the ground. This would provide the necessary working capital and funds for those items of equipment he needs to buy. For the most part, though, his equipment would be leased; for example, compressors, Cater-pillar and drag line.

The lure of independencewhich, he says, has loomed increasingly large over the past five years—does not worry him in any respect other than financing. He clearly does not relish the idea of large amounts of debt-" interest rates and repayments are very high." His will grant him a lease—and that somewhat vain hope therefore is the local authority will give to get hold of a large slice of planning permission. Within a unsecured money which he could repay over two or three More realistically, any finan-

cier prepared to put up the level of finance Lumsdon needs would probably want a share in the equity of his company and a small share of profits To date, Lumsdon has talked to Newtown Securities, part of the Midland Bank group, and is due to have discussions with

it's hard to fault that small business! "

bility he has yet to investigate is the European Coal and Steel Community, which funds projects in coal and steel areas. John Fisher did not even wait

for the result of the competition before setting up his com-pany, called West Meters. In fact, there was a point when he gave brief consideration to withdrawing from the contest. This was because the pressures of competing — preparing a written presentation, and being subjected to an assessment at different stages of the event-took up much of the time he needed to devote to forming his company, negotiating with sub-contractors and arranging marketing and distribution. But as he came second, win-

ning a £4,000 cash prize, he is naturally delighted that he stuck it out. Fisher has developed, and patented, a thermometer that records maximum and minimum temperatures. Instead of a conventional mercury scale, his thermometers have a dial and pointers. Fisher's biggest market in the two months since he started is the garden trade, for

include laboratories. Fisher, aged 36, got his idea, quite literally, in a flash of inspiration. Since he was working for a thermometer manufacturer it would seem, at first sight, a fairly natural line of thought. But Fisher is a computer engineer who had nothing directly to do with

thermometer manufacture.
Professor McClelland said of him that he had realistic plans for more products and for recruitment of a workforce, and had shown himself to have commercial acumen and managerial ability. Eventually, says Fisher, he

would like to make all the parts of his thermometer, "but only if I could save money by doing so." Even now, he has plans for further products.

Fisher has for many years been keen to start his own step up the promotion ladder in computer engineering because would have required moving his base regularly, and "anyway the pay is not very good."
Three third prizes of £2,000 were awarded instead of just is due to have discussions with started is the garden trade, for one originally planned, simply industrial and Commercial people wanting to record day because the judges felt the Finance Corporation and and night temperatures in quality of the finalists to be so Barclays Bahk. Another possigreenhouses. Other customers high.

British managers challenge conventional wisdom on motivation and pay policy

By Jason Crisp

IT IS generally accepted that merely increase. Attitudes to- of being able to tell employees the personal commitment to their company's business of This can be attributed to two Nearly one in four of the factors: first, they have been managers on the panel were factors: first, they have been increasingly excluded from decision making, and second their relatively poor level of

Accepted it may be, but none the less erroneous apparently. Over half the members of a panel of 700 managers surveyed in February said that their personal commitment had been increased because of their inolvement in decision making over the previous year; only 14 per cent said it had decereased. And while 16 per cent said that their remuneration had resulted in a decrease of commitment, one in four said it had actually increased it.

That other well-known demotivator, slow growth leading to fewer opportunities and therefore less promotion, would not appear to be as damaging as sometimes thought. Fifteen per cent of the panel did indeed say that their commitment had declined because of the avail-able prospects for promotion, but on the other hand over twice as many (33 per cent) said it had increased because of promotion prospects.

Unionisation of managers

The panel, which has been in existence for several years, consists of 700 managers who have attended programmes at Ashridge Management College, and the study was carried out by the Applied Research Group at the College. It might be said however that managers who have gone through a management college of the stature of Ashridge would have a slight tendency to have a brighter and more positive outlook than the verage UK manager.

One in three members of the sation of managers would spurious."
"greatly" increase over the Another reason not a next five years, and there

wards unionisation were split about equally three ways: in favour, indifferent, and opposed. already members of an independent trade union and 15 per cent belonged to in-house staff associations.

Interestingly, two-thirds of the managers believed the rela-tive pay of managers to white collar and manual workers had decreased because fewer managers belonged to unions (36 per cent felt their pay was "substantially" lower).

The managers' attitude towards free collective bargaining may come as a surprise to the present Government. Two-thirds of them favoured some form of incomes policy in preference to a return to free collective bargaining.

At the time of the survey, per cent felt that the then Labour Government should persist with its 5 per cent guidelines while 30 per cent argued for a return to free collective bargaining.

The Ashridge Research Group suggests that this support for pay policy might be explained in several ways.

Many might have believed that having adopted a low, fixed percentage (rightly or wrongly), the Government had no option but to stay with it until the end of the wage round. Any other decision would have been unfair to those who had already settled.

"Also, some people might have felt that despite the many publicised examples of wage settlements outside the guidelines, the policy was still having some impact on the size of negotiated wage deals. Some of those who settled for 5 per cent would have wanted to renego-

"The emphasis on produc-

tivity resulting from the incomes policy might also have been seen as beneficial by managers, even though many of the claimed productivity in-Ъe

Another reason, not cited by next five years, and three- the group, may be that man-but only quarters believed it would agers like the relative certainty directors.

that they are only allowed—by Government decree—to pay so

On the subject of business environment, the managers were not particularly bullish. For instance, over half of them believed that their industry's profitability would be the same or less in one year's time. However on a longer view there was considerably more optimism with 70 per cent reporting an expected higher profitability (in financial terms) for their com-

'No' to worker participation

Nearly one in three managers said that they believed their industries would be employing less people within a year and 40 per cent believed this would be true within five years.

Two thirds of the managers stated that they were against any large scale extension of worker participation in the private sector, though, significantly, almost three in ten (27 per cent) said they were in favour of such a move. As to their own companies, 31 per cent believed existing worker participation was negligible, 56 per cent said it was moderate and 12 per cent described it as "substantial." One third believed that worker participation would increase over the year, but more than 60 per cent thought it would remain the same.

The members of the pane were also asked which single means would be the more effective way to extend particle pation-irrespective of whether they were in favour or not. Forty-three per cent cited share in financial ownership." which is scarcely worker particlpation in the usual sense. There would appear to be some con-fusion with "motivation," or "identification with company interests."

Nevertheless one in three managers named Works Counclis as the most effective means: 12 per cent said " job redesign but only 4 per cent cited worker

BY SAMUEL BRITTAN

British counterparts.

One reason for this derives from the most characteristic symptom of the so-called English sickness: low produc-tivity and low real wages. Outbut per head or per machine is. as all international comparisons show, on average much below that obtainable with best practice techniques. But this very fact means that a concern which can successfully operate such techniques is in a position to make good profits, pay wages above the going rate and enjoy

This brings one to another psychological puzzle. According to economists who look at costs, prices and exchange rates, the appreciation of sterling should above the going rate and enjoy a reputation as a good employer,

It is a little mysterious why these achievements should be beyond the capacity of native entrepreneurs. However often it is denied, there is a peculiar English class system which inhibits mutual understanding. Americans have often told mu how beig neither upper class nor lower class nor even "nouveau rich" but simple Americans, they find it easier to communicate across the conventional barriers.

Yet to leave it here is too simple. There are so many accounts of improvements brought about even by native British managements in particular cases that it is difficult to square these on the ground reports with the overall statistics showing almost no produc-

Generous 🦠

American concerns are, however, also attracted by what they perceive as very generous. treatments of corporate profits. When Mr. Joel Barnett, the last Chief Secretary to the Treasury, remarked that the UK was "a corporate tax he was echoing a widely held international view. But as one American executive emphasised to me the other night: "It was also an individual tax hell. But since the Budget it is just a corporate lax haven." He was not talking about the 3p cut in the standard rate of tax or the switch to VAT, around which the British argument has centred, but the trimming back of the higher rate taxes which were a deterrent to those who :were bad at tax avoidance, or preferred straightforward take home pay to complex corporate plans on their behalf.

One should avoid facile connections between structural changes and market events such as the recent strength of

black and white

Psychological

have depressed profit margins to a catastrophic extent for conventional British firms. Companies should have been cancelling investment plans canceling investment plans, left, right and centre. There is an element of this gloom in the official "Red Book" forecasts. But although there are some sections of industry, such as textiles, where such a mood can be found this is not general. On the whole the corporate mood was cheerful even before the election and has become more cheerful since. Finance directors are more cheerfu than business economists: and chairmen are more cheerful than finance directors.

I would not bank on this continuing for too long. Chief executives, like the rest of us tend to go by cash in the bank rather than sophisticated calculations of underlying profits. But that may merely mean the perceived squeeze will come later rather than sooner. Nor is it too cheering that some of the same executives who a little while ago were calling for an incomes policy to rescue them are now asking for an act of will by the new Government in standing by its monetary guidelines and not bailing out enterprises who

award large wage settlements which they cannot afford. Whether they would back such an act of will if it really occured is a matter for some scepticism. Personally, I would prefer intelligence to be supplemented by imagination rather than just willpower. How much there is of either in our arrangements, when a highly sophisticated U.S. trust manager begged me not to criticise Bank of England methods of monetary control after he had just put nearly all his port folio into gilt edged, and did not want to be deprived of another easy ride, is an open

question. In short the business mood is surprisingly cheerful, but it is of a quality that should make sterling. Nevertheless, overseas one just a little suspicious.

out to wholly owned distribu- infringing copy.

exhibition. Copyright ownership in the cinematograph film is retained in a person's possession is in the courts have finally put the throughout in the film producer. Even old films that are no longer generally released are kept for old and new films, and it is companies have had to allow prosecution's case. throughout in the film producer.
They had been accused of Even old films that are no longer by dishonest means, film dishire to individuals who desire difficult to determine whether inspection of all their records tributors of their hiring fees. to show them to their friends the acquisition of them has to the defendant, and this often The dishonesty was said to be at home or to small gatherings the importing through the such as working men's

Until recently it was quite feasible for the film companies to keep a tab on their films, although pirated copies did leak out. Film laboratories occasionally were not averse to making unauthorised extra prints of films, and emplyees of film companies and projectionists at cinemas did succumb to the cash blandishments of people who "borrowed" the prints for long enough to make copies, which then circulated to collectors and cthers who exhibited the films claudestinely to interested groups.

Copying of films is an infringement of copyright, whether or not the copier knew that the protect their product, were work was under copyright. Four years ago a successful prosecution was brought against several persons who had acted in that

copyright owners are in tive the suggestion that the difficulty in establishing that particular print has been subthe particular film that is found ject to a "first sales." Although

been legitimate or illegitimate, means the collapse of the litior more often of ambiguous gation. pedigree.

In the American courts the prosecution, the burden is on issue is complicated by the estab-lished doctrine that, once a film "first sales." Hence proseculished doctrine that, once a film has been sold, copyright no tions are fraught with technical, longer subsists in that film print, evidential difficulties. although copyright in the negative and other prints remains.

The trouble is that the "first sales" doctrine is not restricted to sale in the strict sense. Gifts-to the stars of films, transfers of films to salvage companies for junking, and other forms of involuntary transfers all qualify as "first sales."

Sometimes airlines and television stations are allowed to keep the films they hire at the end of the hiring, on payment films. It may now turn to the

extended in many directions. The Anton Piller order is In that case, an English com- swift and effective. Indeed many of the pirates and bootleggers in the gramophone record business have instantly delivered up their infringing that the English defendants material and gone out of busiwere in secret communication ness.

Criminal law

The film industry, by contrast, has not yet resorted to the civil courts. Instead, it has tried to use the protracted and cumbersome process of the criminal law. Mr. Monkhouse was arrested only in July, 1977; his co-accused having been detained for questioning in October, 1976. There is the further complication that with films there has grown up a new creature called the film collector, although the film industry resolutely and defiantly says there is no such thing as a genuine collector of

The U.S. courts, however, have acknowledged his existence as much as that of the genuine stamp collector; and, implicitly, Judge Leonard, QC, at the Old Bailey found that there was such a person, * [1976] Ch. 55. † Exparte Island Records [1978]

Toads by B. A. YOUNG

has chosen as the hero ew play, was a Viennese He embraced the creed, that i characteristics may be d, and spent much of

reptiles bred in his ory. More of his life nt recording apparent inces in an endeavour to a serial principle from currence. He succeeded er quest, and ultimately of fudging his results.

Collins shows us an ry version of the last ours of his life. He has to the Schneeberg, and in Liz da Costa's by what seems to be a castle architecture up in white canvas, re he falls in with an

r from the Coroner's the has the gift of the properties of things ing them. The inspector that in exactly three time, at six o'clock, er will shoot himself the left temple. three hours, slightly

ed, are filled with the

Kammerer, whom Barry include not only anthropomor- cut off, remarks "Now we know phic toads and a lizard that grows wings (on Darwinian rather than Lamarckian principles, though the evolution happens offstage), but also Kammerer's family, a Viennese prostitute, a dancer, Sigmund Freud Alma Mahler (in her bath) and one Fontgibu, of whom we know only that he like plum pie.

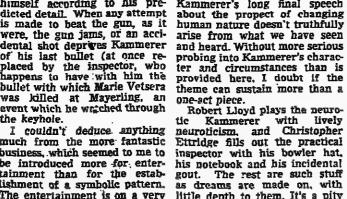

The unifying factor in all this whimsy is the inspector's insistence that Kammerer should kill himself according to his pre-dicted detail. When any attempt is made to beat the gun, as it were, the gun jams, or an acci-dental shot deprives Kammerer of his last bullet (at once re-placed by the inspector, who happens to have with him the bullet with which Marie Vetsera was killed at Mayerling, an event which he watched through the keyhole

much from the more fantastic business, which seemed to me to be introduced more for enter-tainment than for the establishment of a symbolic pattern. The entertainment is on a very variable level. The inspector, shown how a creature called a antasies of both Kam- sea-squirt grows bigger external and the inspector. They siphons when the originals are

why Cleopatra kept a eunich." Dr. Freud, rising, recumbent on his couch, from the trapdoor, asks "Are you one of the Kodak Kammerers?" The pair of midwife toads (Alytes obstetricans) endlessly copulating in their glass case provide some circus reactions but disappointingly little else.
Frankly, I feel that Mr.

Collins hasn't gone deeply enough into his material to provide more than a vaudeville. Kammerer's long final speech about the propect of changing human nature doesn't truthfully

little depth to them. It's a pity that the reptiles must speak through offstage amplifiers, for it dulls their anthropomorphism. The director is Geoffrey Reeves.

Robert Lloyd with Toads (Amanda Knott and Christopher Ryan).

In the 7 from Klaus Tenn a firm—never vulgan—touch, first half, the cellist David the London Symphony On this occasion the LSO Geringas made an uncertain on Thursday. After did playing I have heard in this 75th anniversary series: ninglessness of Kara- crisp, unanimous, alive, and in count of the Eighth some departments (lyrical first than justice, producing only a y on Tuesday, this was flute, restrained brass, per-flawed, uneasy lyricism. fectly clear timpani) uncom-

first half, the cellist David Géringas made an uncertain stab at Schumann's Cello Concerto: his technique and his sound were both impressive, but he seemed to do himself les: NICHOLAS KENYON

Lawrence portrait exhibition

Among paintings being lent Lawrence.

The Sir Thomas Lawrence from the U.S. is the portrait of his Bruckner, is full exhibition by the National Mrs. Wolff (from the Art nd shade: the rhythms Portrait Gallery which opens on Institute, Chicago), a close November 9 at the exhibition friend of Lawrence and the full rooms at 15 Carlton House length portrait of the actress Terrace, London SW1, will be Elizabeth Farren (from the the first ever to assemble both Metropolitan Museum. New stral texture is finely, the first ever to assemble both Metropolitan Museum. New balanced: Tennstedt drawings and paintings by him York). This picture, first shown balanced. Tennsted drawings and paintings of the music with respon- from public and private collections abroad—notably the U.S. at the Royal Academy in 1790, if specifications as for France and Germany—as well helped to focus public attention life into the transit as from Britain and Ireland.

Jazz at Ljubljana

by KEVIN HENRIQUES

Ljubljana, the capital of (Roger Sellers) sequence high-Yugoslavia's province of Slo-lighted a well-organised and venia and a schizophrenic city balanced 45-minute set. which mixes genuine old charm with genuine limersonal modernity, has held an annual jazz butted the bulk of the memoratival size and the size of the memoratival size of the size of the memoratival s festival since 1960. To be strictly accurate the first seven were staged at the picturesque lakeside resort of Bled, some 52 kilometres to the north-west. Falling attendances forced the move to Ljubljana in 1967 where the festival, with its format of four-hour evening concerts plus post-concert jam sessions, has wisely avoided becoming an unmanageable. elephantine jamboree and con-

tinues to thrive. Credit for the two decades of continuity goes almost entirely to the city's jazz society, com-posed of lovers of the music. and to the organiser responsible for selecting and arranging the artists who have appeared every year since 1960, Mike Mazur from Zagreb.
Financial backing for the

mounting of the festival, held in country officially described as socialist federal republic. comes from the culture funds of Liubliana and the government of Slovenia, fees arising from coverage by the Slovenian radio and TV stations, and, of course, from entrance charges. The budget for this year's festi-val, the twentieth, was approximately 1,050,000 dinars (over-£26,000) and to judge by the attendance on all four nights must have come in comfortably

inside this figure. For 1979 the programme had a heavily contemporary base, appreciably jazz-rock slanted. And though one personally longed for a breath of joy-giving Mainstream or groovy Bop to provide much-need contrast the predominantly young audience seemed completely satisfied with the fare offered.

The venue for the concerts was the Krizanke. a former monastery, which has a 1,800capacity open-air summer theatre. A huge canopy protects the audience and artists from weather and never was it more needed than on opening. night earlier this month as torrential, drought-breaking rain first band, consisting of Yugoslav students from the Graz Music School in Austria, opened

As with most jazz festivals standards, ride the soprano-held on the Continent, a sprink-sax/guitar version of "Monk's ling of European musicians is Mood." mixed with a large helping of visiting Americans. No doubt that among the former the Finnish quartet led by planist Vladimir Shafranov and saxist unexpected fireworks when, as the co-leaders played a slow, reflective piece in duo, a spectacular and noisy pyrotechnic display erupted near to the Krizanke, distracting everyone except the two musicians.

Britain was represented by the Ronnie Scott quartet and by Nucleus, the jazz-rock group led by trumpeter Ian Carr. Though now ten years old, Nucleus, with its broad-based contemporary style, still possesses the ability to excite. Some clever interaction between the leader and

The Maltings, Snape

Eugene Onegin by Ronald Crichton

artistic directors of the Aldeburgh Festival, had the happy idea of celebrating the centenary of the first performance of Eugene Onegin. This took place not at the Imperial Opera but at the Moscow Conservatoire— Chaikovsky felt that student singers were more suitable for this work than musically experienced but physically too mature opera singers. The Aldeburgh staging (seen for the first of three performances last Monday) accordingly involved the Snape Maltings Training Orchestra, a chorus from the Guildball School of Music and Drama, dancers from the Ballet Rambert School, and young principals most of whom have been through advanced study courses at the Britten-Pears

Rostropovich conducted. He, like many others, claims Onegin a "chamber opera," but it did not, on this occasion, come out altogether like that. Perhaps Russian and British ideas about intimate music-making are as

different as, say, Bach played by Rostropovich and by emotionally reticent British cellists? Everything in his Onegin was brushed in with broad strikes: much to enjoy, but not a great deal of subtlety or consistency. The conductor or consistency. The conductor half-curtain that stuck. Some best I have hugged and squeezed the music, ingenuity, in the Petersburg long evening.

Rostropovich, as one of the adoring every note, now dashing ball, for example, little unity rtistic_directors of the Alde- ahead, now coddling a phrase to of style and indeed not much make doubly, trebly sure everyone would share his enthusiasm.

The orchestra gave him warmth, vibrancy and remarkable suppleness. There were moments of acute sensibility, such as a normally inconspicuous passage for lower strings just before the off-stage chorus in the first scene, which seemed to resume the grief of the entire Pathetic Symphony into a few bars. Lensky's aria had a subdue, luminous accompaniment of great beauty. The lead-in to Gremin's aria was magical. Passing shudders of shaky ensemble between stage and pit were a reminder that even musicians of that even musicians of Rostropovich's callbre don't become routined of conductors for the asking. become

Since almost anything sounds well in the Maltings but not everything, at least from a seat near the front, looks well there, the conductor had an easier task Don). Broad effects again-the integrated dances arranged by Terry Etheridge, the scenery a mish-mash of naturalistic buil-rushes, dainty silhouette effects and a silly Brechtian

Individual characters were crudely sketched. On the first night Tatania was sung by Marie McLaughlin, who shares the role with Elizabeth Brice, Miss McLaughlin brought impressive fullness and variety of voice but gave a one-sided picture of the girl—pathologically shy and gawky, unlikely to interest Onegin at any stage, too quickly shaken out of her worldly poise in the St. Petersbury act. Richard Jackson's Onegin, firmly and distinctively sung. excellently sardonic in the ier country scenes, came near to Adrian Thompson's Lensky

opera on the other hand, touching and extremely musical, deserved the care the conductor lavished on his music. As the nurse, Filipicvna, Nuala Willis displayed a fine, deep contralto. Europe hangs together

the meeting of the heads of government of the European Community in Strasbourg last world energy supplies both now and in the long term, the stateweek was the desire among all ment notes, that the world will member states to stick together. move rapidly towards a "large-The Community will not be alone in facing a major eco-nomic crisis if the present shortage of world oil supplies gets any worse, or if the price of oil goes on rising at its recent rate. Equally, European unity will not in' itself be enough to solve the problem, But if Europe is divided, the chances of finding a solution

What is imperative now, therefore, is that the Com-munity should seek to build on the unity achieved in Strasbourg.

Principles

The statement on energy ofter the Strasbourg meeting may look in many ways like a lowest common denominator yet as a general statement of principles it is far from negligible. The Community has reaffirmed its letention to cut oil consumption this year by 5 per cent. It has gone further by resolving to limit oil imports between 1980 and 1985 to a level not higher than that of 1978. It has declared its interest in devetoping alternative sources of energy, and it has issued a strong endorsement of nuclear "Without the development of nuclear energy in the coming decades," the statement no economic growth will he possible."

The fact that member states of the Community are left to go about achieving the cuts in oil consumption in their own way is probably an advantage. There is no case, in this nstance, for harmonisation for its own sake. If one member wishes to proceed by import ceilings and others by relying on the price mechanism, that is a matter for the country concerned. The important point is that the cuts should be implemented, one way or another. Indeed, one of the reasons why the Strasbourg meeting reached agreement was that the French, who had been pressing for the generalised

THE MOST striking fact about Strasbourg statement is enough. move rapidly towards a "large-scale economic and social crisis" if a common strategy crisis " cannot be worked out between consumer and producer coun-

It is by no means certain that the consumer countries can agree among themselves even on the relatively modest objec-tives set out in Strasbourg, and it is still less certain that they can reach an agreement with the producers, even if they do. But the way to look at this question is to examine the consequences of failure. The failure of the industrialised countries to agree on energy, or the failure to implement any agreements they do achieve, would under-mine such western unity as has been established over the last few decades. The industrial democracies would be obliged to compete destructively among supplies as exist. They would be incapable of presenting a common front to the producers in any negotiations. The con-sequences in the longer term would be not only economic and social. They would also spread to defence, for a western world that was weakened by internal divisions could hardly defend

has made a start. It has begun to talk less about the surplus of milk than about the shortage of oil. It has recognised that it is comparatively weak, but that without unity it would be even weaker. All that is a welcome acceptance of reality. It is introduction of import ceilings and even for the fixing of a world oil price, were prepared to drop their demands. It was the need for unity that pre-

More trouble for

A NEW question mark has assesses its Rhodesia policy in the light of reports by two envoys who have just returned from Africa. Mr. Derek Day, Rhodesia by the defection of eight Members of Parliament from Bishco Muzorewa's United be reporting to the Foreign Secretary on the position inside African National Council, and the possibility that there are more defections to follow. The eight have formed a new party under the leadership of Mr. James Chikerema, the former vice-president of the UANC. This has robbed the bishop of giving his impression of the

Muzorewa

his party's majority in the new coalition Cabinet and of its overall majority in the House of Assembly. Neither develop-ment will prevent the bishop from governing, since the UANC and the entrenched white members in the Cabinet and Parliament will generally

But the split, which comes just three weeks after the formation of the new Government, does have disturbing ramifica-tions. First, it is bound to increase the relative importance in Parliament and the Cabinet of Mr. Smith and his fellow white MPs. This in turn is likely to lead to intensified criticism from abroad of Rhodesia's new constitution. under which whites have 28 reserved seats in the 100-member parliament and a quarter of the Cabinet posts.

Secondly, the rupture in the UANC is on tribal lines, making it more difficult for the bishop to speak for the country as a whole. The breakaway group consists of Zezurus the tribe to which Robert Mugabe belongs—and it in-cludes some of the UANC's respected nationalists.

Potentially serious

The split is the latest, and potentially the most serious, of the divisions which have arisen among the parties to "internal settlement" agreement. Against a back-ground of unabated guerrilla warfare, Bishop Muzorewa has vet to prove that he is capable of holding together a Government and that he is truly in

This is one of the factors the British Government will have Government proceeds cautiously to take into account as it re-

Defence

The immediate intention is to seek an understanding, along the lines of the principles laid down in the Strasbourg agreement, with Canada, the U.S. and Japan at the economic summit meeting in Tokyo at the end of this week and then to establish contacts with the producers who begin their own meeting on oil prices in Geneva

trialisation.

THE ECONOMIC jeremiahs ings over the 1976-77 pay round, have had quite a week. The and a tight monetary policy current account of the combined to hold down infla-

may also have had an effect.

There has also been a major Consumer spending might be buoyant, but so would imports, and the decline of manufacturchange on the external side with not only a jump of the price of crude oil, but also increases to the cost of other commodities. The impact of these rises on domestic prices would have been even larger but for a steady appreciation of the value of sterling against other major trading currencies some time. As last week's Bank of England Quarterly Bulletin -up 11 per cent in the last 12 months.

resulted from increased produc-tion of North Sea oil while manufacturing output rose very This has reduced the effect of oil and other commodities. Nevertheless; the cost of industry's raw materials has boom was mainly reflected in a risen by 9.1 per cent in the last six months compared with only 0.3 per cent in the

Treasury was forecasting a growth of total output, as measured by real Gross Domestic Product, of 2.4 per The result has been that a cent this year, compared with 1978. The latest Treasury forecasts are for growth of less than slowdown the projected current account deficit in 1979 has been The point to watch, however, is inflation. Last summer the

12-month rate of increase of retail prices was 7.4 per cent, a five-year low. Last autumn the This hope rests in part on the optimistic view that wage bargainers will accept the Treasury forecast only a slight Government's argument that the price raises associated with the acceleration to 81 per cent by the end of this year. Now the expectation is that the 12-month Budget were once-and-for-all, and that the general impact on spending power will be positive. This message does not yet appear to be accepted, to judge by the initial unfavourable response to the Budget in the opinion polis. There have also cen union calls for once-and-

tion in 1978. The improvement British balance of payments

The acceleration of the growth of average earnings from 8 to 14 per cent in the 1977-78 pay round began to deficit of £1.08bn in the first five months of this year. Com-pany profits are falling sharply work through. In addition, large and the rate of price inflation is accelerating. Yet sterling has been exceptionally strong, rising rises in the price of fresh vegetables, higher interest rates, an increase of the national to its highest level against the insurance surcharge paid by employers and big rises in local This mixture is not quite as authority rates have tended to paradoxical as it might seem. But taken together these indipush up prices since last autumn. The delayed impact of the more rapid rate of monetary growth in the first half of 1978

the growth of output in 1975-78

deteriorated even since last year. In November, the previous half-year.

> significant acceleration of inflation was already under way before the Budget though some rises were held up ahead of the last real general election. But there are larger in hopes that the underlying position may not deteriorate. The significantly from now onwards. The Bank Bulletin commented that, apart from the effects of the Budget, "the prospect for the rest of this year seems to be that retail prices will rise little, if anything, faster than in earlier

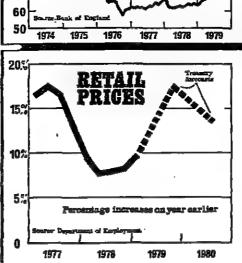

Only about half the deterioration can be accounted for by the and the other Budget measures which will add 4 percentage Part of the explanation is that the single figure rate of infiabination of especially favourable

market taken by foreign con-

sumer and capital goods has risen yet again, while the UK is losing its share of world

export markets after holding its own for most of the period

All this has occurred at

time when the benefits of North

Sea oil are making a blg impact—thanks both to rising

production and the higher oil

price. The oil deficit is run-

ning at half the level of last

year—a net improvement of

expectation is that a further

fall of the oil deficit plus some improvement of trade in other

exports and imports may result

in balance, or even a small

surplus, on current account in

the second half of this year.
As the Bank recognises, this

would be a "very poor" per-

debate about the impact of North Sea oil on the British

from 1974 to 1978.

the public sector. The Treasury's price forecasts assume that private sector earnings will rise at much the same rate as in the last year or two with rather larger increases in the public

The outlook for prices depends not only on the next pay round but also on whether lucal authorities and public cor-porations increase their rates and charges by more than expected in response to public spending cuts. In contrast, it is possible that a slowdown in the main world economies will result in a less buoyant level of non-oil commodity prices. There already are signs of this.

Tradefigures

In these circumstances the expected continuing strength of sterling could have a bigger impact in preventing any repetition been union calls for once and of the runaway inflation of 1974-for all pay rises to cover these 1975. But the risks have certainly increased in the last The Government has thus couple of months. Even on the learly taken a big risk ahead of Treasury's assumptions the 12the next pay round. But the ex- month rate retail price inflation is still expected to be 13} per cent in the late summer of next year when the price effects of the Budget no longer will affect the comparison. That is the gloomlest part of the forecasts. Even if the underlying rate of inflation does not accelerate, a lot of damage has already

companies.

Bolting it up

could have a significant effect in all, of the competitive advantage for British goods gained during 1976 has now been reversed according to the widely accepted yardstick of relative labour costs. This influences the level of export volume after a time lag, though the impact on imports may be more rapid.

The trade figures so far this vear have been distorted by the road haulage strike and the civil servants' industrial dispute. But the net impact may have been to understate the size of the deterioration. The official view is that there may have been a slight fall in the under-lying volume of exports. A deterioration of the competitive position is one obvious explanation, but in addition there has been a slowdown of the growth of British export markets. ...A. special factor was a fall of £100m a month of sales to Iran and Nigeria.

The big switch has been in imports. Volume so far this year has been 41 per cent second balf of 1878, even before allowing for under-recording caused by the civil service dispute. Some of this can be explained away by stockbuilding and historical services. ing and burchases associated with the pre-Budget consumer boom. You have to be an ultrapessimist to believe that a 41 per cent rise of the volume of car imports represents an underlying trend.

But after allowing for all But after allowing for all matched by a deterioration special factors it is clear that either of the non-oil current. the share of the domestic account or of the

capital account through an easing of exchange controls, or heavy official intervention. The

result is that the burden has fallen on the non-oil current account and on the UK manufacturing sector, partly through a rise of the exchange rate. The problem threatens to become more acute because of , the speed of the improvement of the oil account this year following the rise of crude prices. The UK's relatively favoured energy position has the attractions of investing in the UK. Moreover, UK interest gilt-edged stock to finance the continuing large public sector borrowing requirement and to

account. But the Government

has, until recently, not been prepared to court either a

deterioration of the private

led to a broader reappraisal of rates have to be kept at a high level in order to sell sufficient curb the growth of the money supply. Thus UK returns are attractive compared with those abroad. The result is that in the first three months of this on capital account of \$1.55bo and a sharp rise in sterling. Since the end of March the attractions of the UK have been even further highlighted, and an additional twist has recently been given by the weak-ness of the dollar.

This pressure led to renewed calis for liberalisation of exchange controls on outward capital investment since there was an obvious need, in the Bank's words, to "convert the benefits of North Sca pro-duction into durable form." The Government announced a first step towards relaxation in the Budget. The only reaponse so far has been, perversely, to boost confidence and sterling. There may, however, be substantial outflows when companies and individuals have had time to adjust to the changes. In any event, the scale of the relaxation so far is un likely to be sufficient to match the North Sea build-up. The alternative of significant inter vention to hold down the ex-change rates is likely to be ruled out since it might, as in 1977, undermine control over the domestic money supply as a

There could still be falls in In these circumstances the sterling as profits are faken on lying pressures are likely remain upwards unless there economy. Morgan Grenfell, the a dramatic change of blidy of merchant bankers, pointed out of relative interfet change of blidy of relative interfet change in the carlier this week that official benefits from North Spring are policy had turned a singular atill rising sharply. The consequence of the oil account has to be the consequence of the interference of the consequence of the consequence of the interference of the consequence of the interference of the consequence of the

But, there-The seemingly endless war of words between Sir James Gold-smith and Private Eye has become a familiar divertissement on the legal and journalistic scene. In the most recent libel action involving the Greek Street fortnightly. Sir James said it was loathsome and poisonous." So it may surprise him, and sundry other aggrieved members of the Establishment (such as Lord Goodman and Jeremy Thorpe, to name but two) that in some quarters the far different position, both inside Rhodesia and in the surrounding front-line states, could confront Britain. This is why it is so important that the magazine is considered to be a

lackey of Conservatism. According to News Line, the daily paper of Vanessa Red-grave's Workers' Revolutionary

t out, Private Eve is a rabidly anti-socialist" collection of smut written to entertain "every reactionary in the Tory Party, the City of London and the officers' mess."

Since this standard of invective makes Goldsmith's own efforts seem like a cup of cold Marmite, I utas him to look no further than News Line-when he starts; hiring leader-writers for his forthcoming weekly journal.

Vanishing trick

The battle by KCA International and Eurocanadian Shipholdings for influence over Furness Withy has been dour, to say the least. But for alert FW shareholders there was a wryly amusing element in the proceedings

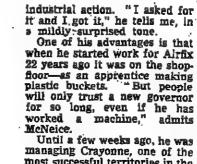

Frank Narby, chief executive of Eurocanadian Shipholdings, yesterday published an advertisement reproducing his open letter to FW shareholders. Three days earlier he had despatched this letter to the shareholders. But dibgent readers will have

discerned a fascinating difference between the two versions.

In the Original letter, Narby told shareholders whom he envisaged as the "ideal chairman" for Furness Withy. He named Keith Wickenden, 46-year-old chairman of European Ferries, whose group owns 5 per cent of FW's share. Wickenden is also Conservative MP for Dorking.

Wickenden has other ideas. On Friday he said he was "spitting blood"—strong language for a chartered accountant + at Narby's suggest that he was dissatisfied with the way furness Withy is currently being run. He added that he was tired of having his name thrown around without his knowledge.

So yesterday's advertisement, idertical to the letter in every other respect, has dropped out grave's Workers' Revolutionary the name of Wickenden. There temporary breathing space—the Party, the object of Gold- is merely the crytic statement 922-strong workforce has agreed smith's rage is a "Tory that "we have already indicated to a six-month moratorium on

managing Crayonne, one of the most successful territories in the Airfix empire. Any optimism he feels now is based on the renewed demand for quality toys—a demand which has put old sets of Mc 2no, and battered Dinky toys, into the window of antique shops. (New ranges of both products are about to be launched, and he thinks they have a built-in asset in their famous brand names.) The going is not, however, going to be easy: "When you analyse it," says McNeice good-humouredly, "there were seven managing directors before me who were all successful in their previous jobs. One of them previous jobs. One of them might have been an idiot. But they can't all have been idiots.

connected with Brighton and Hove Albion, and happen to be Pop power chairmen of cross channel ferry

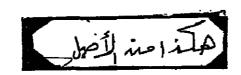

A colleague commuting to work last week from south of the Thames found himself in a carriage filled with German schoolchildren holding guide-books to London. As the train "Ray," says David Sinigaglia, Airfix Industries' new group managing director, "is going to be Meccano's last managing crossed the river there was a sudden tush to the windows, from which Battersea power director . . . I mean that in a positive sense." station was visible. The conversation was enthusiastic. Has the venerable power

station become a subject of architectural interest? My architectural interest? My perplexed colleague at last caught the drift of the conversation. The Battersea plant appears on the sleeve of a Pink Floyd long-playing album. (For information, although the group is now rather old hat here, it still makes the charts on the Continent.)

UNITED ARAB EMIRATES

A new balance, based on compromise between Abu Dhabi and Dubai, is needed urgently if the federation between the states is to evolve and the traditional system withstand future challenges. A central bank, more economic co-ordination and an immigration policy are needed too. Higher oil prices will have little impact on sluggish business conditions.

nion

hard Johns, : East Editor

INIQUE and strange entity, the United Smirates, has now the most critical point t uncertain but, on positive years during has established an if its own and its place gion. Under external ernal pressure the have been forced to ne structure and worktheir loose and dis-

on April 30 this year habi, gave a mandate form a new governshould be an expresnew order. But even go it remained to be

a framework better able to reconcile unity and diversity. It was with some misgivings and under pressure from more neighbours in the Gulf that the seven decided, in 1971, to join forces. They did so, basically, because union seemed the best way of ensuring the survival of their traditional regimes.

Ever since, the nature and evolution of the UAE has been such as to defy the question whether it is more of a con-federation or a federation. Over the years six of the Rulers, with rivalries rooted deep in history, have tried to preserve as much sovereignty as possible in the face of the extension of the Federal Government's authority and the corresponding influence of its paymaster Sheikh Zayed. the President of the UAE and the Ruler of Abu Dhabi—while also availing themselves of and appreciating the benefits of the

But the difficulties of creating a harmonious system have been such that the UAE is still governed by a provisional con-

Nevertheless, there has been a steady, though saiting, trend towards greater unification. The poorer Emirates have had little choice but to accept the growth of central authority. But disceikh Zayed, the tortions, contradictions and, of the UAE and Ruler over the past year or so almost tortions, contradictions and, complete stagnation in the Rashid, Ruler of UAE's evolution have been caused by the fact that Shaikh Rashid of Dubai has had the means through his own petroleum revenues, as well as the ther he could devise will and determination, to

mercial entrepot. He has not contributed to the common budget and objects to the way in which the union

has developed.

Two other important factors baulking what has been a trialand-error political experiment Supreme Council in March, have been Sharjah's traditional The fact that the high and the lack of loyalty of Sheikh Sagr of Ras al Khaimah to the federal concept. Optimistic of striking oil, he originally opted out of the UAE and joined only when his hopes were dis-

Just as in 1971 self-preservation was the main motive for union it is even more imperative for the Emirates to agree more specifically on what kind of union and relationship they want. The Rulers had no particular love of the Shah but his presence was a reassuring one. The UAE and its privileged citizenry, who cannot count much more than 200,000 out of a population of nearly 900,000, felt shaken by his overthrow.

The possible repercussions of the upheaval, especially in Oman, and the Marxist threst to the Gulf have put a greater premium than ever on effective unity. Achieving it is siso a matter of acute concern to Saudi Arabia and Kuwait whose Foreign Minister, Sheikh Sabah al Ahmed al Jaber al Sabah mediated to pave the way for Sheikh Rashid's mandate.

Articulate

Meanwhile, there have been growing pressures within the

maximise the freedom of action UAE from a politically articu- marches throughout the UAE of out of rational calculation for his free-wheeling com-mercial entrepot. late younger generation for greater unification. They were expressed - forcefully in memorandum prepared by the 40-member Federal National

> The fact that the highest authority in the UAE, grouping the seven Rulers, had not met for 18 months showed how aimlessly the federal ship had been

drifting. Submission of the document must be seen as one of the most important events in the UAE's short history, Significantly, for progressive "technocratic " ministers in the last Government are understood to have helped write it.

The most significant of its points. perhaps, were the demands for complete integra-tion of the Armed Forces and distribution of wealth, as well as accountability for it, and complaints about the lack of a permanent constitution and the last Government's failure to badly-needed legislation such as the draft statute aimed at establishing a Central Bank and a law on immigration.

Mr. Tayram Omran, the Sharjan who is Speaker of the FNC, and others have gone further by asking why there should be no direct elections. One suggestion of the UAE's "voung Turks" is that the Rulers should choose 100 candidates who should in turn

young federalists. Sheikh Rashid and Sheikh Sagr of Ras al Khaimah then accused the president of organising them.

response memorandum the Ruler of Dubai isued his own, accusing Sheikh Zayed of acting in an unconstitutional .manner. Subsequently, there were demon-strations in Ras al Khaimah gainst the way in which Sheikh Sagr runs his Emirte, where the civil servants had not been paid for weeks, and his hostile attitude to the federation. He was forced to recognise a 30man negotiating committee to

discuss the grievances. The Premier of the last Government was Sheikh Maktoum bin Rashid, son of the Ruler of Dubai. He did not assert his powers, which were ill-defined anyway, because of the divisions stultifying the federation, stullifying the federation, particularly those between Abu Dhabi and Dubai.

The president might appear to have taken a bold gamble in throwing the challenge to Sheikh Rashid. However, it is a logical way of seeking a radical solution to the problems of the federation in so far as it has been Dubai's lack of operation and differences with Abu Dhabi that have been the main cause of paralysis.

Meetings

Happily, personal relations between the two Rulers, who little more than 30 years ago led their rival forces in an The memorandum promoted Emirates, are excellent. It was

rather than despair that Sheikh Zayed asked Sheikh Rashid to

accept the mandate, Moreover, twice within a week at the end of May Sheikh Rashid had amicable meetings with Sheikh Sultan of Sharjah who has been positively supporting the Ruler of Dubai's efforts to the point that he accepts that two of his subjects in the last cabinet will not be in the next one-if and when it is formed.

But the June 3 deadline for the creation of a new Cabinet passed without an announcement of its formation and the meeting of the Supreme Council scheduled to give approval was postponed, despite the sense of urgency felt by federalists within the UAE and sympathisers outside it as the debilitating long summer season sets

The delay indicates that the Kuwaiti Foreign Minister did iess to break the deadluck than most observers had hopefully

Some cynics have suggested that Sheikh Rashid would like to let the whole issue drift because he has little selfinterest in strengthening the Federation apart from the general question of security. But there is little doubt of his sincerity, good faith and

His advisers say that he prepared to hand over half his petroleum revenue to UAE Government—with the proviso that it should be kept in the armed conflict between the two Dubai over which he would have

satisfied with its management, Sheikh Rashid would approve the establishment of a Central Bank and allow the foreign exchange earnings of Dubai to

be channelled through it. In addition, he has committed himself to the Dubar Defence Force being integrated properly into the UAE Armed Forces and giving the central government overall responsi-bility for his police force, with its air wing, and his departments of education, health, electricity, water and TV

Burden

Financially they have become an increasing burden to Sheikh Rashid who is primarily an entrepreneur. The cynics note that If his revenues had continued to run at last year's level he would have been a net gainer, but that with this year's increments he will be paying more than he will receive from common budget.

At the heart of the matter is the dispute over the nature of the Federal Government. Shelkh Zayed, who has funded it, wants it to be strong and centralised. More at ease hunting bustards with hawks and talking with his tribesmen in the Liwa Ossis, be has no inclination to administer or read balance sheets (even if he could understand them).

He has not been concerned about the creation of a fat, in-Ministry of Finance account in now numbering nearly 32,000, Dubal over which he would have mostly expatriate Arabs, whose rent payments, enrich Abu among themselves.

Similarly, as long as he is Dhabi's landlords and distribute

Sheikh Rashid wants not only to reduce the number on the civil service pay-roll, but also to stop wastage, delay and corruption so that more money is spent more effectively. Perhaps the most vital aspect of his approach to the problem would be to decentralise the Federal Government, giving more power to individual Emirates to supervise its administration in their own territory.

Sheikh Rashid objects to the central authority's inclination to impose bureaucratic restrictions on commerce and its notions about trying to control growth restraints on spending.

He and Sheikh Zayed must decide to what extent there should be representation of individual Emirates. There is also the question of the debts of Sharjah and Ras al Khaimah. The Ruler of Dubai would be against bailing them out from federal funds but might not object if Sheikh Znyed continued giving subventions to the other Emirates as he has to Sharjah to ease its plight.

In the medium-term, the great danger lies in the fact that any compromise acceptable to the leading figures of the UAE would not necessarily be welcomed by the young nationalists. because Sheikh Roshid's propossis would tend to strengthen local autonomy if implemented. With the rise of a voluble federal political consciousness

the mein threat to the dynastic Rulers is the backlash that could be created by bickering

Dh 500m lent by Currency Board in 1976-7. Much of Sharjah's other credit has been obtained against projects and its \$200m outstanding Euro-dollar loan is backed by Abu Dhabi.

Oman

Most vital of all if the UAE is to become a plausible and viable economic unit is the enactment of the draft legislation for the creation of a central bank and the willingness of the Emirates to channel through it their foreign exchange receipts. Without proper powers of credit control or necessary political banking it is something of a wonder that the Currency Board—dismissed contemptuously by bankers as "little money shop"—has been able to maintain any order in the world's most over-banked

system. starved of foreign exchange by Abu Dhabi as well as Dubai and Sharjah. The Currency Board has been able to fulfil its obliga-tion of covering with foreign exchange 70 per cent of the note issue and demand deposits—but little more. But as it complained impotently in its last report, its holdings "must be seen not only in terms of the legal cover requirement but also the level of imports and other foreign exchange requirements of the system arising from remittances, travel expenses, and the like."

the banks' foreign liabilities assets—an ironic phenomenon in a Federation that is classed

PLANNING

Conveying the message

BUILDING A country from telephones are also supplied project it requires five people scratch is a long affair but with remarkable speed the United But there are other problems inescapable circle of importing remarkable speed the United Arab Emirates (UAE) has completed a basic network of roads, telephones, ports, airports and the rest of the framework on which a modern society and its

economy rely. What might be called the 'social infrastructure" - hospitals, schools and housing-is being finished. Such institu-tional buildings are completed in quantity rather than quality, however, because of a serious bottleneck in developing human resources. The small indigenous population and absence of an immigration policy means that it is impossible to anticipate the fluctuations of demand for community services. Refusal by local Rulers properly to coordinate economic plans means communities can mushroom around a project site almost willy-nilly.

The problem is understood by the Ministry of Planning, which wants the country to accept a Five-year Development Plan starting in 1981. A strong promembers have agreed in priviciple to the idea and it is understood that this decision is not affered by whatever Sheikh Rashid as Prime Minister may decide.

It is a major achievement to have linked all but a few desert communities to a network of modern roads through-out the UAE. A villager in northern Fujairah can drive to an airport and be in London in the same time it used to take to drive half-way to the Emirate's capital. The embar-rassment of riches in ports and rassment of riches in ports and airports in no way detracts from the success of an excellent road grid. Only the villages of the Liwa Casis in southern Abu Dhabi are not connected by naved roads. They will be compared to the failure of naved roads. They will be compared to the failure of naved roads. They will be compared to the failure of naved roads. They will be compared to the failure of naved roads. They will be compared to the failure of naved roads. They will be compared to the failure of naved roads. They will be generated by the failure of the fa

But there are other problems that have to be urgently tackled. Some Emirates like Ajmsn lack a sewerage system. Sharjah has adequate electricity generating capacity but no proper local grid. Water pressures fluctuate wildiy. Ras al Khaimah, which boasts its own earth satellite station and has not joined Emirtel, the national phone company, has direct dial phones to Europe but not to the rest of the UAE. The UAE badly needs a centralised system for water supply and electricity but the distribution facilities in each Emirate would be unable to bear the strain if grids were

Nightmares

The Federal planners' night-mares are the giant industrial complexes like Abu Dhabi's Ruwais and Dubai's Jebel Ah which have been developed without reference to any co-ordinated strategy for the union as a whole. In one year Jebei Ali village has arisen from the desert like a Gulf version of posal for one was made to the Surbiton-by-the-sea. It is self-Cabinet and earlier this year contained, with swimming pools passed to the Supreme Council and shops, and its expatriate for consideration. Privately the industrialists have even created their own marina in the partly completed harbour. Its hard to know from one year to the next how many will be living where and needing what.

The massive building programme for hospitals, schools and housing is well underway though progress towards com-pletion has highlighted the population problem. Mr. Said al Chobash, Minister of Planning, explained: "How can we plan for education or health when the federal government doesn't

people to serve people who are building the economy of the State for a tiny minority of nationals.

No planning is possible until the UAE is politically cohesive enough to formulate a popula-tion policy. Two hundred thousand or so nationals will never be enough for the social economy that UAE wants to. construct. There is no popula- Council have apparently tion policy because of the lack accepted the idea in principle of political development in the Federation. This is the development bottleneck of 1979. A demand for a comprehensive demand for a comprehensive development strategy was one of the points of the joint memorandum of the federal national council and council of ministers in February 1979 which is discussed elsewhere in this survey in the political

context The Ministry of Planning under Mr. Ghobash may have come up against a brick wall because of the lack of political maturity but in his two-year tenure a planning vehicle has been built. He believes that the statistical and technical base which he has developed is ready for use whenever political conditions are right, with or balanced sectoral approach with without his continuation in

Asked what his Ministry had chiered, he replied: "The achieved, he replied: main objective was to push for a comprehensive five-year plan. Everything of the last two years has led to this. We have done all the preparation in field studies, sector studies and regional papers leading to the preparation of proposal submitted to the Supreme Council. From our side we did our job. We are ready to produce a plan even as

pleted in the not too distant every labourer imported into the each Emirate involved in planfuture. Water, electricity and U. for a building or factory ning and economic administra-

country where key posts tend to be given as a reward for eminence as a shelkh rather than for individual abilities. Only with such co-ordination does Mr. Ghobash believe there is any hope of meeting the development challenge which until now has been hampered by duplication of projects, petty rivalries and an obsession with

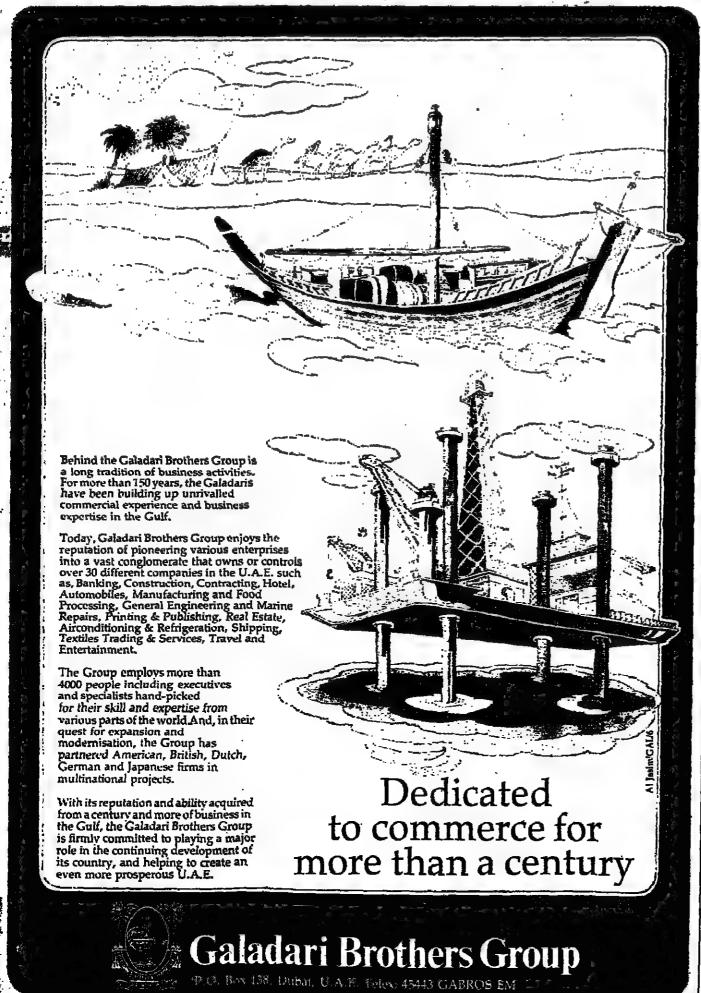

prestige.

Members of the Supreme Council apparently of a comprehensive planning strategy for the UAE. Whether they are aware as individuals of the economic, social and politi-cal dimensions is a most point. Planning leads directly to a dilution of Rulers' power. It means proper budgeting and accountability of how money is spent Acceptance of comprehensive planning could be interpreted as acceptance of the failure of the sheikhly system to meet the needs of the country.

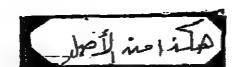

The planning strategy which Mr. Khobash has in mind is based on the premise that producing more oil can only be justified if it results in the creation of other renewable sources of income in the future. There are four elements in his think-ing. They are: adoption of a growth of productive and human resources, the provision of social services and development of infrastructure; investment in an economic structure which would be viable when the oil has been used up; avoidance of duplication; and diversification away from oil and petrochemicals to manufacturing in-dustries based on proper technical feasibility studies.

With these aims in mind the Five-Year Plan which the Ministry hopes it will be asked to compile for 1981-85 would diversify from oil dependence: develop capital-intensive and not labour-intensive industry. design education and training to meet the needs of the socioeconomic programme; encour age the private sector.

Michael Tings

Dubai's 'Industrial Revolution' points the way

It is no accident that Dubai is leading the way in a policy of alternative development to oil.

Dubai is well placed to do this since it was a thriving commercial centre long before the discovery of off-shore deposits. The home of prosperous merchants, Dubai alone, was able to surmount the decline and disappearance of the pearling industry when it was faced with Japanese cultured pearls in the thirties. The Dubai merchants, whether they were dealing in pearls or gold. were a thrusting community even at a much earlier date, respected right round the Gulf and as far afield

Oil, in any case, has not engulfed the economy as elsewhere in the Middle East. H.H. Sheikh Rashid Bin Saeed Al Maktoum, Deputy President and Prime Minister of the U.A.E. and Ruler of Dubai saw from the outset that oil would not last forever, and, as a constant preoccupation, has considered alternative routes for the economy. Keeping oil in the ground is one solution, but such static thinking has little appeal in Dubai. There were fresh generations to be considered with expectations far different from those that had obtained

in the past. The country needed a diversified, economic base and this, it was clear, would have to be created.

Dubai has traditionally looked to trade and to the sea. These, therefore had to be the point of departure for industrial expansion. First, there would have to be a deep water port of huge capacity, the relevant industries that could make as much use as possible of raw materials that existed locally or could be economically brought in. From these and other simple expedients, concepts of the industrial future began to arise. The great Jebel Ali project was born.

ut of the virgin sand—a year ahead of schedule

vital constituent of the whole plan, serves as an example. At Jebel Ali this is to be drawn from several sources, mostly offshore in the shape of natural gas. Broken down into liquid form at the gas liquefaction plant close to Jebel Ali Port, the gas becomes liquid Propane, Butane and Wild Petrol all to be re-exported as commercial products while the Methane fraction gases that are left will be passed on for are left will be passed on for use at the Jebel Ali Aluminium Smelter. In their turn they will provide energy for aluminium production and for the desalination plant that is an integral part of it.

So the chain continues; raw materials from near at hand being brought into the industrial mix and joining others from sources half across the world. What results is re-exported in the form of finshed products so that a complex web of commerce and industry is created with Jebel All at the perture.

The Nichigaku Maru unloading at Quay 10

Before, during and after oil.—Dubai

if is known to have existed as a fishing and pearling ity for hundreds of years. From the beginning graphical position seems to have worked to its e. We already see the shape of modern Dubai around the turn of the century when merchants Persian port of Linegh moved to Dubal to avoid its .oms duties. Others followed; attracted by the freedom nt and action enjoyed by the citizens of Dubai; as well ositive trading outlook of the Ruler. Dubai began to as the major commercial centre of the Gulf and became

ilshed part of the sea routes to India and the Far East. ii today, a place of glittering buildings and roads that id thrust through tunnels and over bridges nevertheless, rs the marks of its mercantile past; the graceful wind or example, adjuncts of a settled and prosperous comwhich made Dubai famous for shrewd and honest trading ore there was any thought of oil.

when oil did come, it was not in all-obliterating s. Even today. Dubai does not cisim to be more than the oil-exporting leagues of the Gulf. Viewed from terefore, oll has never been seen as such a huge bonanza. er to say that it has fitted into a thrifty and prudent ping as a welcome addition, but without changing that ping out of all recognition. -

if there had been no oil, it is perfectly possible that the E, now rising out of the desert at Jebel Ali (though in a modified form) would have arisen anyway.

The merchants and administrators of Dubai have always found the means to build a sound economy whether this was pearls, shipping or transactions with third parties involving merchandise that never even touched the shores of the Gull.

A Duhai banker, watching the first ships unloading at Jebel All was heard to remark: "We are looking at the future-and it works." In Dubai, the future—the inherent potential for the Sheikhdom, its people and the U.A.E. as a whole-underlies every commercial decision and government commitment.

The vision of Jebel Ali is the vision of an economy whose stread across industry, business and trade is withstand the fluctuations of world markets. Dubai sees no reason why it should be in the grip of vast, impersonal forces that can wither the future of a small country. This is why an analysis of the new undertakings in Dubai and Jebel Ali in particular, show industry being re-processed by further industry and re-emerging as commerce.

The billion dollar Aluminium Smelter at Jebel Ali provides a good example of this: Waste heat from the gas turbines will be taken up by a linked desalination plant and used, eventually to produce as much as 45 million gallons a day of water fit to drink!

Whether it is gas, concrete or water, the principle remains the same. It is the use of high technology to make what is in the ground, in the sea-in the very fabric of the mountains-work to produce commodities that will, in turn, produce trade.

This is complex yet simple-the Dubai style in thinking. working and living,

Getting it together

A Financial Consultant, asked to comment on the way undertakings like the Jebel Ali project get off the ground, described something he had seen from the window of his

hotel in the centre of Dubai. "The day I arrived, I noticed an open space. Not much more than a hole in the ground. Two weeks later, when I left, there was a building half com-pleted. They were up to the second floor.

By a mysterious intensity of

What would still be on the drawing board or merely in the mind somewhere else is already a concrete reality in It's like this at Jebel Ali.

From the moment that Sheikh Rashid planted his walking-Rashid planted his walking-stick firmly in the sand and said: "Build it here "things began to happen. The speed with which they happened is a matter of record. They were able to dock Britannia at Quay Ten during the Royal visit with construction well over a year ahead of schedule.

the mancing of Sebel All came first. Bearing in mind that Dubai, in common with the rest of the U.A.E. had been going through something of a recession following the four-fold rise in oil prices and, like the rest of the world, was nut of international investment in Dubai that the major financing

needed was accomplished smoothly and speedily. Morgan Grenfell, lead managers for the Eurodollar loan make a significant comment:

" It is a most rewarding fact that a country like Dubai which, until a few years 220. was borrowing in dribs and drabs, was able to be presented to the market as a borrower capable of taking a loss which,

even in these days, is sizeable by any standards." In fact, the financing of the Jebel Ali project is a combina-tion of external loans, and investment from the resources of Dubai itself. This reflects the same principles of thrift and control that characterise

Which comes first—industry or infrastructure?

Michael Tingay, writing on infrastructure in the U.A.E. in the Financial Times last year said: ". . . the surplus revenue Oil State is a new phenomenon in the world, and it is difficult to predict its future."

It would be idle to pretend that a country, where the foreign workforce greatly outnumbers the indigenous population, does not have infrastructure problems both physical and social.

Jehel Ali has to be seen as a

massive onslaught on such problems. Since, in a material

where nothing existed before, all must be accomplished at a single stroke. But the evidence of development complementary to Jebel Ali is plain to see. New roads have been built. Services in the shape of water supply; housing, communica-tions, parks, afforestation, shopping centres, etc., are springing up everywhere, and in Jebel Ali itself a whole new city is planned. All this is going forward in tandem with the building of plant and factories on the industrial sites

and at the deep water port.
In human terms, the chief need is for education and it

must be said that the administration in Dubai is obsessed Jebel Ali is not conceived in

terms of money and profit only-more important than these is its role in the futurethe future as it concerns the ordinary citizens of the

country.

To this end Dubai is planning for an almost totally urban population which will be educated to a standard as high as any in the Arab world. Dubai is not just traders, bankers and businessmen. There are the people of the desert and they are being encouraged to leave their traditional way of life which, though picturesque, is very basic, and to accept that they belong to a country in step with the twentieth century. Housing has been provided

and all the material means to develop a new life. Education, most important of all, is free, right through from junior grades to university and beyond. There is no reason why the child of nomadic parents should not, in one generation, become a key member of one of the many

Disc. reflector

at Jebel Ali carth station

Earth station Jebel Ali

The huge reflecting disc at the top of the hill that is the "Jebei" in Jebel Ali gives, at one glance, the clue to what is going on here. Cocked like a huge ear to its satellite partner thousands of miles out in space, it symbolises the

importance of communications in every part of the under-taking. Inaugurated in 1975, the earth station took the Emirates into the space age. decade ago more than a handful of calls a day. Now it's normal if there are three thousand!

For space age executives, a grass golf course in the desert

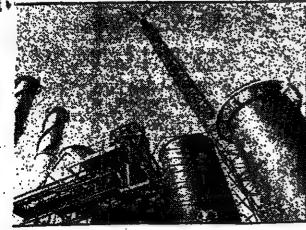

Very little at Jebel Ali has been left unconsidered. From the start is was decided that there should be an hotel, as part of the industrial complex, that would provide luxury living and an opportunity for busy executives to relax on an unprecedented scale. This is the Hotel Jobel Ail. Now nearing completion, it will have a range of facilities that, in a single botel, may well be unmatched anywhere in the world. Among major attractions there will be a golf course with real grass—the one and only in Arabia. Three swimming pools linked but divided, will include a children's pool, one for adults, and a high dive pool. And when you are tired of these you can leave them for the pellucid, turquoise blue

There is to be a yacht marina with shore arrangements that would look good in Cannes or Monte Carlo, and a list of acquatic activities which enthusiasts would find hard to fault.

Businessmen, whether they like it or not, have time to fill between meetings and appointments. The Jebel Ali Hotel is dedicated to this "filling" as pleasurably—and

The world as oyster

Aluminium Smelter, Jebel Ali

If you look closely at what is happening in Dubai the term Middle East" can be seen in a new and exciting context. Dubai is truly in the middle the middle of a world where eastern workforces interconnect with western investment, where raw materials from, say Australia, are fed into a chain of production that uses the expertise of five nations and the machinery of

An Aluminium smelter, for example, could be established almost anywhere, regardless of climatic conditions, topography, population or any of a hundred variables, provided certain vital conditions are satisfied. Briefly, these amount to: energy, supply of raw materials, an effective workforce, means to export the finished product, business confidence producing investment, favourable commercial climate where tariffs, etc., do not constitute an obstacle, technical expertise and stable conditions in general. Dubai, sitting at the crossroads of the world, fulfills all these demands

The business planners of Dubai have taken the world of instant communications and interlocking economies as it exists and-there is no better way of expressing it-made that world their ovster!

A brand of leadership the business world accepts-

of the single-minded concen-tration on the task in hand at Jebel Ali has started from

above. Sheikh Rashid is not a lover of committees, making decisions in a plain and practical way as they are necced. Mention his name at Jebel Ali and you will be left in no doubt that, whatever else it may be, this kind of management is popular with the men

on the spot. Sheikh Rashid takes

detailed interest in most of what goes on. He himself com-missioned the building of a slipway with ultra modern lifting gear, not far from the centre of Dubai. This is some-thing much maded in the Guif thing much needed in the Gulf which is crowded with small-tonnage shipping. The slipway brings virtual automation to shiprepair and hull inspection -tasks performed up to now by old fashioned and laborious methods, the potential savings in time and money for ship owners are great and they have

responded by filling the slip-way from the word go.

Sheikh Rashid makes no secret of his pleasure at the success of the venture, and because it has fulfilled so

marked a need.

As with most of his policies. the Ruler's concept of the Dubai-Jebel Ali package is clear-cut. Government regula-tions are minimal and the economy is free, not in name, but in fact. The businessman. the investor and the property owner is actually helped by the state, not strangled by taxes. All is geared to profit-uble accomplishment — for management and workers alike. lt is a unique and inviting prospect stretching into the next century. But is there, perhaps, a tinge of regret for

perhaps, a tinge of regret for a way of life that is irretrievably past."

A young Dubai graduate comments on this briskly, quoting with considerable aptness: "The past is a foreign country. They do things differently there."

Flag day in Dubai

the foreign nationals in Dubai were to pick to display the flags of espective countries, a about international cowould be nearly trated.

The planners and Overall, ultimate supervision and responsibility for the vast undertaking is firmly with Dubal. And it is all managed in a simple, unspectacular way. The offices where decisions entrepreneurs of Dubni are too involved with the task in hand

to bother about external trap-pings. It is a style that works its way through to foreigners as well. Office doors are open, conversations are brisk and to the point. This harmony that underlines all undertakings big or small, seems to be taken for

HOTEL JEBEL ALI ** FORT HATTA HOTEL

Two new hotels are being built in different parts of the state of Dubai; the five-star Jebel Ali and the Fort Hatta; a hotel so unusual that it defies normal

Although they have been planned, and may be used quite independently of one another, the Jebel Ali and the Fort Hatta will actually provide an integrated experience that is unique.

Jebel Ali is by the sea and the Fort Hatta is in the mountains. Jebel Ali is dedicated to the international executive who has to space out his time between appointments and meetings. The Fort Hatta complements its sister hotel by providing a haven of absolute peace amid remote and

thrilling scenery. The Jebel Ali Hotel will have a real grass golf course (the one and only in all Arabia), a yacht marina, a three-pool complex and a list of aquatic and other activities that challenge comparison with any hotel in the world.

Apart from its swimming pool, beautifully appointed apartments and superb food, the Fort Hatta duplicates the Jebel Ali in very little. Bedouin feasts in authentic surroundings, champagne and caviare as part of a weekend package—these are just a few of the attractions that are projected. The Fort Hatta will join the effortlessly sophisticated with the simple and traditional, and it will do it in a way that is as real as the grass at Jebel Ali! Both hotels are designed to set new standards in international Hotel service and luxury.

DEFENCE

Legions galore

men per head of population than any other State in the world. If the U.S. matched its armed forces in respect of population it would have 22m soldiers and

14m police and security men. .
One important function of the armed services is their socioeconomic role as a modernising institution for training, employment and the building of the State. But the military is also viewed as a force which should be "pointed" enough to hold out long enough to cry for help. Internally the defence and security forces are supposed to maintain tight domestic control to obviate any possible excuse for foreign intervention.

The State machine, however, is incapable of addressing itself to the most serious questions on defence, security and stability. The hardest questions include: differences between Western and UAE national interests and the distinction recently drawn int he U.S. between Middle East states and their rulers; the influence of external events on internal security; the role of the

military as a force for change. To serve its resident popula-tion of less than 900.000 of whom probably less than quarter are nationals, the UAE has 30,000 men in the army, navy and air force and 20,000 in the police and security departments. This disproportionately high figure can only be partly explained by the existence of a military force in Dubai which only now has agreed to integrate its armed It is believed that Sheikh Rashid's conditions for Dubai's military integration may at one time have included: cutting back on Abu Dhabi's 22,000 strong force; paring the overall strength of the armed forces; rationalising the 28 different nationalities in the services; cutting down the proportion of Omanis.

Unique

The existence of so many nationalities in the army of an ethnically homogeneous country is unique. Such heterogeneity inevitably creates questions inevitably creates questions about ultimate loyalties. However, 70 per cent of the officers are now "local," including commander and director. term "local" includes Omanis who used to supply 80 per cent of manpower, though and it seems possible that officials claim a successful Dubai will now permit the recruiting drive in the Northern genuine unification of the forces. Emirates in the past two years The state claims six brigades which has pushed the figure under a central command now down to 40 per cent. Contract that Dubdi is relinquishing its and loan officers come from role as an independent compakistan, Jordan, Egypt and mand. THE UNITED Arab Emirates distinguished in the Armed Crotales for air defence) and an has at its disposal more armed Forces, though not all of them artillery corps. The armoured men per head of population than are military: law and order, brigade has French Panhard transportation; medical; cultural; defensive. The law-andorder role is very real in a tanks country which has only recently France. been connected by modern roads and where until recently the strongest individual ruled in central authority. Regular army outposts ensure minimum force service ferrying men and equipment to the scores of chi fighters originating in islands which Abu Dhabi is Dubai's police air wing and repopulating. This massive task has been going on for the last nine years. Helicopters and military ambulances still provide a fall-back administration to handle any accidents or to handle any accidents of incidents such as snake bites in remote areas.

The cultural function important since the Army is the single institution for discipline, training and bringing the ordinary people into the modern era. This has been an important factor throughout the Arab world, and the statebuilding function is no different in UAE.

The defensive job of the army is to stop a hypothetical invader for long enough for the news to emerge. This should permit UAE's allies to help. National security is seen as part of Gulf security, strategy breaks down because it on unco-ordinated depends neighbouring armies without combined intelligence. How-ever, this "hold out" function is all that can be expected, and the authorities are delighted the military experience with gained by the troops who served in the Arab Deterrent Force in Lebanon. The UAE placed 1,000 men in Beirut for three years, rotating from all brigades except Dubai, which did not participate. They lost seven dead and 15 wounded.

The UAE acknowledges no enemies and realistically regards conventional land attack as unlikely. However, the rulers (with the possible exception of Sheikh Rashid of Dubai) believe that the forces should be well enough trained and equipped to act as a deterrent both to regular mili-tary and guerrilla attack. The unification of the armed forces agreed in 1976 has not taken place except on paper. However, there have been efforts to rotate troops to different areas.

The state claims six brigades Dhabi's mechanised infantry brigade, an armoured brigade (including Rapier ground-to-air missiles and a battery of French

International funds, banks and

Two new elements affect this year's payments: first, UAE's contribution to the Baghdad Fund. Set up last

development organisations. Last year, Abu Dhabi, which contributes nine tenths of UAE's aid and loans, gave, lent

APCs and has received one-third of the 70 or more AMX 30 light tanks it has ordered from

Dubai's force consists of one armoured regiment, one infantry battalion and one rather weak remote areas with no regard for artillery regiment. The air force minimum Mirage 3 interceptors, one squadstandards of authority. Transportation refers to the vital air ground attack and support and Dubai's seven Italian Aeromac-

The air force is well trained—60 per cent of the pilots are "local" — and will keep its present equipment for 10 years. The navy is weak considering the length of coastline, the amount of illegal immigration, and the vulnerability to sabotage of the off-shore oil rigs. The hard nose of the navy is six Vosper type fast patrol boats armed with 70mm guns and Exocet missiles. Six bigger Lurssen patrol boats from West Germany are on order, but the navy remains feeble compared to the land forces.

Capability against insurgency, sabotage and guerrilla attack is vital to prevent foreign inter-vention. The three areas of vulnerability internally are: offshore sabotage, land guerrilias and urban terror. Despite high-quality divers and consciousness of possible sabotage to oil rigs, the navy is simply too small to adequately project its marine interests. The country's coast-line has traditionally offered quiet landing spots for all manner of activities. The army believes its capacities against guerrillas in desert warfare are better than those of any allied foreign army unfamiliar with

the terrain. The UAE authorities do not see why they should be a target for attack, but they do recognise that the vulnerability of the say that although the Straits are head of Iran's revolutional shallow they could no more be blocked by a single such as tribunal, visited the blocked by a single such as tribunal, visited the blocked by a single such as tribunal, visited the blocked by a single such as tribunal, visited the blocked by a single such as tribunal, visited the blocked by a single such as tribunal, visited the blocked by a single such as tribunal, visited the blocked by a single such as tribunal, visited the blocked by a single such as tribunal, visited the blocked by a single such as tribunal tanker than, say, the English abroad by a truly power; Channel The greatest danger Iranian, he addressed Irania Channel. Nearly all the associated gas from the on-shore fields is now being flared. Of the 680m c.f.d. produced in 1978 only 80m c.f.d. portion going to power gas combustion turbines for oil production purposes. (Field pressures are maintained by the injection of 1.2m b/d of highly saline water from acquifiers above the oil reservoirs.)

Finally, however, after many years of abortive negotiations, premature to say years of abortive negotiations, the discovery will be the project for the gathering ay similar to Qatar's and exploitation of the whole me that may possibly of the hitherto wasted output is under way and scheduled for

Lower petroleum production than anticipated by ADNOC's purchasers of the output in foreign partners from the off-shore Umm Shaif field and technical difficulties with distribution have meant that ADMA-OPCO, the main marine operating group, has been unable to deliver the full amount required by ADGLC from the existing gas gathering system that was designed but has falled to satisfy its production capacity. Mean-while, some 200m. c.f.d. of gas from the Zakum field is still being flared. Rising oil prices and shortages

of crude now make the prospects for Gasco, as the on-shore gathering system with its related facilities for the production of liquid petroleum gas and natural gas liquids is called, look far more promising than two years ago when all the Abu Dhabi National Off Company's partners in the oil operation backed out of the scheme that had been the subject of many years of study and discussion. Last July, however, ADNOC formed and took a 68 per cent share in Abu Dhabi Gas Industries (ADGIL) with Shell (15 per cent), Compagnie Francaise des Petroles (15 per

Ruwais, process the associated for future recovery. gas output from the on-shore fields and to transport, market and export the products. The life of the company is for 30 years.

The cost of the project is now set at \$1.6bn. a marked ago. One reason for the reluctance of ADNOC's fellow Shareholders to join the venture related to the financing of it. As it is, \$1.2bn of the capital required is being lent by the Abu Dhabi Investment Authority at the rate of 2.26 per cent interest in two stages. \$800m this year and \$400m in 1980, with repayment over 10 years from 1982. The rest of the finance is being put up by the partners in proportion to their shareholdings. ADNOC has begun seeking out potential

Designed

Scheduled for completion in 1981, the project is designed to process as much as 850m c.f.d. of gas daily from the Bu Hasa, Bab and Asab fields. This should produce from the wet, rich content about 5m tonnes (500,000 barrels a day) of natural gas liquids (NGL) divided about 60 per cent liquid petroleum gas (LPG) and 40 per cent condensates (natural gasoline). After separation at plants at each field, the gas liquids will be piped to a fractionalisation

and storage facilities are to be Some of the dry, lean gas will be piped to Abu Dhabi to injected into the fields, particu- under long-term contract. larly Bab. which has a high content of wet, rich gas. reason ADNOC is planning to

condensates would go to the

plant at Ruweis, where loading

Implementation of the project is structurally complex. Under Shell's supervision Bechtel is undertaking the design and construction of the fractionalisation plant and Saipem the shipping terminal was utilised. Most of it for electricity generation and water being talked about four years responsibility for the contracts c.f.d. its capacity is designed to desalination with a small proago. One reason for the won by the Bechtel for the Bu produce 2.3m tons of LNG and Hasa gas extraction plant, the gathering systems and compres-sion trains and Fluor for those on the Asab Ban Field,

ADNOC is in charge of Crest Engineering which is constructing the 355m kilometres of pipeline involved in the complex. A second company formed between ADNOC (60 per cent) and the French company Entrepose (40 per cent) is looking after the building and maintenance of the pipeline and related facilities including pumps, compressors, field injection equipment, gas separation installations, and storage

Since techniques of LPG extraction and transport are better developed and simpler than those for the production of liquefied natural gas, the hope is that Gasco. as well as being more profitable, will not suffer the same difficulties experienced by the Abu Dhabi Gas Liquefaction Company.

Owned 51 per cent by ADNOC, 164 per cent by British Petroleum, 84 per cent by CFP, 22.1 by Mitsui, and 2.8 by the Bridgestone Liquefied Gas Company, ADGLC's plant on Das Island was the first to be built in the Gulf and also involves the longest transport haul for the product in the world - to Japan, where the supplement existing fuel sup- Tokyo Electric Power Company plies. and repair it. Before the pro-cess could begin, ADGLC had quarter of 1°78, the last for to build a full-scale model of which figures are available, was the tank and the nitrogen plant. 358,902 tons of LNG, about

63 per cent of rated capacity, expanded the scope of its but only 112,548 tons of LPG, or a mere 35 per cent of design potential. Total sales for the the variety of projects. A year were slightly in excess of fraction less than Dh1bn of

The discrepancy between LNG and LPG is accounted for by the fact that LNG can be produced states of Africa were allocated from the off-take from the Umm Shaif gas cap but the plant has been short of the more heavy and wet gases directly associated with oil production. There has been a considerable shortfall not only as a result of the troubles with the distribution system but also because of the ceiling placed by ADNOC on output from the UMM Shaif field.

The plant was built on the assumption that the rate would assumption that the rate would per cent. This does not reflect be 500,000 b/d rather than the any alteration of policy but is maximum of 250,000 b/d currently allowed. To increase the supply a supplementary gasgathering scheme is being implemented by Stone and Webster at a cost of \$300m that will harness about 200m efd of gas from the Zakum field now being flared, which will be routed between the Umm Shaif separation facilities.

The programme also involves injection of dry, clean gas into that field's gas cap and con-nection with the low-pressure Upper Zakum field that will have little surplus available, however, after its own reinjection and power needs have been taken care of.

By 1981 when the project is other development organisations completed Abu Dhabi should to provide both cross-fertilisa-have achieved something like tion of expertise and joint 100 per cent of its associated natural gas.

Banking in the Middle East

Where can you make the right connection for your Gulf business?

At Union Bank of the Middle East.

A local bank with international expertise.

We were founded in March 1977, but although we are new, we are big our capital is one of the largest in the Arab world.

We can offer a complete range of banking services on an international scale. Foreign trade finance (in which we are a leading bank in Dubai), project finance, foreign exchange, personal domestic banking and advice on joint ventures in the U.A.E. are all within our scope.

In our short history our total assets as at 31st December 1978 have grown to Dh 2.022 billion (US \$527 million) and we have participated in and co-managed a number of Eurobond issues and syndicated credits.

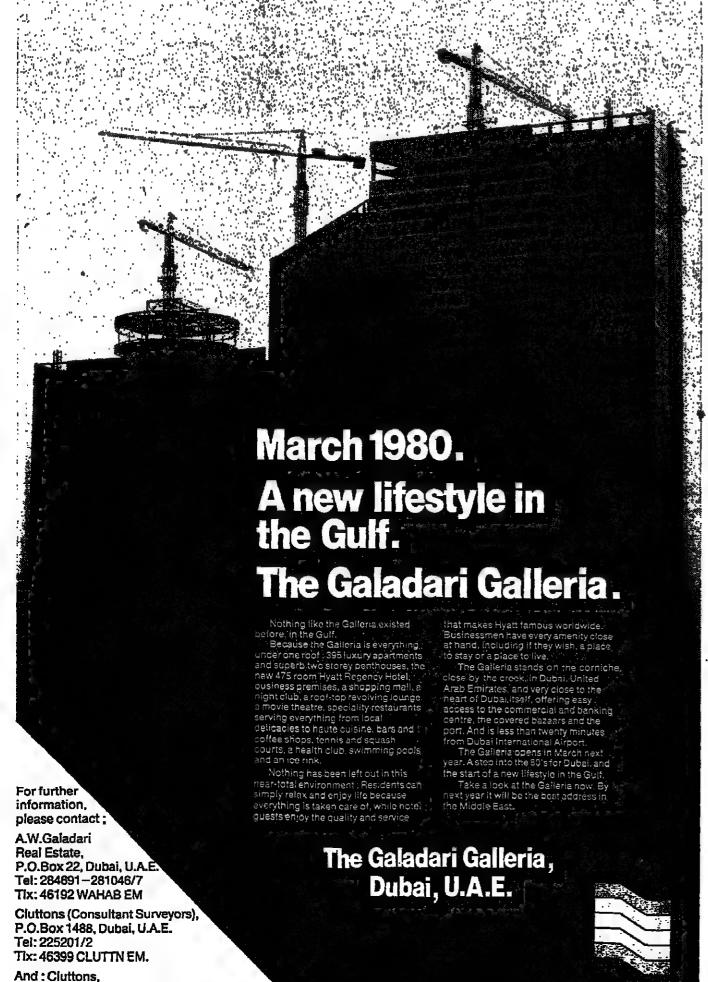

The combination of our base in Dubai, now one of the major commercial and service centres in the Gulf, and our totally Arab ownership, gives us an international outlook based on a wholly Middle Eastern concept.

In today's financial world, few can afford to ignore the

Few can help there better than us.

The United Arab Emirates is as anxious as any other to maximise ultimate recovery. However, the Federation—or to be more precise Abu Dhabi—is in the happy position of being able to contemplate a marked increase in its capacity over the next few years and the reasonable prospect of new dis-coveries. It is a different ques-tion, of course—to which the answer will depend on many imponderables (both political and economic)—how fast output will be allowed to rise. Yet in relation to its population and development potential the UAE is exceptionally well blessed.

As a producer the UAE last year ranked sixth within OPEC ranks, with an output of 1.85m barrels a day. The level was down by 8.5 per cent compared with 1977, with the decline being explained by the enforcement of lower maximum off-take ceiling set by Abu Dhabi rather than the slack market conditions in the first three-quarters of the year. Despite a 13 per cent fall in its overall output to 1.44m b/d the state, neverthe-less accounted for 80 per cent of the UAE total.

In contrast Dubai, for which the only consideration restricting output is "proper field management," and maximising the island of Abu Muss, fell from 28,000 b/d to 22,100 b/d. While Abu Dhabi's prepon-

derance as producer and the union, as well as a source of jealously and dissension, it has not been sufficient to lay the basis for a federal petroleum policy—rather the con- and investment. trary, as the less fortunate and impoverished emirates have waited in hope for hydrocarbon riches of their own. Although oil affairs were excluded from the prerogatives of the central department based in Abu Dhabi was duly established in 1972 to deal with

Mystery

As yet, however, the federal role of Dr. Mana al Otaiba, Minister of Oil, has consisted of little more than representing the UAE in OPEC—whose revenue gains have been enjoyed by Dubai and Sharjah. The actual financial arrangements governing the Dubai Petroleum Company probably remain as big a mystery to him as to everyone else, except for Sheikh Rashid, Mr. Mahdi Tajir, one or two other close advisers and the oil companies concerned.

Within OPEC Abu Dhabl tended to follow the leadership of Saudi Arabia well before the traumatic price split in the first half of 1977 when it joined the kingdom in sticking to a price rise of only 5 per cent in oppo-sition to the 10 per cent set by other members. Abu Dhabi's part in the progressive escalation this year should not be considered a divergence from the basic alignment with Saudi Arabia. Together with Qatar it set the ball rolling in February when it raised the rates for its light, relatively sulphur-free light crudes—a measure justi-fied in terms of premium differentials which the State has in the past adjusted up or down according to market conditions for its 39 degree Murban variety from the onshore fields and its 37 degree Umm Shalf and 40 degree Zakum crudes from the main offshore fields

While Saudi Arabia limited itself for the second quarter to years. the price originally set by OPEC for the last quarter of 1979. Abu Dhabi joined other producers in building the \$1.20 surcharge into its rates in addition. In May it made another. In the current climate Saudi-Arabia - which subsequently raised the price of its lightest crude to bring it into some kind of conformity with comparable Gulf varieties—could hardly have restrained Abu Dhabi even if it wanted to. At the OPEC conference starting tomorrow (June 26) Abu Dhabi can be years. expected to back Saudi efforts to rationalise the OPEC struc-ture. With Murban at \$17.90, Zakum at \$17.91 and Umm Shaif at \$17.68 Abu Dhabi's official development. selling prices on May 20 were 35-36 per cent above the rate at the end of 1978.

different path from other Gulf achieved producers in stopping short of fields withtaking over full ownership of mata

tise and also that they would bear their full share of the considerable investment re-quired for both development and exploration.

At the same time the Abu Dr. Hamra-Krouha put it. Dhabi National Oil Company, With the fulfilment under its Algerian management team led by the redoubtable Mr. Mahmoud Hamra Krouha, has proved itself as competent. tough and ambitious as any state petroleum agency. There have been arguments over the extent of the programmes required to maintain the reservoir pressures of fields still in production and a reluctance by the partners to contemplate expenditure on the scale demanded by ADNOC for schemes that go to the fullest extent of ensuring ultimate recovery. ADNOC policy is well in line with the principles declared in the decree on the conservation of hydrocarbon resources issued last July by the Ruler, Sheikh

Squeeze

The companies are anxious to retain privileged access to a part of Abu Dhabl's production and in addition have been able to obtain additional quantities of ADNOC's share of production (about 150,000 b/d) at the official Government selling price. It is now marketing its management," and maximising full entitlement and the old revenue is an incentive "buy back" provisions have recorded a welcome increase of long ceased to apply. However, 13 per cent from 319,000 b/d the companies have found them-in 1977 to 382,000 b/d last year. selves financially squeezed even The miniscule production of to the point of a negative cash. Sharjah, which anyway only flow. This is despite a notional receives 35 per cent of the margin between the tax paid revenue from the field offshore cost (a rate of 85 per cent of posted price after payment of a 20 per cent royalty) that is larger than the fees and disallowed by other host countries imbalance of oil resources to former concessionaires within the UAE has been a operating now as service comcrucial factor in the holding panies. ADNOC pays tax to the together and developing the Abu Dhabi Government at a union, as well as a source of rate of 55 per cent and transjealously and dissension, it fers to the Abu Dhabi Investment Authority its profits after financing its share of operations

> . The new relationship with the Petroleum, Compagnie Fran-calse des Pètroles, Shell, the Exxon-Mobil partnership Near East Development Corporation (each with 9) per cent) and Partex (2 per cent). Under it the Abu Dhabi Company for Onshore Operations (ADCO) was incorporated to run the onshore operations on behalf of the shareholders. Its role is strictly a functional one. Policy, planning, finance and budgeting agement committee grouping

all the shareholders. In February this year a similar agreement was concluded with the former Abu Dhabi Marine Areas group, now named Abu Dhabi Marine Areas Operating Company (ADMA-OPCO), in which the non-state equity share is divided among BP (143 per cent), CFP (133 per cent) and the Japan Oil Development Company (12 per cent). Under separate arrange-ments CFP is providing ADMA-OPCO with the technology and expertise for geology, explora-tion, drilling, transportation and loading facilities. ADNOC's dispute with its

partners centred on the Bab field, depletion rates from it and the injection programme needed to sustain a higher level. Having imposed a limit of 50,000 b/d, ADNOC exacted the assent of its partners to drilling double the number of wells and water injection facilities that they believed to be necessary. The development should open the way for a rise in production to 150,000 b/d and perhaps eventually 250,000 b/d. Planned investment for ADCO's other onshore fields is about \$300m annually over the next few

The partners' assessment of the onshore fields' total capacity was 1.3m b/d, but with its much more cautious view of Bu Hasa (compared with the other shareholders' rating of 690,000 b/d), 325,000 b/d for Bab (320,000 b/d), 50,000 b/d for Bab (50,000 b/d) and 25,000 b/d for Sahil (25,000 b/d). The aim is to maintein oilfield maintenance ADNOC tion. In May it made another has set maximum allowable of Development Company, leaving upward adjustment of 80 cents 850,000 b/d-450,000 b/d for 12 per cent for the Japanese Oil in response to Iran's initiative. Bu Hasa (compared with the Development Company which b/d for Sahil (25,000 b/d). The Bunduq Company, which is Last year a new concession aim is to maintain a plateau of equally owned by United Petro-agreement involving exploraaim is to maintain a plateau of production at these rates (with the exception of the anticipated increase for Bab) for 20-25 field straddling the Abu Dhabi- of Indiana in respect of terri-In addition, however, the Shah field should be tied in to the system at a rate of ADNOC ordered a three-month 50,000 b/d in 1981 on the com- halt to operations because of a

ADNOC's foreign share-holders in ADMA-OPCO bave also maintained that : higher Abu Dhabi, however, took a levels of production could be

main contentious issue has been over the Lower Zakum, which they believe could run at some 300,000 b/d compared with the current maximum allowable of 200,000 b/d. ADNOC has insisted on a costly development programme on a scale that they believe to be unnecessary. But at a meeting early in May "they accepted our point of view," as

With the fulfilment ADNOC's reservoir engineering requirements, the objective is a maximum allowable 320,000 b/d for Lower Zakum by the end of next year. The rate for Umm Shaif has been set at 200,000 b/d, compared with the 200,000 b/d, compared with the 500,000 b/d once envisaged for the field by ADMA, and ADNOC considers the optimum to be 250,000 b/d. The balance of output comes from the small part of the Upper Zakum structure that is presently being exploited and which will eventually be handed over to the group developing the whole field. ADMA-OPCO's budget for the current year is \$500m, about field. ADMA-OPCU's budget for the current year is \$500m, about 40 per cent for operations and 60 per cent capital spending. Production costs per barrel are still under one dollar despite the relatively large investment required compared with ADCO's fields.

With worldwide commitments in mind both BP and CFP declined to join in the full development of the Upper Zakum field, although they still have an option to join in the massive project which could add eventually another 1-12m b/d to Abu Dhabi's capacity. Reserves are estimated at 48bn barrels, of which 16m b/d are reckoned to be recoverable, according to Dr. Jawwad al Sheikh, deputy general manager of the Zakum Development Company. The nature of the structure, with its low gas pressure and the need for extensive water injection from the outset, puts it on a par with the North Sea in terms of dollars committed for each barrel to be produced daily. As it is, ADNOC has only one equity partner in the venture, the Japanese Oil Development Company, which has 12 per cent of the equity.

The current provisional cost estimate is for \$2.75n building up a capacity of 500,000 b/d by 1983 with output beginning in main operating groups have now August 1981 and rising progressively thereafter. CFP is acting ADNOC signed, an agreement—running to the year 2024—apart from the fee for its serimplementing the original 1974 vices, will have the right to buy duced, at market price, for a seven-year period. ZADCO, the concern undertaking the colossal development, is a joint venture between ADNOC and CFP. Apart from the water injection Upper Zakum will require a very complex pipeline system, master-minded by R. J. Brown and Associates of Switzerland, which will centre on Zirku island where there will be three offshore terminals for which are dealt with by a joint man- Foster Wheeler has the management contract.

The rest of Abu Dhabi's capacity in production or in prospect is offshore areas relinquished by the main marine. operating group — marginal fields in which the Government declined to stake its own money but has varied fiscal terms. The wholly Japanese-owned Abu Dhabi Oil Company started ship-ments from the Nubarraz field in 1973 and is producing at a modest 20,000 b/d on which it pays 55 per cent tax and a 12.5 per cent royalty. It has recently been awarded additional acre-

Partners

The Abu al Bakhoosh field, which came on stream in 1974 and is now running at 65-70,000 b/d, is operated by CFP, the other partners being Nepco Eastern (24.5 per cent), Amerada Hess (12.5 per cent) and Summingdale Oils (12.25 per cent). Their fiscal arrangements are the same as the partners in the two main operating groups. Exports from the field discovered by the Amerada Hess group in 1974 under a concession lasting until 2005 are ex-

pected to start from Arzanah island this summer and to reach 40,000 b/d by the end of 1980. ADNOC has elected to take 88 per cent of the Umm Addalkh

leum Development of Japan, BP and CFP. It exploits the offshore Qatar median line under a tory onshore to the west of the revenue-sharing plan. Last year pletion of the first phase of its sharp rise in the gas-oil ratio. The shareholders were asked to implement a secondary recovery programme but asked in return have been negotiating the sale ponderance as an oil power. of their shares to UPD, which is rom- believed to have provided 90 per

Dubai presents a much more

modest, less exciting and simple —though in some vital respects obscure-picture. It has one exploiting two offshore fields run by one of the world's stranger conglomerates, although the actual operator is Continental Oil. Leaving aside names of locally registered affiliates and corporations; ownership is shared by Continental 30 per cent, CFP 25 per cent, Hispanoil 25 per cent, Texaco 10 per cent, Sun Oil 5 per cent and Wintershall AG 5 per cent. Four years ago Sheikh Rashid announced a takeover of its assets in DPC which started producing in 1970 and payment of \$110m compensation but announced without elaboration that the companies would go on running the producing operations "bearing all the costs and expenses involved."

Financial terms remain closely guarded secret, although it is understood that the current posted price for the fields' 32 degree oil is \$18.37 and the official selling price \$17.08, though the significance of the former and the relationship be-tween the two remain unclear. The customers' lifting entitle-ments are in proportion to their shareholdings.

Having reached 319,000 b/d in 1978, output rose to 362,000 b/d last year through a happy combination of factors. The percentage of lost production rime was cut back, the rate of drilling for flood water and gas lifts was greater than anticipated, improved techniques were intro-duced and the natural decline in reservoir pressures was less than anticipated. Output has continued at the same level so far in 1979, when it was expected to reach its peak. It now seems that DPC will be able to continue at its optimum rate for another year or so, after which it will progressively de-cline. The latest available information indicates that this will not happen until perhaps as late as 1987.

Importance

Helping to arrest the downward curve will be a modest flow of some 15,000 b/d from two small structures, Rashid and Fallah, which should be linked with DPC's unique submerged storage tanks some time next year. For Dubai their main importance is that they are rich in gas. A new exploratory drilling programme based on up-dated seismic data is to begin later this year, but without any particular optimism.

Continental gave up Dubai's onshore concession after drilling three dry wells. Just over a year ago South Eastern Drilling Company and Houston Oil and Minerals were awarded concessions covering over 1m acres on shore and nearly 500,000 offshore relinquished in 1976 by Texas Pacific Oil. The new conessionaire has so far drilled one

This year Sharjah's production from the Mubarak field off Abu Musa Island has slumped to a level of 16,500 b/d a level of 13-17,000 b/d. The decline raises the question whether, even with soaring oil prices, the operation is commercial for the shareholders of Crescent Petroleum—Buttes Oil and Gas (25.7 per cent), Getty Oil (25 per cent), Kerr McGhee (12.5 per cent), City Services (10 per cent) and Juniper Petroleum (1 per cent). The arbitration late last year over Sharbhy demand for a relation to the contraction of the jah's demand for a substantial retroactive increase in tax and royalty rates can only have squeezed them harder. settlement was a rise in the royalty rate from 12.5 per cent to 14.5 per cent and the tax rate from 55 per cent to 65.65 per cent backdated to mid-1977, with a further rise for the latter from the start of 1979.

The current post price for Mubarak 39 degree crude \$19.28 and the official selling

price is \$17.93.
Under the compromise reached following the dispute with Umm al Qiwain over rights over the structure originally discovered by Occidental and the seizure of Abu Musa in 1971, by Iran, revenue was divided with it and Sharjah was forced to give 30 per cent of the other half to the neighbouring Emirate. On the brighter side for Sharjah there are still rumours of the existence of a significant gas field under the territorial waters of the island.

Justifiably, Abu Dhabi is go-ing ahead with a vast capital-intensive gas-gathering scheme. the development of an NGL plant and the construction of an export-oriented refinery that will maximise the return from souk in Al Ain has the exploration of its declining itly demolished but hydrocarbon assets. The issue sert town, the real now is how much further to go power of the Al in diversifying into other forms lynasty until the dis-of economic activity that could il, it is possible to possibly destroy the social fabric of the Emirate and even its established order.

> The only proper cansus of the Emirates was taken in 1968 -when such an exercise was far more manageable than it would be now by the old Trurial States Development Council. It produced a figure of 22,260 native Abu Dhabians. Even with a birth rate of 4 per cent annually the natural increase would have brought the population of native origin to only about 35,000.

Citizenship

Abu Dhabi has been relatively generous in giving citizenship to other expatriate Arabs, particularly those servchamber) in a one- ing in the Armed Forces. But, the total number of nationals now could be only in the region of 50,000 compared with a total population of no less than

If expatriates were dis-counted, then the per capita GNP or income of Abu Dhabi's privileged citizenry would be about \$100,000. In practice, not only is the distribution uneven but about a quarter of the Emirate's wealth is disbursed as aid; a considerable amount ay, the Moslem day tants of the Federation and ack at the Al Ain not least — a proportion is European and saved and remitted by foreign

> operating profits — that the ADNOC automatically transfers to it. In addition to the rela-tively small sum that the department handed over to the Abu Dhabi Investment Authority (ADIA), ADNOC would probably have transferred Dh3bn-Dhibn to the ADIA.

> In 1977 Abu Dhabi would still have earned a surplus of \$1bn to add to the accumulated assets managed by the ADIA that currently total about \$9bn and this year should produce an income of not less than \$1bn-or \$20,000 for each citizen of Abu Dhabi-to be ploughed

Most of the money is invested abroad but last year \$1.2bn was lent to Abu Dhabi Gas Industries, the joint venture for the gathering and exploiting of onshore gas currently being flared, in which ADNOC has a 68 per cent share.

The apparent anomaly of ADNOC reverting to the invest-ment authority for funds, which in effect the State oil entity had previously passed on to it, would be accounted for by the reluctance and difficulty of the partners in raising finance else-where. The loan, however, is at commercial rates of interest.

Also included in the portfolio ularly in relation to of the State investment agency diversification and are the \$500m worth of place-raphic balance of ments made by the UAE defaulted on.

of funds that will be a source of future income. The assets at aerial at its top that will exceed our disposal are Abu Dhabi's in height, if not dwarf, the future pension fund." As with Dubai Trade Centre. Kuwait, the objective is a balance between growth and stable income in which the holdings of bonds and equities

are "inextricably linked."
He describes the ADIA as a conservative institution that is sensitive about its image." The behalf by Morgan Guaranty. Mr. Mazrul says that the proportion of total funds in property is very small, adding that U.S. legislation makes such investment

According to other sources, there has been a significant shift over the past year from private to open market placements. About 70 per cent of assets are in bonds and equities at present. The ADIA is said to have achieved a very good cur-rency spread and to have reduced its dollar holdings to as little as 40 per cent last year. It now has more than two dozen portfolios managed by institutions in the U.S., Britain, France, West Germany, Switzerland and Japan. Robert Flemings remains the leading British one, still running a long-established Japanese portfolio that has shown considerable appreciation.

ADIA's merchant banking arm is the Abu Dhabi Investment Company in which it has a 70 per cent share, with the balance being held by the National Bank of Abu Dhabi ever, still found-itself, with a surplus, believed to bave been. by far the most active among gas-gathering scheme and the revenue — 55 per cent of its operating profits — that the state of the cent ager for 14 loans of which \$2.66 bn was attributable to it.

It was fourth in the league Eurobond lead managers with eight issues worth \$107.4m but first as a co-manager with \$776.6m of issues attributed to

Surplus

According to Mr. Mazrul, only a small part of the State's surplus has been involved in these operations. At the same time, however, the National Bank of Abu Dhabi, with which the bulk of the Govern-ment's cash balances are was in the top 10 in each of the management categories last year.

Abu Dhabi is already very much a rentier State and since 1977 has become a force in the world's financial markets. It has also gone far in establishing basic infrastructure and services, though they will not be complete until 1983 or 1984 when there will be need for replacement and renovation. In this year's Dh 6.7hn development budget the concentration is on completing existing projects, most notably Abu Dhabi's international airport, the harbour extension and three botels—a sector in which the Emirate has avoided the gross over-capacity now existing in Dubai and Sharjah. But the moratorium on starting new ones has not been wholly observed.

In 1979 no less than about half of appropriations is for the construction of roads. A number of tenders are out for new ones and also sewerage schemes

fairly be described as a city Like ADNOC, the investment authority presents one of the modern faces of Abu Dhabi. Mr. Municipality and Chamber of Ghanem al Mazrui, Secretary-General of ADIA, says: "We have the same philosophy as Kuwait. We start from the premise that we are taking care of funds that will be a source 150-foot telecommunications." 150-foot

Such expenditure, however, is paling into significance in com-parison with the money being committed to oil and gas-related projects. Earlier this year Dr. Mana al Otaiba, Minister of Oil said that expenditure on the industrial development of its one and only large, wellpublicised acquisition was the
Commercial Union huilding in

Development is proceeding in an ad hoc, somewhat incoherent, manner. The Three-Year 1977-78 Plan has remained only a guide line for certain sectors. It never made any real sense because of the lack of co-ordination be-tween the Planning Department and ADNOC, which is respon-sible for the industrialisation and the infrastructure at the Ruwais complex. Nor was it ever approved because of the lack of any policy or consensus about immigration.

Output

The plan envisaged the population of the Emirate rising to 475,000-500,000 by the end of this year, not the least through a totally unrealistic — in both practical and political terms — doubling of industrial output in each of the three years.

At Ruwais, contracts worth an estimated \$3bn — to which ADNOC is committed — are under implementation. Much of lead manager for ten loans Saipem, which is scheduled for worth \$1.77bn and as co-man-completion next year.

Work is continuing on the infrastructure of the industrial areas as a whole with the main concentration on roads, the up grading of the airport and the general cargo wharf. Expenditure on it this year is expected to run at about \$150m, not including the 1,000-unit housing scheme. But the dimensions of the new city for which a design contract was given last year has not been decided as the reappraisal of the scope of the development goes on.

The fertiliser plant which the French concern Creusot-Loire was given the design contract is still in suspense, though the project will probably go-ahead because of good market prospects. For the time being petrochemicals are not being seriously considered. And there are now evidently viability of the joint-venture iron and steel plant that ADNOC has been discussing with Indian interests because of the lack of locally available Hamra-Krouha, for one, dismisses the project as "crazy.

Confusion over Ruwais and planning generally seem to reflect the contrast between the old and new epitomised by the juxtaposition of old Sheikh Shakhbut in bis majlis and the ADNOC management seminar in Al Am. Abu Dhabi has perhaps developed more rapidly than any other State in history. While the future course of the Federation as a whole remains undecided, Abu Dhabi itself is drifting and in need of a sense

It's your best chance to see what's new in furniture from Britain and from 16 other countries.

It's open from 13th-18th November at the National Exhibition Centre, Birmingham, England.

The 1979 International Furniture Show will be the largest furniture show ever held in Britain with over 47,000 square metres of display stands. It's the show you can't afford to miss.

So make a note in your diary now and see the furniture that people are going to be buying next year, this year.

HOURS OF OPENING

Tuesday 13th 09.30–18.30 Trade trib. Wednesday 14th 09.30-18.30 Trade only. Thursday 15th 09.30–18.30 Trade units. . 16th 09.30-20.30 Trade and Public Friday Saturday 17th 09.30-20.30 Trible and Public. 18th 09.30-20.30 Trade and Fublic.

DUBAI

Problems of scale

two years been the locus of most concern and attention on the part of the international finanare perhaps basically ones of -how much of its revenue should it spend on what?

Dubai's economy has always been more dynamic than that of its fellow members, with a prosperity predating the production of oil. Although its petro-leum revenues started to flow seven years after Abu Dhabi's and on a much smaller scale, it took the plunge into industrialisation much earlier. While Abu Dhabi's planners are still doodling on the drawing boards Dubat' major projects are com-pleted or well under implementation—leading to searching

Sheikh Rashid bin Said al Marioum has always been temous for his commercial acumen, and for building such projects as the massive Danas port when all the foreign experts advised against development on such a scare. The expects were wrong, and Rashid Today when economists point nugers at such projects as mis giant ship repair yard and the od-oerth purt under construction at Jevel All, un that time when Sheiki rashid's economic pullosopnies were always one jump ahead of everyone else s. Nevertheless, maily people, including Dubayans, are now questioning the viability of a number of current projects. Some even have the temerity to say that the Ruler may have miscarculated this time.

Dubai is after all working on smatter time scale than its richer neighbour; which is still continuing to find and exploit overies. The decume in Dubai's oil production is already being alked of as starting in 1981. anhough it now seems that the naturai decline is not as large as anticipated eartier, Improvement in techniques mean that its current production of about 360,000 barreis a day (b/d) can be maintained for the next year or so and it is conceivable that it may go higher.

meanwhile, an extensive seismic survey has been com-pleted and an exploratory drilling programme is due to begin in the last quarter of this year. ane new Faiah and Rashid heids are expected to come on stream some time in 1981, by which time combined production is expected to be around the 15,000 b/d mark. However, the hunt for gas as well as oil is now on in Dubai so that future energy supplies to the Emirate's inquistry are guaranteed. Hopes are centring around the Rasaid neld as regards gas. The Sedcu-MOUSION OIL BLOUD IS 8'80 AUGELtaking onshore uriting. There are also hopes of natural gas structures in the deep Khuti zone, of which the potential has

Kevenues

The steady increase in production and fising oil prices has meant a steady upward trend in revenues for Dubai over the past few years. Last year oil income would have een about 41.2bn. With the December price increases deciared by OPEC, unis was expected to go up to between \$1.3bn-\$1.4on. But the recent hikes of the past few months may mean that income will go to around the \$1.7bn mark or even more depending on the resurts of this week's meeting of the bil producers in Geneva. ine increases could not be more

A great deal of talk has gone on in the past year about the extent of indebtedness of Rashid. The Ruler already has an overseas debt of about \$250. With the issue of the loan for the aluminium smelter and gas company, his liabilities are expected to increase to \$2.67bn. Sheikh kashid will have to pay out between \$500m-\$600m this year in servicing his existing debts. However, with rising oil income, his debt servicing ratio will go down from its former estimated level of 35 per cent of total oil Local and foreign bankers are in fact taking a very attitude towards Sheikh's Rashid's financial position

The great imponderable at this moment concerns the financial arrangements which will be worked out in connecwith the Federal Budget. Rashid has already plet sed that he is willing to barel over 50 per cent of income · to Government. In re-experience a soft market for the

OF ALL the member States of questions about their visibility turn he would be willing also next five years or so, and in on with Oman for some months the United Arab Emirates (UAE), Dubai has over the past the Emirate. The remainder, the past the Emirate. really pays for himself. Among ments are currently being rethese are the police, the army, negotiated. Nevertheless, Dubal the health service and, most important, the electricity and water supply. If, however, he hands over the equivalent of haif his oil income this year, Sneikn Rashid will not be a net gamer-for his local expendi-

tures will be less than 50 per cent of his oil revenues excluding, of course, his expen-ditures on major industrial projects. Last year, Sheikh Rashid was believed to have spent about \$526m on Jebel All and the Dubai Trade Centre. The most onerous of Dubai Government's local expenditures is the electricity company which is currently running at a tech-

nical deficit of the equivalent of \$124m. Last year Dubai spent \$134m on electricity and \$17m on subsidies. However, expenditures should have been \$289m and a local bank currently bears an overdraft of 3238m for the Dobai Electricity Company. Discussions have already taken place about the take-over of the electricity installations Government but the former administration expressed reluctance to absorb such massive and expensive facilities.

But the hand-over will be complicated by the fact that a share of the company is owned by Saudis and Kuwaitis, who will have to be compensated. Furthermore, part of the electricity and water installations are being used to supply Jebel Ali projects which will not be within the scope of the Federal Government.

Because all these arrangements are still under negotiation Dubai's fiscal position is difficult to assess at present. But international bankers are taking an optimistic view of it. Sheikh Rashid's resort to the market has been well received in

The loan, for \$670m in total, is made up of three parts. The syndicated Eurodollar slice of it, is presently being marketed at the lowest rate above Libor that Sheikh Rashid has ever been able to secure in 15 years of borrowing on the inter-national market. It is believed to be about the 1 per cent or just over mark and is a massive vote of confidence in Dubal, the Gulf region as a whole and the Emirate's ambitious industrial

It was also a gesture of faith in Dubei Aluminium's project itself, the Emirate's most coutroversial to date. The project now carries a price tag of \$1.3bn, though 51 per cent of this is being spent on necessary infrastructure such as a desalination plant which will produce 25m gallons of water a day, of which only 400,000 gallons will be used by the smelter. The rest will be used to supplement the Dubai town supply. All of this money has now been raised by int nationally syndicated loans.

The Dubai plant has a design capacity of 135,000 tonnes a year of aluminium and its offtake has already been almost completely sold to Nissho Iwai of Japan, the Southwire Corporation of Georgia and Alcan UK, the latter being partial shareholders in the venture, which is 80 per cent owned by the Dubai Ruler. When the proiect was conceived the price aluminium was assessed for profitability at 60 cents a pound, but the current price of aluminium is now around 73 cents. and may rise even further because of declining world capacity. A number of Japanese plants have been closed down and older installations in the U.S. are also closing, because energy supply to the plants will become a greater and greater problem. Alumins, the raw problem. material for the metal, is, on the the other hand, expected

To us it's home.

C.A.T. has been a Middle East company for 36 years. It gives us an enormous advantage over construction companies not so familiar with this vital area.

The same is true in Nigeria, where we've been in business now for over 20 years.

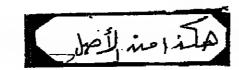

We've had more time to get to know the local terrain. We've had more time, too, to build up an enviable track record for punctual completion of turnkey and other projects.

A wide technical capability plus unrivalled local knowhow-it's a winning combination.

say local consultants, but until osperity has been a then the situation is uncertain; its neighbour. Its Electricity in summers such as tiny compared with the UAE experiences is the States, and under mainstay of life, and a shortage of it can lead to an exodus of residents, as Sharjah found out only two summers ago when

there were many power cuts.

The provision of power and water is a major burden on all 1, which was made Emirates, and Sharjah, like a m's seizure of Abu number of other northern may be terminated. States, is hoping that with the establishment of a new Federal Government the authorities will take over and operate the service. Over the past four years the Emirate has spent around we up the island. \$400m in the provision of elecin the Mubarak tricity, a large part of which has ling from an output been financed by banks and figure 22,100 barrels a foreign credits. Local officials present level of are hoping that with the take
or ports over both by been but and sharper but a presumably this kind of commercial pressure will come to an end.

Kathleen Bishtawi

Sharjah also has a number of loans from foreign banks in the form of syndicated Eurodollar loans. There has been one for \$200m from BAII which was guaranteed by Abu Dhabi, and another two for \$50m and \$36m from the Anthony Gibbs mer-chant bank and Citicorp respec-

lot of property lying around in bank portfolios, there are hopes that many of these will be passed on the projected Real Estate Bank, Meanwhile lettings are picking up slightly, if only because Sharjah is often half the price of nearby Dubal, " It's as cheap as Leeds," as one banker put it, "and much more pleasant." At night Sharjah blossoms through numerous cabarets, discos and supper clubs as the hotels attempt to make for empty bedrooms through lucrative food and drink

Just now Sharjah hotels are experiencing a mini-boom from the uncertainty bred by the drinking laws recently applied in Dubai. Hotel prices are also coming down, discounts being freely quoted and there is talk of some offering rooms at Dh100 night. But occupancy rates still hover around no more than 30 per cent, and with hotels still under construction such as the massive Intercontinental, the competition will get even

One point that is frequently overlooked about the property market in Sharjah is that many of the buildings are not owned by local merchants. Under its freer land ownership laws which were in force some time ago, Sharjah attracted a lot of foreign Arab and Gulf investment, as well as interest from the merchants in Abu Dhabi. Most of the emptiest hotels are in fact owned by non-Sharjans.

Landmark

One of the most successful property developments in the Emirate is the Shariah souk. Built by the Cypriot contractor J and P, the souk is a landmark in the Emirate, and one of the in the Emirate, and one of the particularly hampered by the this situation is that the electricity department has no backowned project due to come on stream in the next few months

all majority-owned by members the Italian company, GIE.

Millions of pounds worth of electrical equipment, particularly on the distribution side.

Millions of pounds worth of Proposed rents are between Dh 40 to 60 per square foot, and the banks are hopping to earn the banks a around Dh 800,000 a year from each building. Prospects for filling these Dh 10m blocks do not look immediately good, however, and the repayment schedule is now being stretched from its original eight years to 15. One of the successes in Shar-

One of the successes in Sharjah is its port, which in its second year of operation is already handling just over 1m tonnes a year. The first few months of this year were given a considerable fillip by Iran cargo, and Sharjah, which actively chased the business, handled around 350,000 ionnes handled around 350,000 tonnes of this, more than Dubai. Special rates and tariffs were offered to promote this windfall. But the future looks grimly competitive. Not only have UAE ports been hit by overto the collapse of a major ship-ping customer of the Sharjah Container Terminal, operator of Mina Khaled's purpose-built container facility.

A number of the principal backers of Mediainer Line, as the company was known, are also involved in the terminal operating company. This over-lap has led to questions being The property market is still raised about future operations, the second largest absorber of bank credit after the Government. Although there is still a lot of property lying around it. of yet another port in the UAE, Jebel Ali in Dubal, will neces-sitate a combined marketing

effort, Jebel Ali opened for business earlier this month and issued as its opening shot a proposed tariff which is around 25 per cent cheaper on certain charges than other ports in the country. The Sharjah container terminal has made similar inducements to its customers and the Shariah Port Authority is also about to review its rates.

The port authority empha-sises, however, that it is not about to get involved in a rate war. "We simply cannot afford it," said an official. There have been some attempts to create a co-ordination committee to involve all ports in the UAE so that this possibility can be

Sharjah Emirate also had its second port opened this yearthe Khor Fakkan facility on its east coast. It has 430 metres of quay and is equipped with third-generation gantry cranes from Mitsubishi.

The operators of the port Marine Transport International which is 54 per cent owned by the Saudi group of Ali Reza with the remainder held by Manchester Liners, has yet to sign up one regular caller for the port. Since this Dh 140m container facility February, Khor Fakkan has handled 12 vessels and about 1,900 containers. A shipping service to Bombay is shortly to begin, operated by a 300 TEU

Another newly opened facility in Sharjah is its airport. This has in fact been operating for the last two years and passenger ban on Indian livestock which was imposed following a cholera scare, and the volume has gone down 22 per cent on last year to 6.477 tonnes.

Sharjah airport has for some time hoped to become the chesp airport for the Gulf—chesp, that is, for both airlines and passengers. There have been several attempts to get a cheap Gulf Europe service off the ground, and the latest move is being mounted by Air Intergulf and a local travel agency, with a run

to Ostend. However, the service and the airport generally is under pressure from several quarters. Gulf Air, which poses as the national carrier for the UAE (even though the only shareholder is the Abu Dhabi Government) is likely to try to stop such a service from beginning. Sharjah also suffers from unspoken pressure from Dhabi, which has in the past made it clear to airlines that if they use Sharjah, they cannot use Dubai.

But the airport has just signed up yet another carrier this month, Iraqi Airways, and three more regional carriers are due to begin services shortly. With the rapproachement between Dubai and Sharjah,

Who tries hardest in the United Arab Emirates?

In the UAE and throughout most of the Arab World you'll find Avis is the only major car rental company.

And in many locations you'll also find that Avis offer a special chauffeur-drive service.

But above all else, you'll find our personal service second to none.

After all, we have established a reputation for "Trying Harder" over the years.

And that's something we intend to maintain. Telephone Avis UK Central Reservations,

01-848 8733 or your nearest Avis office for self-drive or chauffeurdrive reservations in Abu Dhabi, Dubai and Fujeirah.

Indeed, a number of local mer-

chants are already receiving

As for general trading con- the Ghurair Centre, Diera developments do not look

mark. Prospects for this year are considerably higher with imports running at about DH 1.3bn a month. But in the years to come Dubai's commercial attractions will be severely tested if it is to maintain its premier trading position within the UAE in the face of increased activity in Abu Dhabi. Dubai has no equivalent of Ruwais, and its merchants have found it difficult to gain a share of the action generated by the massive projects of the Abu Dhabi National Oil Company.

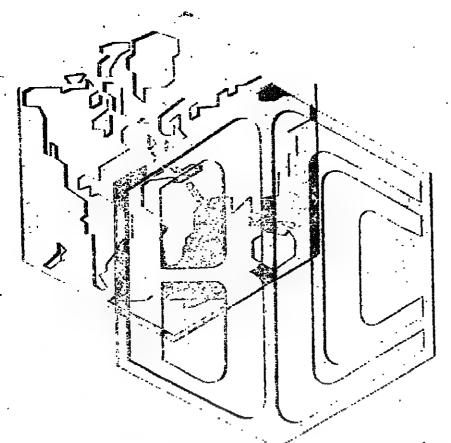

The recent change in the alcohol laws will not help the Emirate's reputation for liberalism and welcoming foreigners, even though Dubai has merely fallen in with laws prevailing in other states. The completion of many of its projects has meant that hundreds of foreign families have already left. Dubai will have to work hard to replace them in future.

RAS AL KHAIMAH

Still hoping to find

OF ALL the seven Rulers of UAE Currency Board. Some is keeping companies alive being able to procure money and the findings will have been the United Arab Emirates, three years ago, when the Board through this gloomy period. Few from the capital. Sheikh Sagr bin Mohammed al sistently independent minded of, them all. His Emirate of Ras Al at the time Sheikh Saqr be-lieved that oil discoveries would pave the way to independence. The Ruler is still hoping for oil and his enthusiasm for the union has over the past eight years always been lukewarm. coloured by the suspicion that Abu Dhabi was attempting to extend its influence through the auspices of the federal Govern-ment, which it financed.

But the political events of the last three months have obliged Sheikh Sagr and other obliged Sheikh Sagr and other rulers to put their rhetorical support for the union into practical effect. As the people of the UAE blend increasingly together, crossing tribal and family ties, so they are asking their ruling sheikhs to do the same. The uncertainty bere by the Iranian events has only hastened the pace towards real unity and pressured the rulers to end their bickerings. Ras al Khaimah and its ruler will thus be obliged to go along with these sentiments, not least because of one factor—the Emirate is heavily in debt. If it were not for Abu Dhabi and the belief held by bankers that the capital would bail the Emirate out, Ras at Khaimah would have been dangerously close to bankruptcy long ago.

For more than eight years, Sheikh Saqr has been convinced that his Emirate would be blessed with oil. He has even managed to convince internability, and a number of loans have been extended to the Emirate with this thought in mind, plus the certainty that Abu Dhabi would not, in the end, let the state default, which would reflect on the UAE generally. But, offshore ex-pioration has yet to yield any commercial discoveries, and at one stage the Ruler was having to seek international finance to pay for the exploration programmes himself.

would continue. The Emirate's expatriates have also left. Bank his attitude towards the federal mountain range of Jebel el Ruus troubles did in fact start with managers in the Emirate say a withdrawal of aid from the the majority of their business already has a reputation for to be finished by next month,

quarters of that amount nad to bail out rulers who had costs have to be written off. In embarked on ambitious projects short, many UAE bankers proof questionable viability. fess to be mystified as to how of questionable viability.

Neither was the capital going
to help out rulers who paid
little more than lip service to the union.

Debts

The effect on Ras al Khaimah was dramatic, for the cut-off in funds from the capital pro-strated all economic activity in the Emirate. The halt was vis-ible to all — the Interconti-nental Hotel stopped construction, question marks hung over the port project which was under way, and the debts to local contractors began to mount up. At the same time, the ruler had also sought a number of loans from outside Lazards and other banks put up \$20m to pay for oil exploration and the lime kiln factory. The cement company, which is majority owned by the local Emirate government also financed its £40m expansion tional bankers of the possi- plan with the help of Kuwait and international sources. As with other Emirates, it is not clear whether these investments have been made in the name of Sheikh Sagr or in the name of the Ras al Khaimah government, for as yet, the two are indivisible. Local officials maintain it is government invest-ment, but the point is signifi-cant when considering possible sources of income for the Emirate.

grammes himself.

Today, Ras al Khalmah's debt can be estimated at around experienced in recent months \$500m. Local government has not happened in Ras al officials lay much of the blame for the debts on the federal Emirate's merchants have left for the debts on the federal Emirate's merchants have left openly discussing the possibility of the Crown Prince taking over, of projects were begun on the presumption that federal aid would continue. The Emirate's expatriates have also left. Bank troubles did in fest that the state openly discussing the possibility of the Crown Prince taking over, in the hope that the younger son would be more flexible in his attitude towards the federal

was under different manage- are able to even hazard a guess ment, an estimated Dh 1.1bn on the possible sources of was loaned to Ras al Khaimah, under conditions which the Board's present management budgets are ever published. in arriving in the federation, for now believe were "inadequately What is known is that the last at the time Sheikh Saqr beappraised." Nearly three-assistance the Emirate received from Abu Dhabi came last December when \$100m was paid well under way, when the bank squeeze came in mid-1977, and the monthly payments from the Board abruptly ended. Since then, the supply of funds from the capital has been a political to the capital has been a po carrot, for Abu Dhabi made it plain to all that it was not going the initial capital investments fess to be mystified as to how Ras al Khaimah earns any note-

worthy income at all. The worsening of the economic problems came at a time when the Ruler took a stance alongthe Ruler took a stance along-side Dubai to protest what it saw as Abu Dhabi pressure, following the publication of the joint memorandum of the federal Cabinet and the National Assembly. Like Dubai, it saw the memorandum as a threat to the very foundation of the state, and subsequently decided to stay away from the Supreme Council meeting which had been called to discuss it. Ras al Khaimah interpreted the demonstrations which took place in the capital as svidence of the pressure which was being to finance industrial projects, applied on the northern rulers

to toe the line.
His absence from the meeting stimulated demonstrations in Sheikh Saqr's own Emirate. Some 200 people, say officials, gathered noisily outside his palace toting placards and slogans calling for "real" unity in the country. They were also carrying portraits of Sheikh Zayed of Abu Dhabi, and more ominously of Sheikh Khalid, the Ruler's son. A committee of 30 citizens also called on the Ruler to ask for a greater say in the economic running of the Emirate and for his acceptance of the sentiments expressed in the joint memorandum. It was a difficult moment for Sheikh Sagr who has been a ruling Shelkh of his people for more than 30 years. Another factor was that his army is paid from the federal Government. Many Ras al Khaimah citizens were

in the face of this challenge from local people, and though there are reports of continued arguments and negotiations about the future style of leadership of Sheikh Sagr within it, the possibility of Sheikh Khalid being forced even unwillingly to the fore has faded. The committee of 30 citizens is holding off until the outcome of the new federal Government is settled.

Ally

Ras al Khaimah has taken great hope from the fact that its ally, Dubai, now holds the post of Prime Minister and controls the federal Government. With an ally at the helm in the form of Speikh Rashid, Ras al Khaimah can be expected to show greater co-operation with the union than hitherto. Indeed, is looking to Dubai Ruler to help alleviate the economic problems of the Emirate. Government officials point out that well over Dh 1bn has been spent on the provision of water and electricity, and Sheikh Sagr had already expressed his willingness to hand these facilities over to the former administration. However the previous federal Government expressed reluc-tance to take over the plants, pointing out that it wished to absorb only plants which had a chance of profitability—almost an impossibility in the UAE. With Sheikh Rashid in power now, it is likely that the federalisation of the water and electri-city in Ras al Khaimah will be speeded up, and although the ruler was originally asking for compensation, he is now willing to hand them over without this, so as to relieve the local government of what was proving a

heavy burden. The ruler is also hoping that some other projects may be "federalised." They include the £6.5m earth station which was built, the hospital which lies 50 per cent finished, having run out of funds, and the water supply provision.

In the meantime, the hunt for oil continues. Offshore, the search by the former Ras al Khaimah group has been abandoned. Last April, however, Delta Exploration, a subcontractor to Gulf Oil, began a seismic survey of an area stretching from five miles offshore to the

commercial viability have yet been found, Ras al Khaimah has made excellent use of the natural resources it does have. Its aggregate is the finest in the Gulf and has been used extensively in the Jubail projects in Saudi Arabia. Last year the Ras al Khaimah Rock Company exported some 3.6m tons of erushed aggregate, and with Jubail now complete and a depressed market in the Emirates, the company is now eyeing the Bahrain causeway project with interest.
Another well-established in-

dustry in Ras al Khaimah is the Union Cement company, which is owned by the Emirate government and Abu Dhabi, and managed by the Norwegian company, Norcem. The plant has now undergone a doubling. of capacity to 1m ions a year.
Ras al Khaimah is to gain yet another coment plant with the start of construction of the Gulf Cement Company, which is owned by a number of UAF. nationals and Kuwaitis. The plant is being built on a turnkey basis by Ube Industry of Japan, which also has a five year management contract for the plant's operation. Finance for the plant, which is projected to cost \$131m, has been arranged by the industrial banks of Kuwait and Japan. Production capacity is 1m tons, and like the Union Cement Company, the plant will be producing sulphur-resistent cement accord ing to market demand. The end product has already been sold to two Kuwaiti companies, Omrania Co and Cament

Kuwait. Another project which looks like being an immediate success is the Ras at Khaimah Lime factory, which is just started producing 500 tons of hydrated lime a day. Ras al Khaimah is reputed to have the best quality lime for thousands of miles around, and its resources are renowned throughout the building trade in the Middle East. The plant has cost \$20m to build and was partly financed by the syndicated Eurodollar loan and partity by its share-holders, which include 60 per cent ownership by the local gov-ernment and 40 per cent by Syrian and Lebanese entrepre-

All these projects in Ras al Khaimah have made maximum use of the Emirate's natural resources. Their success is also sided by the nine-berth port which although not totally com plete, has been able to handle all local exports. The port is now being managed by Gray MacKenzie, and although there side cranes, the port was able to handle some 20.000 tons of Iranian cargo earlier this year

Neither Abu Dhabi nor the new federal Government is likely to allow Ras al Khaimah's financial problems to continue but neither are they likely to flood the Emirate with funds just to ball out the government Unless oil is discovered (which is always a possibility in such an area as the Gulf), the Emirate will continue to make maximum use of the abundan natural resources, but it may not be the boom town its Ruler may hope for. It may, as some bankers predict, sink back into being an Arabian coastal vil lage once again. But like Oman the Emirate has one important factor in its favour-its stra tegic position. Naturally, al are interested in preserving some measure of prosperity and therefore stability, in this northern corner Emirates. The new Prime Minis ter, just like the former ad ministration, will also be inter ested in bringing the Emirate more into the mainstream no only of development but o union politics as well,

POSSESSING NO oil, Umm al the federally-funded low cost Quwain, Ajman and Jujairah, housing. the three poorest emirates, have had to scratch hard even for semi-viable projects. Their semi-viable projects. semi-vizoie projects. Their economies are disjointed as a

Each has had different experiences in attempting port development. Efforts at quarrying have been overshadowed by Ras al Khaimah's successful production of rock for the UAE market and for export. Few new projects have had complete success; several have been failures. The traditional activities, fishing and agriculture, have been steered a shaky

Politically, the second league emirates have different com-Ajman has always had closer relations with Abu Dhabi, whose ruler Sheikh Zayed has always been willing to help out personally when the ruling family has been in finan-

Umm al Quwain has never been on the best of terms with Ajman or Abu Dhabi but gets some support from Sheikh Rashid of Dubai. However, its ruler traditionally played a mediating role between Dubai and Abu Dhabi and his son was involved in the Kuwait-sponsored mediation prior to Sheikh Rashid of Dubai becoming

prime minister. Isolated Fujairah, whose young ruler Sheikh Hamad bin Muhamed al Sharqi, attended Hendon Police College, is in the happy position of having good relations with all the emirates and the federal government.

Fujairah: Its ruler had long resisted the temptation of development for the sake of prestige, but has finally succumbed with the construc-tion of a nine-storey office

The chairman of the Fujairah Insurance Company, which put up the building opposite the elegant three-storey, all-purpose municipal building-cum-ruler's office, claims shamefacedly that he didn't want a tall block but succumbed to pressure from other members of the board.

Life in the emirate has been transformed by the completion of the road network. This has brought hospital facilities within reach of the villagers, and expands the market area for farm produce and fish. Telephone lines have doubled in support since here was and in number since last year and villagers are starting to accept

housing.
One effect of the surge of modernisation has been a drift from the land to the capital. Farmers often prefer to live in the town and employ Pakistani or Baluchi workers on their

The economy is a hotch potch: no oil (but Reserve Oil and Gas are still looking); agriculture and fishing have suffered setbacks; 20,000 people are served by 12 banks in Fujairah town. The new port is delayed but at last out to tender in a scaled-down two-berth version. The Dh 15m fishing harbour given by Sheikh Rashid of Dubal now enables local fishermen to use larger boats. but a fishing and canning joint venture with Japan collapsed after a dispute over sharing the 10 tons a day catch.

has Two marble and tile factories owned by the Ruler and his chief minister are successfully

producing but having difficulties marketing the stone. The new bottling factory for spring water near Dibba faces competition from Ahman's Gulfa Water. A joint venture shoe factory with a British company, J. R. International, should have less trouble marketing when it trouble begins production next year because its Fujairah partner has a chain of shoe shops in Dubai.

Weekend tourism has developed since completion of the road network and both hotels, the Beach Hotel and the charming three-storey Hilton, have benefited. The Beach Hotel is profitable but vulnerable be the 300 square miles emirate cause it makes much of its have their own TV and radio money on sales of alcohol to station.

communities in the Emirates have of oped as local busihave settled in e they have found rent and a stimulus than in their

i merchants themgrown in strength cation as their bank. d extends now from to London, and em have developed classic import specialists in re-exor partners in joint participation. The typical mer-chant now is likely to head a large operation, and to employ expatriate executives, accountants, technicians and specialists in a business which will embrace warehousing, assembly and simple manufacture and which

serves the Gulf and Iran. Although the situation in Iran remains confused, the mer-chants of the UAE, and especially of Dubai have found avenues for profitable business there. For example, a prohibi-tion on the import of American cigarettes by Iran did not of course stop the local demand for those cigarettes. UAE merchants bought up every consign-ment of American cigarettes they could find, buying as far afield as Hong Kong and ship-ping them in dhows to quiet bays along the Iranian coast.

How do the businessmen of the UAE see a world in which oil from the Gulf fetches \$20 a barrel or more on world markets, and how do they-see busily against hopes of ness conditions developing in revenues (Sharjah the Emirates and in the Gulf Khaimah) or as a generally? Few believe that a generally? Few believe that a return to the hectic and highly profitable days of 1974 and 1975

Five years ago business was stimulated—perhaps overmuch
—but domestic government expenditures on projects, and especially infrastructure projects. Those were the days of superlatives, when even the most cautious amateur business man made profits, and where the canny few at the top made millions. Paradoxically, this expenditure by governments in the name of "development," "modernisation," "catching up," and, especially asserting independence has in fact increased the dependence of the ods more rapidly, increased the dependence of the and cheaply than Gulf countries on the inpetitors in other dustrialised West.

and countries. Business in the UAE is thus

Business in the UAE is thus no longer a matter for either though declining the innovative mercantile flair of Dubai's trade of the men from Dubai or the the last decade, just expenditure of the Government of Abu Dhabi alone. World business conditions, and especially international inflation, are just as much a concern of the UAE business community as they are of businessmen in

London, Paris or New York.
Attempts by the industrialised nations to break out of the oped as local busi-recession or semi-recession d merchants have situation which has affected varying degrees of international business since mulate their cousins 1973 have in general not succeeded, as increases in output have been matched b creases in inflation. The UAE experienced staggering rates of inflation during the oil boom; precise figures do not exist but some observers put the rate in

excess of 50 per cent in 1976. The UAE Currency Board says that its own admitted rough estimates put the infla-tion rate in the UAE at 25 per cent in 1977 and at 20 per cent in 1978. In its December 1978 report, the Currency Board cautionsly suggested that combined restrictive fiscal and monetary policies should cause the inflation rate to "continue

to be kept under control and further reduction in prices should continue to be a basic landlords, foreigners buy a target for 1979." Cynics might wide range of consumer argue that the Corrency Board's durables and luxury goods, policies had little to do with the imported by local businessmen. slow-down in the rate of infla-tion in the UAE, which was very much more a function of the slackening in the world rate of inflation and the general slow-down in the rate of growth in

the Emirates. The Currency Board itself noted that the Government of Abu Dhabi, for example, had not short of examples of the registered a virtual nil rate of slaving of geese that lay golden increase in spending in 1978, MEES. thus to a great extent compensating for the increase in Federal expenditure over the

tered business growth in the UAE is the Federation's fragile political structure. Fewer. Prime Ministers-designate in history can have taken as long to form a Government as has Sheikh Rashid this year, and hence fewer communities can have, apparently at least, managed quite well for so long without a formal Government.

Perhaps the delay is an act of commercial subtlety on the part of Sheikh Rashid, a man who believes in the minimum of Government interference business. His task as executive head of the Government of the UAE will require all his undoubted acumen if pressures for greater Government control of the business community are to

Anxiety

For example, following the revolution in Iran, the UAE's Federal National Assembly and its then Council of Ministers issued a joint memorandum in March of this year after a series of meetings in which they discussed the then current political situation and general outlook of the Emirates. In a section headed "The National Economy" the memorandum said: "A phenomenon which provokes great anxiety is the phenomenon of foreign penetration of the economy and of foreign capital and skills, in an unequal and wrong competition with local

canital and skills." In a sense this memorandum says nothing new, in that it has long been a favourite complaint UAE and look for joint-venture of many indigenous people in merchanting operations. The the UAF test "foreigners are in Iran were under attack would seem like a good time to say it

No element of the present commerciai scene should be given more consideration than this question of foreigners in the country, either by local businessmen involved in the Emirates. The fact is and all businessmen thinking know it—that foreigners are an essential part of business activity in the UAE, both as manpower and as creators of Foreigners occupy a large

much of it for eventual export foreign companies pay high rentals for office space in new high rise office blocks, and foreigners in short, provide the intellectual and physical muscle that brings profits to UAE businessmen. For all that, the history of the Middle East is not short of examples of the

Apart from ensuring that rational policies of government are not swept away in a wave of popular emotional extremism, Another constraint on unfet- the room for direct government intervention to stimulate business activity in the UAE is not great and, it can be argued, is probably not even desirable. There can be no repetition of the massive expenditures of 1974-75 on infrastructure projects, if for no reason other than that there is no more room for major highways, harbours, airports, housing projects and hotels. There could be some expenditure in Abu Dhabi on industrial projects, but nothing

> years ago. Thus the UAE will need rely on market conditions to stimulate demand, and with Sheikh Rashid as Prime Minister, the whole business comcould tread the road made by Dubai in its pre-oil days, and profit as an international trading centre, the emporium of the Middle East and the Indian sub-

Restrictions imposed on trade by other countries in the region have long been a challenge to Dubai's merchants to find ways to supply, at a competitive price. the goods shut out by the bar-riers of other governments. "You can buy whatever you want at a good price in the UAE" could well become the business philosophy of an international trading community in

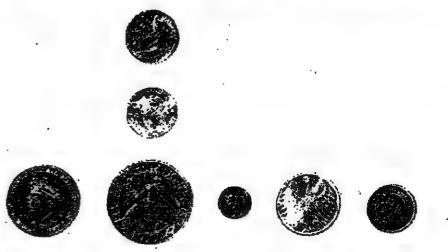

Thus foreign businessmen may wish to look beyond the traditional exporter-agent relationship which is still the hall-mark of much business in the UAE does still provide an alrunning the country" and in that most completely free coma time when foreign influences mercial environment, with no nominal customs duties, good communications space at rentals being down by competition.

The market to be served by such joint ventures stretches at least from Suez to Singapore It is a market having probably a higher degree of risk of short term interruption than ever before but it is a market where well developed commercial instincts stand to make con-

John Townsend

Solve this money problem. Then let us solve yours.

Creative problem-solving. That's the banker's art, as practiced at Toronto Dominion.

To show you what we mean, we've arranged coins from 10 of the countries in which Toronto Dominion does business in the form of a lop-sided cross.

The challenge is to create a symmetrical cross, containing six coins in each row —by moving only two of the coins.

Having difficulty? Then free yourself from all self-imagined restrictions. Once you do, voilà! The solution is immediately evident.

All you have to do is shift the coin from the bottom of the vertical line to the position on top of the centre coin, and move the right-hand coin in the horizontal line to the left-hand side.

It's this type of ingenuity and creative problem-solving that Toronto Dominion bankers apply to all their dealings. Whether it's routine corporate financial needs, large scale project financing or the formation of a management group, we help to make the difficult seem easy.

Today, Toronto Dominion has worldwide assets of over CAN \$23 billion, and a global network of more than 1000 branches, offices and affiliates.

Toronto Dominion. We have a proud record of partnership with corporations, banks and governments around the world.

A record characterized by the creative problem-solving abilities that make banking

WITH ONE bank branch for every 2,500 inhabitants, the United Arab Emirates must rank as one of the most overbanked countries in the world. There are 52 commercial banks open for business in the UAE with a total of 350 branches; 31 of these banks are foreign with 245 branches. Two other foreign banks, the National Bank of Bahrain and the Qatar National Bank, were issued licences during the banking boom but understandably have not been in any hurry to open their doors for business. rency Board, ten of these banks account for two-thirds of total banking business in the Emirates. Two are local, the National Bank of Abu Dhabi and the National Bank of Dubai and both attract a great deal of business as the principal gov-ernment bank of their respective Emirates.

Among the foreign banks, those well established in the Gulf, with first-class international reputations and outstanding local management, continue to attract deposits and to win a significant slice of business. Other foreign banks—for example, those of India, Pakistan and Egypt - have a lucrative if unexciting business in handling the remittances home of their respective nationals.

When all these are counted. there remains a hard core of banks, both local and foreign, whose operations in the UAE are unlikely to be profitable and which must view the future with some misgiving.

Rescue

The clouded crystal ball view of prospects has not, however, prevented a group of Saudi Arabian and Kuwalti businessmen from mounting an operation to rescue the Ajman Arab Bank, the main casualty of the May 1977 banking crisis. Now reopened for business, and renamed First Gulf Bank, it is increasing its capital from Dh 100m to Dh 120m and 2m 10-dirham shares are being offered for public subscription in the UAE

The aggregate balance sheet of the 52 banks shows a continuing expansion of business, but at a much more moderate rate than at any time over the last six years. In the words of UAE Currency Board managing director Mr. Abdul Malik Al Hamar, "the euphoric phase of ertr, for the banks as

term future of the Emirates. When bank lending is broken down regionally, lending for construction in Abu Dhabi alone is in excess of 50 per cent of the total, with the finance trade making up some 28.5 per cent of commercial bank lending and lending to governments little more than 1 per cent. (The Government of Abu Dhabi has no need to resort to commercial banks to finance its operations). For Dubai and the other Emirates together (figures for each individual Emirate have not been released) the financing of trade makes up over 40 per cent of bank lending, compared with over 50 per cent in past years, and construction 24.5 per cent, a share which is tending to rise. Included in the northern Emirates construction lending is, of course, the substantial loan to finance Sharjah's property development and large complexes in Dubai such as A. W. Galadari's enormous shopping and office complex. Lending to governments by the commercial banks in Dubai and the northern Emirates is over 14 per cent of the total, reflecting large borrowings by Dubai's Sheikh Rashid to complete his Trade Centre and to finance the Jebel All project, as well as borrowings by the

Inflated

A significant proportion of he commercial bank lending for construction is covered by the building of high rise offices and apartments in Abu Dhabi and Sharjah which are now completed but still awaiting tenants. In the near future there would not seem to be there would not seem to be hordes of expatriates prepared to pay the high rentals neces-sary to pay off the relevant bank loans rapidly. In the peak days of the construction boom the property speculator in the UAE could expect to get his money back in two or three years. Some UAE banks are holding property and construc-tion loan portfolios valued at highly inflated figures, with little immediate hope of get-ting their money back.

rulers of Sharjah and Ras Al Khaimah.

In other societies, banks in such a position would probably foreclose and there would be a rash of bankruptcies. The UAE business and banking community is not prepared for the shock of such action and the banking crisis of 1977 acts as an inhibitmemory, precluding draconian initiatives.

Yet the community, and especially the Abu Dhabi busiespecially the Aou Dhaoi business community, is deeply itself wants the central bank aware that it has a serious law ratified and implemented, problem. In December, 1978, In addition to giving it (the Sheikh Zayed issued an Abu Board) a professionally more satisfying and worthwhile role Dhabi Amiri Decree establish- satisfying and worthwhile role ing a Real Estate Bank with a locally, the establishment of a capital of Dh 1bn. Legally this fully-fledged central bank is decree should only have effect seen as a necessary step in in Abu Dhabi, where, as at the enhancing the international end of September, bank credit status of the UAE. This view is for construction totalled supported by a growing number Dh 3.8bn, with over Dh 3bn of of younger citizens of the this amount being for the confederation, who regard the federation of building to pass the harbing law. struction of buildings. Many people assumed that the as another manifestation of a

decree would ultimately, if not immediately, be reissued as a Federal Decree. Precise details of the objectives and mode of operation of the proposed Real Estate Bank-if it materialises -will be awaited with interest. Some observers see it as a means of bailing out the Abu Dhabi business community from embarrassing situation rather in the same way that the Government of Kuwait mounted a rescue operation to save Kuwalti investors after the collapse of the Kuwaiti stock exchange boom at the end of

Perceptive bankers in the UAE point out also that a large proportion of bank deposits are ssentially short-term. Although the UAE business community has not the same Koran-inspired mistrust of interest, and hence preference for demand deposits, as has its brothers in Saudi Arabia, most businessmen have a strong preference maximum liquidity in funds they keep in the UAE. This is in keeping with the traditional business ethic of the

community, which looks for profits on dealing and trading. and thus likes to have liquid funds available to finance deals

to governments, and less credit for trade, a disturbing trend in that trade, rather than yet more building, would seem to be more likely to stimulate the economy and assure the longas they are concluded. Debate It is a matter for debate whether developing communities and developing economies should have sophisticated institutions tailor-made to their requirements and set up to pro-

vide a framework for orderly economic growth, or whether these institutions should be set up only when there is a perceived need on the part of the community concerned. The argument for a central bank in the UAE provides a classic example for such a debate. Conventional international banking wisdom suggests that countries should have central banks whose prime functions should include taining a financial environment conducive to steady economic development" The UAE Currency Board was set up in 1973 as an embryo central bank. Lacking adequate

powers, and possibly not always blassed with the most prudent management, its influence on the orderly development of banking and on "steady economic development" in the UAE was minimal. In fairness, the Currency Board was not helped by the ambiguities of the UAE's federal structure. In any case, the Board was powerless to prevent the 1977 banking

Subsequently, the degree of confidence with which it is viewed by the Federal Government of the UAE is revealed by the fact that for the first eleven months of 1978 it received no foreign currency from that body. Had it not been for the support of the Government of Abu Dhabi, exercised through the National Bank of Abu Dhabi, the Currency Board could have been placed in an extremely difficult situation.

In the immediate wake of the 1977 banking crisis a central banking law for the UAE was drafted by International Monetary Fund experts. Possibly influenced by the freefor-all which led up to the crisis the law was perhaps too ambitious and put too much power in the hands of the pro-posed central bank. Be that as may, the proposed law establishing a fully fledged central bank has not yet been approved by the Supreme Council, consisting of all the seven rulers, and the ultimate constitutional authority in the UAE. The law's Article 41 spotlights the basic constitutional problem of the UAE: the relationship of federal

institutions with the govern-ments of individual Emirates. Naturally, the Currency Board failure to pass the banking law

The trade centre of the Arab World...

... and its trade and exhibition centre.

Dubat is the natural commercial and distribution centre of the Middle East. Through its ports comes much of the traffic serving the Gulf States and other Arab nations. Dubai has therefore always been the natural crossroads between the West and the Middle East and is now poised to become even more important. It is therefore the ideal venue for trade and technical exhibitions in the Arab world, and for associated conferences. The more so, because of its cosmopolitan and international lifestyle. Thus, a need sprung up in Dubal for the ultimate in exhibition and conference facilities – and the need has been met by the construction of the new Dubai International Trade Centre. Its exhibition hall provides the best air-conditioned

display space in the Gull, with the most modern exhibition lighting systems. Every support facility is available, from show management offices to permanent refreshment areas, restaurants and special V.I.P. lounges.
In addition, there are excellent conference and office facilities in the adjacent 39-storey tower, including sophisticated audio-visual aids. Delegates, exhibitors and visitors will welcome the immediate proximity of the luxurious 400 mom Hilton Hotel, with its international restaurants, bars, swimming pool and sauna. And of course, the entire complex offers unrivalled commercial

services (telex, photocopying, printing etc.), maintenance and All in all for those organising exhibitions or conferences in the Middle East, the Dubat International Trade Centre.

Abu Dhabi started experiments with wheat producopulation experition two years ago at Al Ain, country in the mic expansion in the UAE's half of the Buraimi oasis, where most of Abu Dhabi's food comes from. Dr. Ali al Ayadi, director of the municipal properties of Agricultural and Agraes in cultivated. rease in cultivated municipal Department of Agrilast seven years culture in Al Ain, has three aims for agriculture in the oasis insumption. area: vegetable production, all never be selfforage for animals and grain nod but it will be production for strategic reasons.

Dr. Ayadi explained: "Grains are totally tied to water supply but why not try them? Unlike industry there is a sure market for agricultural produce. There is no market for bariey but we grew wheat on 200 hectares in This year we will double it and in 1980 we will expand to 600 hectares."

He claims that yields for wheat last year ran as high as 4 tons per hectare, higher than in his native Tunisia, and that the department got back 80 per cent of the costs. Both claims are hard to believe. Even a claim of mean production of the federal Ministry of Agriculture. Dr. Ayadi denied that his work is subsidised. If so one must presume Abu Dhabi's department of agriculture has different methods of costing from economic norms.

Abu Dhabi also has one of the most expensive agricultural research stations in the world on Sadayat Island. It is the only place in the world produc-ing vegetables from sea sand. Cucumbers, peppers and tomatoes are produced for sale on the local market, but the location is so expensive that no indications of economic feasibility can be gained.

A mydroponics experiment has peen apandoned because or the rapid spread of disease through iltivated land is the fluid solutions which red nah. Seven years the plants. The general tesson irom Sadayat is that an island location with high humidity and heavy corrosion in the cooling equipment is unsuitable for commercial application. Compagnie Francuse du Petrole (GrP), however, has had more covers the practical success at an experiinds for veget- mental station outside Al Ain. Using a combination of greenhouses, shaded areas and open largely expatri- fields, the CFP farm tries to narket, seasonal show how the vegetable season can be expanded by successive ments. In addi- plantings of cucumbers, tomatoes, etc. under different condiquarter .tions according to the time of ts, and one-fifth year. Encouraged by the results the Government is participating

little noticed but a view is prevailing, especially territory) but vetermary and inverse of the in Abu Dhabi, that grains are disease prevention problems have not been overcome. A

> are equally important in the minds of Government officials. Two years ago Rashid Salem was living in the desert in a crude "birasti" shelter with his wife and five children. He still has 20 camels, four cows and almost 100 goats, but now he also possesses a four-roomed house with a courtyard back and front and his own neatly laid-out 2 hectare plot of land in Al Haer farm, 40 km north of Al Ain. His children go to the settlement school. The whole family can use the clinic. Rashid supplements his income working as a driver for the officials who run the extension services and oversee the farm. He

The social aspects of farming

has his own Toyota land cruiser. Rashid grows alfalfa on haif his plot. This produces enough 3 tons is doubted by experts in for his animals in summer and a surplus in winter which is sold to camel-owners who come to buy from far across the desert. But the general lowering of the water table in Al
Ain — soon water will be
pumped from desalination stations in Abu Dhabi, reversing
the oasis's role as a supplier or the oasis's role as a supplier of water to the city - means that the settled bedouin of Al Haer can often cultivate only a pro-portion of their allocated plots. Rashid grows water melon and egg plant in addition to alfalfa, but the rest stands bare awaiting a solution to the water prob-

By tradition the tribes of the Musadam peninsula, which includes northern Oman and much of modern UAE, could count 365 falages, underground irrigation tunnels like Iran's quanats. Enumerating one for each day of the year was actually a metaphor to signify as many as you need." With this ancient system the tribes grew more than they needed.
As in Yemon and elsewhere

Arabia the sophisticated water controls of the past have failen into disuse. Only SI falage sites are known today. The delicate response of the old cultivators to climate and underground water has been replaced exploitation of underground is ironic. Agriculture today contributes less than 1 per cent to

Each Emirate is responsible for between Dhaid and Sharjan its underground resources (oil started two years ago and is now and water) and is highly sensimaking a profit, and an ambitious 400,000-bird project in educational changes will have Ras al Khaspmah is due to begin to take place to change the in 1981 with Lawaiti capital. under their property is theirs to pump if they wish. In Abu Dhabi the municipality put a ban on wells less than 500

metres apart, but a Government farm breaks the rule and Sheikh Zayed continues with his policy of afforestation wherever water can be found. (In his defence it must be said that he now uses indigenous species only and that drip-fed forestry is the most efficient water use in the country.)

The federal Ministries of agri-

culture and planning have long been pushing for a comprehensive soil and water survey (a sine qua non of agricultural policy planning). Stages 1 and 2 of their programme have been completed tassembling existing data and an aerial photographic survey), and Stage 3, a complete water and soil survey, is due to begin. The Dh 50m project is under tender for completion by 1981. Meanwhile, the Cabinet has presented a proposed constitutional change to permit federal control of water planning. The change, however like so much vital legislation, is held up by the inability of the Supreme Council to hold

Water

For several years the country has been drawing more than 250m cubic metres of water from the aquefer connected to the mountains of Oman. This year the figure will exceed 270m cu. m. Every year a minimum of 150m cu. m. more than is replaced by rainfall is drawn off. The figure may be much higher. The Government has tried various methods of irrigation and has found that water use can be cut by 60-70 per cent by the introduction of methods like pipe-fed drip systems.
Wasteful flood irrigation Wasteful flood irrigation absorbs threequarters of the UAE's water so the widespread introduction of drip systems would have a real and immediate effect.

However, attempts in various parts of the country to introthe most short-sighted duce pilot schemes for centrally fed irrigation have failed. One been at Al Dhaid, where the Ruler of Sharjah has made so gross domestic product but uses many gifts of land for farming 75 per cent of the country's that the water table is dropping by three feet a year. The Two approaches to the crisis Ruler, who is an agricultural engineer by training, has been persuaded to stop distributing land, but the political problems of federal involvement in

PORTS AND AIRPORTS

Poor planning

steady expansion of port and airport facilities over the last few years illustrates once again a complete lack of co-ordinated planning. The result is wasteful duplication and yet another area Each Emirate has gone its own way, closing its ears to warnings of over-capacity, both in the Gulf and within the UAE. The spending has not yet finished, and in the next few years millions more dollars will be noured into sea and airport pro-

-irport capable of handling 3m nassengers a year and is completing a bunkering complex at the industrial city of Ruwais. In Dubai, Costain-Taylor Woodrow Joint Venture will this vear hand over the last berths in the Port Rashid expansion programme, while work con-tinues on the 68-berth port at Jebel Ali, a mere 17 miles away. This has already become a huge drain on Dubai's financial resources. Finally it has been announced that Dubai Inter-national Airport will be doubled in size at a cost of over £250m.

Just down the road, Sharjah has a brand new £330m airport, which is operating well below capacity because sirlines prefer to use Dubai. The deepwater port of Khor Fakkan on the Indian Ocean becomes operational this summer, although shipping lines are still sceptical about the value of a container terminal on the UAE's east

Other Emirates too have plans. Some have had to be shelved through lack of cash, but other projects—like Mina Sagr Port in Ras Al Khalmah have been completed; but it is ships to call there.

Cushioned

It seems unlikely that the UAE's ports will ever again operate at full capacity. Certainly there is small chance of a return to the days of congestion when there were queues of up to 200 vessels waiting up to three months to

This year Port Rashid and Port Khalid in Sharjah were cushioned by the situation in Iran as consignments were temporarily offloaded. By March over \$50,000 tons were lying in UAE ports, and although the majority will even tually be shipped across the Gulf some has been abandoned and will probably be auctioned. Abu Dhabi is the only Emirate to recognise the long-term signs and call a halt to its expansion plans for Mina Zayed. It was planned to build up to 60 berths in an inner and outer harbour. The outer harbour has now been shelved, and two of the existing 19 berths will instead be converted to take container ships and one to take ro-ro vessels.

Dubai has ignored the warn-

ings and pressed ahead with its ambitious plans. The massive Dry Dock is now finished—at a final cost of over £230m — and although the majority of the 6,500 people who worked on it for the last five years have now left, the dock lies empty waiting for an

operator.

Bristol Channel Ship Repairers
part of the C. H. Bailey group,
was awarded a letter of intent to manage the yard before Christmas, but so far no final agreement has been signed and it is rumoured that the Government of Dubai may be once again looking to the Koreans for a management contract. The delay is bound to affect the yard's ability to pay its way. Port Rashid is still the busiest port in the UAE with a steady increase in tonnage, particularly containers. In 1978 the port handled 138 000 TEUs compared

with 55 000 TEUs the year

THE UNITED Arab Emirates' before and the signs are that Sharjah Airport has also yet to steady expansion of port and airthis move to containers will

Facilities for containers in

the port extension include two 35-ton cranes, two 41-ton third generation cranes and over 450,000 metres of storage yard as well as computer tracking. But as Port Rashid searches for more business it will face competition from both Sharjah, and this year from Jebel Ali as well. As ships get bigger and operat-ing margins tighter it is incon-ceivable that operators will call at more than one port in the Emirates and certainly not two in the same Emirate. The future development of Jebel Ali presents the biggest single question for port managers to ponder. It opens officially this summer with 10 berths — five for general cargo, three for containers, one tanker and one aluminium

berth.
The big question is whether Sealand, which currently accounts for 30 per cent of all
container traffic through Port
Rashid, will switch to the new indicate that it will be an uphill port. Sealand was appointed to American company will be

handled separately. Sharjah, too, hopes to attract more container traffic, both at Port Khalid and Khor Fakkan. Last year Port Khalid showed a 90 per cent rise in containers, but bulk cargo dropped by more

than 45 per cent.
Sharjah pins its hopes on the successful marketing of its "intermodal transport policy."
It plans to capitalise on its unique position in the middle of the UAE and with two ports on each coast as well as a modern international airport. The third arm of its integrated policy— road transport—has yet to be developed, despite the fast high-way kystem which now links the

Emirates. Port Khalid and Sharjah airport have been working together for some time, holding regular meetings to co-ordinate policy. Now the new manager of Khor Fakkan, MTI (Port Management Services of Port Khalid had expected to get the contract but MTI came in at the last moment with a better offer) will join these meetings. MTI is a joint venture between Manchester Liners of the UK and Ali Reza of Saudi Arabia. It also has a contract with Bombay and will run feeder services between the two ports as well as round the coast to Gulf states. Though the integrated transport system looks good on paper there has been no great enthusiasm in practice. So far the ruler's yacht has been almost the only vessel to require the two Khor Fakkan tugs to leave port.

which rise out of the desert, is arguably one of the finest in the Guif. Shaikh Sultan, the Ruler, played a major role in design ing the building, which is one of the few in the area to in-corporate any traditional Arab design. It is a functional yet attractive building, but as yet few airlines have been attracted away from Dubai.

Frankfurt Airport Authority which has the management con-tract, see transit traffic as the key to the future. The sirport buildings themselves — which incorporate direct access bridges
—duty-free shops and a 20 per cent lower handling rate will eventually persuade the long haul operators between Europe and the Far East to stop at

manage the port but Mr. Jim a 61 per cent increase in transit Scott, the port manager has traffic over the same period last stressed that the container and year (84,000 compared with port management arms of the 52,000). Last year the airport handled over 3m people and has over 26 regional and international airlines operating 230 flights a week. Only a week after Sharjah

had proudly inaugurated its new terminal, Dubai Airport terminal, Dubai Airport announced that it was to double its airport capacity with a new building alongside the existing terminal. The new £250m terminal, which will be completed by early 1981, will handle arrivals, while the existing building will become the departure lounge. Coupled with a second runway the extension programme is designed to take Dubai Airport into the 1990s. Meanwhile. Abu Dhabi's Nadia Airport. 30 km from the town itself is expected to open early in 1980. Phase one is capable of handling 3m

passengers a year. It is doubtful whether it will attract much traffic away from Dubal, which is still the popular destination, particularly for businessmen.

There is still one area which
has yet to be developed in the region—cheap flights. It has already been proposed to operate a "Skytrain" type service to the Far East, and Sharjah has been proposed as a transit stop. If that happens it could mean the advent of £85 fares to London, something which is likely to shake the complacency of scheduled operators, which until now have held fares at prices that are among the most expensive anywhere in the world

Celia May!

The £1bn port at Mina Jebel Ali is being constructed by Gulf-Cobla for the Ruler of Dubai. The two basins will have 66 landlocked berths and will be completed by February 1981. One feature of the construction of the 15km of dock walls is the use of special hydraulic tongs for the placing of quay wall blocks

handle the implementation and management of the Abu Dhabi Emirate's basic industries; its terms of reference also permit it to help the private sector wherever and whenever such assistance might be appropriate. It must be stressed that the corporation is for Abu Dhabi Abu Dhabi, with careful ultimately its scope should planners logic, has opted for an cover the whole UAE, industrial city at Ruwais, a remote hamlet hordering the

Ruwais hydrocarbon-based industries will reach \$20bn by 1985 if all planned projects go ahead. The oil refinery, being built by Snam Progetti of Italy, will have an initial capacity of 120,000 b/d, possibly rising to 300,000 b/d by 1985 and subsequently to 500,000 b/d. A natural gas liquids plant is to be built by the U.S. contractors, Bechtel and Fluor. Feasibility studies for an iron and stee mill in Ruwais and for a dry dock project in Abu Dhabi were signed in April of this year.
Although the official word in Abu Dhabi is that the Ruwais had but Dhabi is that the Ruwais and the project in industrial develops.

industrial city is going ahead as planned, informed observers in the Emirate say that the Government is becoming con-cerned at the implications of increasing costs and above all at the implications of the competition to the Ruwais indus-tries which will be offered by Saudi Arabia's Jubail industrial complex. It seems probable that only the refinery and the natural gas liquids plant will go ahead. So far, all the infra-

At the same time that the Ruwals industrial city complex trialised countries. was being planned, the entrereneurial and intensely petitive Sheikh Rashid of Dubai conceived his own industrial require more and still more city at Jebel Ali, another stretch of desolate sand some tries, especially after the events commercial spirit of Dubai resentment of the foreign presence, a presence especially than Ruwais. The first 12 berths digenous inhabitants by a factor of the planned 74 berths in th new harbour are in use, for the import of building materials, want to make their homes in general, bulk and break bulk the Gulf; social contact between the two communities is minimal cargoes: The Dubai Aluminium

Gulf, and even to settle there cent by Japan's Nissho Iwai and 5 per cent by local Dubai merchants, will produce at the rate of 135,000 tons per year from mid-1981, at a time, when Sheikh Rashid believes that there will be a substantial increase in demand for aluminium products. The DUBAL smelter will be in direct competition with the ALBA smelter cent by Japan's Nissho Iwai and petition with the ALBA smelter in Bahrain, in which Saudi Arabla has recently acquired an equity share. To rub in the

Rivalry

come and run DUBAL.

Associated with DUBAL in Jebel Ali is DUGAS, the Dubai Natural Gas Company, a joint venture between the Govern-ment of Dubai, which has 80 per cent of the equity, and the American Sunningdale Oils, which has 20 per cent. Initially DUGAS will produce propane, butane and condensate for export from Dubai's own slender gas reserves. Ultimately, DUGAS will provide gas as fuel for the Jebel Ali industries, including, of course, the DUBAL smelter. Here, the wisdom of action before plans can be questioned. Extra as can be questioned. Extra gas will be needed, initially 55m cu ft per day, and ultimately probably as much as 120m cu ft daily. This gas might come from the neighbouring Emirate of Umm al-Qawain, or it might come from a small gas field just across the border in Oman. In each case, there are price difficulties, and in the case of Oman. possibly political diffi-Oman, possibly political diffi-culties, as the pipeline bringing the gas to Jebel Ali would need to pass through a small area of disputed territory. An obvious source is Abu Dhabi, but the intense inter-Emirate rivalry between Abu Dhabi and Dubai has so far ruled this out.

Another enormous industrial project in Dubai, conceived in a It is not yet certain whether the Dubai dry dock and shipyard complex has a manager, although Britain's C. H. Bailey is thought to head a field which

includes Korean and U.S.

Problems of gas supply and management aside (and Sheikh Rashid has always hitherto beer able to arrange a profitable deal at a time to suit himself), Dubai's heavy industrial projects have one great advantage over Abu Dhabi's projects: they are virtually complete, they will operate, and even if they do not make a commercial profit they are likely to generate a cash flow and attract secondary industries to Dubai to serve a growing local and regional market. Purists may complain about duplication and a waste of scarce resources, and the absurdities created by a lack of planning. Professional risk takers, like Sheikh Rashid, can counter (assuming that his major projects will not be white elephants, a reasonable assump tion at the moment) that while planners are agonising over priorities and options, the businessman is in the market place, sniffing the air and making profitable deals whenever the opportunities offer.

The only other Emirate with heavy industry is Ras Al Khaimah, which has construction related industries, a cement plant currently being enlarged a rock-crushing plant and a lime kiln. These tend to be joint ventures between the ruler of Ras Al Khaimah and Kuwaiti

After the weakness of local markets, the greatest constraint to industrial development in the UAE, and in the Gulf generally, is the absolute shortage of manpower at all levels, from managing director to production manager, to technician, foremen most capital-intensive industry. employing the most modern technology, still requires experts to run it. Indeed. high-technology capital-intensive industry has a built-in trap for developing countries in that the go anead. So ist, an the intra-structure projects are continu-ing.

people required to manage and control the latest plants are in short supply in most indus-

It follows that the impleplans of the Gulf countries will require more and still more applauds action rather than presence, a presence especially plans, with the result that Jebel noticeable in the UAE, where foreigners market in property and in consumer goods. A market is required if heavy

industry is to be viable; the same principle applies with even more force in the estabpoint about competition. Sheikh Rashid hired the British manalishment of light industries. In the UAE, light industry has no ger of the ALBA smelter to protection, save from a very modest duty on imports, and has therefore to compete on quality, price and availability with the wide range of imported manufactured products available. Most light industry is small scale and, not surprisingly is concentrated in the food processing, construction-related and machinery and vehicle repair sectors.

Successful light industries can be very successful indeed. An example is the glass reinforced plastic (GRP) manufacturing joint venture of Dubai businessman Abdul Ghaffar Hussein, managed through his holding company, Green Coast Enterprises. He started a paint and plastics joint venture operation with a Norwegian group, and the success of this tempted him. with the same Norwegian joint venture partner, to set up a large-diameter GRP pipe plant. In 1978 this plant produced a total of 105 km of plastic piping in diameters ranging from 350 mm to 2,500 mm. His market is the whole Gulf, and his pipes are a genuine Dubai export, rather than a re-export.
The range of products is being extended to include smaller diameter pipes as well as water tanks, septic tanks and other GRP tanks for industrial purposes. Abdul Ghaffar Hussein is a businessman above all. He has hired the manage-ment skills and bought the spirit of competition, is the insisted on a majority share in three-berth dry dock, intended his joint venture, having only to compete with Babrain's 30 per cent of the equity. But OAPECowned Arab Shipbuilding and Repair Yard (ACO). his mercout le floir and his knowledge of local markets have given to his Norwegian partner an asset which is highly profitable.

EDUCATION

Given high priority

an educated local elite, the nationals of the UAE could lose their grip on their country, the economy and its direction Not surprisingly, education has the second largest priority after defence in the federal budget. To many na-tionals it is the one major benefit of the oil, for while the wealth has bred its own pecu-liar social problems the establishment of a nationwide education system is regarded as the most tangible blessing of ull.

Yet it was only 20 years ago or less that education was a privilege restricted to the sons of sheikhs. For the few parents who could afford it the only alternative was to send their children outside the country for schooling, and today many of those former students are Minis-ters in the Federal Government.

Immediately before the creation of the federation there were only a handful of schools, but eight years later an educational system from kindergarten to university is available to the remotest bedouin in the desert. Schools have been built in areas which only five years ago had no roads, and in terms of icfrastructure building, the achieve-ments of the Federal Ministry are nothing short of miraculous.

Today the UAE education network boasts an intake of around 90,000 students in 240 schools, and this year alone the Federal Government is spending Dh 1.2bn on education. About 82 schools are under construction, some 42 libraries are being built and the most sophisticated educational aids the world has to offer are being installed in the local schools

Yet the UAE, like many of its neighbours, is beginning to discover that bricks and mortar alone do not make an educational system. For all its lavishness the education field is racked with problems. Many of them result from rapid development, and the future will give time for hindsight and reflection so that they will be identified and eventually froned out. The rush to provide a nation wide network for all citizens, whether from rich Abu Dhabi to poor Fujeirah, has led to neglect in the software which fills the luxurious classrooms. One expatriate adviser went

presented the most depressing scene in education that he had seen in the Gulf so far. The major problems for the

as far as to say that the UAE

system derive just from the diverse nature of the society. instruction is given which would government Ministries, Out of nearly 5,500 teachers contradict any Islamic beliefs, many are continuing

per cent of the total, the edu-cation sector is vital. Without the few respected avenues of for teaching represents one of work that a UAE female can pursue. The bulk is culled from Egypt, the remainder being Palestinians, Jordanians, Somalis and Sudanese. In pre-vious years the recruiting teams from the Ministry of Education in Abu Dhabi used to acquire Egyptian teachers almost in bulk in lots of 300 or so, with scarce attention being paid to past academic and teaching experience. Now a system of interviews has been instituted to improve the quality of

> Instruction is often still rote and from Arab nationals whose only reason for being in the country is the money. More recently however, the pay of teachers is rapidly declining in attractiveness, for although housing allowances are paid they are frequently insufficient to cover the high rents in the towns. Teachers often end up sharing cramped small flats and being at the lower end of the social scale in the framework of

> the alien Arab society.
>
> Small wonder then that so many schools in the UAE suffer disciplinary problems. Teachers are just superior "coolies" and as such have severe problems in disciplining the protected and privileged youngsters of UAE classrooms. When a local school recently installed a lavish Sim language laboratory, it was wrecked within a matter of weeks. "Worse than a London comprehensive" is how one foreign teacher put it Assault is common and disrespect a daily affair. Teachers have also been attacked when they tried to intervene with the normal smooth process of cheating. and of course "merchants' sons

never fail."

Many nationals and Arabs from elsewhere are becoming increasingly attracted to the foreign schools in the UAE, where discipline is maintained on stringent European lines. Many of these foreign schools, which have undergone an enormous expansion over the past five years, are expensive. The English school in Dubai charges nearly Dh 5.000 a pupil a year and a Dh 20,000 bond is re-quired to guarantee a place. A family with two children, one at a secondary school and another in high school, would have to pay the equivalent of Dh 57,000 (£7,300) a year on education. Realising their attractions, the Federal Ministry recently de-

ment school system, which is becoming increasingly marked by high failure rates, drop-outs

and indiscipline. In contrast, the Government studies. Here in this delightful chools for girls are har provincial town in the desert, schools for girls are harmonious, happy places, enhanced by an active interest in arts and music. The UAE girls have been quick to grasp that if there is to be any place for them in UAE society outside the walls of their father's or husband's house, then it can only be as a professional woman in the acceptable roles mapped out so far for them by society. An education really is the only way out, even to the limited version of freedom that they

seek.
The most serious problem however, is the drop-out rate among UAE schoolchildren. among Officially all children are obliged to attend school between the ages of six to 12 years, though the foreign inspectors have a difficult task in rooting out the missing pupils and forcing their parents to send them. The dropout rate among nationals is dramatic and much higher than other Gulf States. The primary and preparatory levels account for 53,385 pupils, but the secondary schools only manage to account for 3,161 students, with Islamic studies taking

another 1,000 boys.

This seemingly alarming dropout rate is largely because of two factors. Many of the girls leave either because their parents are preparing them for marriage or because they are to get married shortly after preparatory school. There are still numbers of girls being married under the age of 15 years, though this practice is declining rapidly as the girls push for their education to be continued. Many of these cases highly popular adult daytime

courses. The boys, however, are often lured by family business, be it the trading empire of a local merchant or their fathers needing help with the fishing. Large numbers of them are attracted by the high salaries offered by the army, and in many cases there are opportunities for their education to be continued there. Many of these such boys are bedouin, and the security forces have an interest in luring such human resources into the army in order to boost its national content. Educational ambitions thus, directly clash with those of

Increasing numbers though clared that they would be are realising that success does experience it," remarked one tightening up on the private not necessarily mean a career teacher. Motivation is also anschools and checking that no as a well-paid coffee drinker in other problem in such a society

The divided nature of the campus requires duplication of everything. There are physics laboratories for the girls and UAE girls, an education of the girls and UAE girls, an education of the physics laboratories for the boys.
>
> From Weekend controls in the second of the physics in the phy Each weekend separate buses take girls and boys to their lege for agriculture is due

ent days at the library for either sex. The campuses which house the students (they are forbidden to live out) are more like hotels than hostels, for each is luxuri-ously decorated, with TV rooms, videos each night and swimming pools under construction. Part of the reason for the plush environment must be that students, particularly the girls, are virtual prisoners in their halls of residence from the time classes finish. Boys are allowed out, and many even run small businesses in the town on the

Not surprisingly therefore the girls' hostel has a somewhat claustrophobic atmosphere, for here some 400 girls are kept under strict control by a handful of student supervisors. "It's the only way they would be allowed to come to university at all." explained one of them. " If we didn't guarantee control, their parents simply would not let them come."

Some days the supervisors mount small shopping expeditions into the town in groups of ten. "I couldn't take them in greater numbers, the local resiients would object. Besides, how can I take 400 girls to a market which is basically six usked a supervisor. As for the future, when the female intake is projected to swell to over 3.000, the supervisor could only shudder at the thought of controlling such numbers. Maybe it will have changed by then. Kuwait did," she said hopefully.

With fewer distractions, the girls have proved more successful than the boys. The latter are now reported to be pulling themselves up, according to one professor, and the gap is narrowing. Discipline is also a problem for some in the first few certainly unnerved a numb months. "It's the first time they ruling sheikhs. their national is often enough. Few

WELFARE

Gifts from Allah

sheikhs make gifts to the poor.

were dealt with ad hoc. Hospitals and schools were often the currency of largesse. As the first educated Emiratis began to assert themselves attitudes to social responsibility became more suphisticated and Ministrics of health, social and planning welfare, were estab-lished.

Setting up a social security department was a means of institutionalising the spread of wealth from the sheikhs to the people. But it was seen in two different ways: the Rulers still see the welfare mechanism in terms of gifts: the administrators and educated Emiratis see it as the provision of minimum

It is hard to mobilise a welfare state in the UAE because the Rulers themselves are unable to distinguish between the quantitative and qualitative aspects of higher living standards. The Rulers' view is that social ailments can be solved with money. Hence the purchase of schools, ultramodern hospitals, technology and expertise far beyond the requirements of the nation. The remedy of first and last resort is always the banding out of

Material aspirations are indulged faster than social education can stimulate demand for gap can be seen in housing, enough money he can cl schools and every field, but it of living compensation, is well illustrated in the promodern hospitals in the small casis town of Al Ain, with 400 beds and a cancer diagnosis and treatment unit, unavailable in of the government receive a ing figures, is happy in his Britain. to the surface—a national who parks inconsiderately, a taxi driver who asks too much money or just a minor traffic incident. On most occasions, immigrants hold their tongue and bear it, for fear of losing their job and therefore their right to stay, which is regarded as the ultimate penalty. But all these developments hardly bode well for a healthy, harmonious community in the future. With the heavy industry being built in the area economically based on cheap Asian labour, the immigrants are a permanent feature, not a transitory, drift-ing population as the Govern-ment officials prefer to portray

nerically more severe Many nationals are fully aft or Saudi Aradia: aware of how segregated their ensions in the society society is becoming but point

Pakistani language offerings.

Vague

Another segment of the population that will soon be pushing for its rights is UAE women. Unlike Saudi Arabia which has definite laws and rules about the place of women in its society, the official view of the other half of the UAE population is still vague and ill any better. A social affairs official estimated that between o defined. At the moment, respectible educated girls are pertailed educated girls are permitted only the roles of marriage age faced a future of teachers, social workers and nurses, but the first crop of their high dowry prices. The matter chemists, business administrations and political science gradumumber of local women's associated in a live and political science gradumumber of local women's associated in a live and political science gradumumber of local women's associated in a live and political science gradumumber of local women's associated in a live and political science gradumumber of local women's associated in a live and political science gradumumber of local women's associated in a live and political science and given the support in a live and give and given the support in a live and give ates is already on its way. The country desperately needs more nationals working in the Government and private sector, but to absorb these new graduates would require some rapid leapfrogging in time, for as yet the religious and social patterns of the society would find it hard religious and social patterns of dowrles for a UAE wife. The the society would find it hard only condition is that the girl be his first wife.

As well as acquiring foreign

years ago, the dowry price was measured in terms of animals, foodstuffs and an amount of cash which rarely exceeded Dh 5,000. Now, the prices can be ten times that, and it is not unusual for a girl of a good, but not prominent family to have a bride price of Dh 200,000. For the daughter of a wealthy nationals. Few foreigners would care to take on a local citizen in any legal case.

A racial system which works as subtly as the UAE's cannot but generate resentment, on both sides and occasionally flare-ups of petty violence. It needs only a spark to bring it to further works and occasionally to be saved to be furtified by the further of a wealthy higher education, and some are marriage problems which occur when a young girl is married to someone considerably older than herself. Increasingly, too. In the further is the further of the daughter of a wealthy higher education, and some are when a young girl is married to someone considerably older than herself. Increasingly, too. In the further of the daughter of a wealthy higher education, and some are marriage problems which occur when a young girl is married to someone considerably older than herself. Increasingly, too. In the further of the daughter of a wealthy higher education, and some are marriage problems which occur when a young girl is married to someone considerably older than herself. Increasingly, too. In the further of a wealthy higher education, and some are marriage problems which occur when a young girl is married to someone considerably older than herself. Increasingly, too. In the further of a wealthy marriage problems which occur when a young girl is married to someone considerably older than herself. Increasingly, too. In the further of the furth jewellery and then a lavish hush which surrounds the subwedding feast. "It can cripple you for years," grumbled a young national.

> of bride prices is that more and foreign women, even though marriages are never respected in society. Some marry girls from Bahrain and peasant girl can be as cheap as that habit also. Dh 1,000 to Dh 5,000 and an Indian girl as little as Dh 500.

resented by UAE women, par-ticularly if they occur after the UAE woman is married. Dubal police are currently investigating a murder case of a 16-yearold Bengali girl who was beaten to death by the first wife of a UAE national she had married.

The Government has tried recently to prevent such marriages, particularly those involving men of 60 years and over and very young girls. The illicit marriage brokers who were working in Abu Dhabi have now been stopped, and a maze of red tape confronts any national wishing to marry a foreigner. Three years ago, though, it was not an uncommon sight to see these marriage brokers bring in as many as 20 wives at a time, all to be matched up at the airport to 20 UAE nationals. The end result was inevitable squabbling and

at me bottom and UAE and the top, with foreign appert to the plight of UAE as well as acquiring foreign appert to the plight of UAE as well as acquiring foreign appert to the plight of UAE as well as acquiring foreign appert to the plight of UAE appert appears an even sadder aspect to the plight of UAE appert appears and western expatriates in between. The oil wealth has problem." The oil wealth has problem. The oil wealth has a culture. Most major city had one disastrous effect dowry prices have rocketed. Over 20 years ago, the dowry price was measured to the plight of UAE with the girl be his first wife.

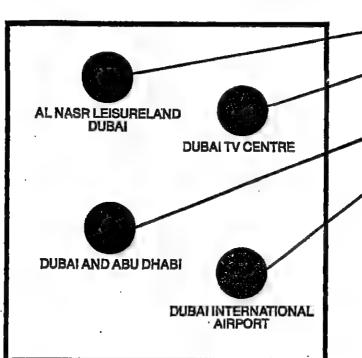

As well as acquiring foreign wives, nationals are also acquiring illnesses more associated with Western societies than have the problem. The oil wealth has problem. The oi deep depression owing to their parents' decision to block their higher education, and some are marriage problems which occur ject has prevented the start of Alcoholics Anonymous

The net result of the soaring believe is much needed.

Now the UAE is building its more young men are marrying first mental hospital for longterm patients and addiction cases. At the moment, most of the patients which local psychiatrists see are referrals from Qatar where dowries are around other doctors. They have not the Dh 5,000 mark. But the yet gained the habit of volunlower classes may simply go off teering for treatment of their on holiday to Bombay or Cairo and purchase a wife through just as they have acquired a the numerous marriage brokers taste for hamburgers, fast driv-who operate there. BET YOUR BOTTOM DOLLARS ON DUBAI

Dollars may be draining out of your vessel's bottom without you realising it. How long, for instance, is it since you've seen it on a slipway? Neglect could cost you a packet.

Why not stop the rot at Dubai? Al Jadaf Ship Docking Yard is the best equipped and mosteconomic inspection centre in Gulf Waters. There's no better place to spend your bottom dollars.

The star feature of Al Jadaf is a slipway with synchro lift capacity for vessels up to 34m. draft, 46m. length, 11m. breadth and 345 tons total weight.

Because there are 40 repair berths we can handle your work with speed - 24 hours is all the notice we require.

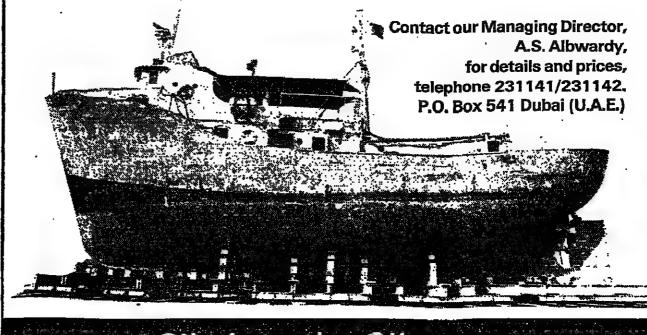

There are all the facilities you could wish for; fresh and sea water pump connections, electrical power, use of workshop,

towing car. fork lift, wheel crane, etc. Your vessel is lifted bodily, traversed to a waiting berth, cleaned by a Hydro Jet descaling system and returned to you as good as new.

Your vessel is back in the water and earning money for you. Not a moment or a dollar is wasted.

And we offer you a lot more than technical facilities. There's a shopping centre, shore accommodation (six rooms if you want them) and a restaurant.

As an added bonus, you're in Dubai - jewel of the Gulf - a humming business centre and fashionable meeting place. Dubai is, above all, friendly and welcoming - askany of our regulars.

Welfare

CONTINUED FROM PREVIOUS PAGE

dirhams a year go. Rulers are supposed to provide justice. In the modern world of mass right. People know what it is like in the world."
The problem is mobilising the

welfare state in a country neither rulers nor know what the term eans. With or without changes in income distribution the UAE's ability to buy material and technological comforts will continue to outstrip the people's social education. Qualitative aspirations will take a full generation to develop.

No better illustration than

health can be found to put the issue in its true context. All health services are free for all UAE residents. Health spending has risen from Dh55m to Dh900m in seven years. Hospitals are unevenly disributed in the Emirates (more than half the beds are in Abu Dhabi) but the UAE has one bed per 250 people and will approach Sweden's 100 heads

Though the best consultants are employed the education system does not produce a real state of the water supply, sewage disposal and general education."

This understant are a real state of the state system does not produce enough nurses. Aftercare is poor and ignorance of patients' needs destroys the best work.

A Fujirah girl will return

some from hospital with her new baby, the grandmother will ask why she is washing it and instruct her to leave it un-washed for a traditional period.

Nationals prefer London and estimates of the main Abu Dhabi and Dubai hospitals suggest that 80 per cont of the

invested rationally? The core patients are foreign. And it of the issue is where the 30bn is immigrant workers who have dirhams a year go. Rulers are the most infectious disease. Tuberculosis is common but under control. The government communication you cannot is trying to arrange pre-visa TB defend the practice of sheikhs screening for immigrants in getting the oil wealth as a their country of origin.

The proposed federal hospital in Fujirah (300 beds) would serve Omanis as much as locals. Northern Omanis have no health facilities. A federal health official said: "It will be a serve of the serve of serve 50,000 people. The Omanis are not foreign. If you can afford it you should do it."

The impact of foreign labourers on the country's health is forceful Half of the workforce is from under-developed countries and the UAE imports their endemic diseases like malaria. Nothing can be done to combat it while Oman takes no measures so malaria is rife. Ninety per cent of last year's 20,000 cases were

imported.
So far the UAE has escaped typhoid and cholera but if it arrives it will sweep through the immigrant communities. health official said: "We could do nothing. Prevention lies in

group, the most unfortunate of the foreign majority, not only requires a health service on humanitarian grounds. Their health is the UAE's health. Until the implications of this are fully appreciated at the top the UAE will not be able successfully to construct its welfare

hampered.

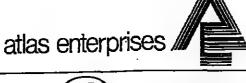

Despite the hospital building programme no study has been done of who is in them.

Nationals prefer London and adopted by the rulers before the development of the state can progress further.

the progressive drive of one of the

population. But an increasing number of voices are beginning to ask whether they are truly the drifters the sheikhs like to portray them as.

Not even the meagre numbers of UAE citizens are all ethnic local Arabs. Some, particularly in Dubai, are of Iranian origin from the southern shores of Iran, while others are those lucky few who have acquired UAE passports after long years of service in the administration or the army. The granting of passports to foreigners is another political hot potato-as yet there is no uniform policy on the issue.
A number of Rulers have

attempted to boost the numbers of their subjects by giving passports to the Bedouin who criss-cross the borders. As yet there appears to be no uniformity in passports, for Rulers allow Yemenis or Omanis to acquire UAE nationality after a certain number of years of residence. This is much resented by other States, and recently Dubai certain other sheikhdoms of "going their own way and granting tens of thousands of passports to people who did not deserve them."

The immigrants are already well entrenched into society. Most films at local cinemes are Indian and Pakistani. There is an all-English TV channel. Even the local Press is written by foreigners. Prominent merchants may own the newspapers but the editorials, are written by foreign Arabs, Indians or English people. Resentment about this situation led one young Dubayan recently start his own magazine. wanted to start something that was written by UAE nationals for UAE nationals."

Descriped

feel beseiged by the immigrants and their dominance in the administration and private sector. A recent study under-taken by the Abu Dhabi Petroleum department showed Company they were only 2.7 per cent of the total.

the problem assumes alarming proportions. No fewer than 28 different nationalities are represented in the army but only 10 per cent are nationals. Until four years ago the country's intelligence service

was run entirely by foreigners. In the private sector there are also grumbles about the dominance of the foreign element. Until now all Rulers have always taken the attitude foreigners are good for business and that more TV sets, hi-fis and villas can be sold and rented if there is a large foreign presence. Many nationals still judge their Rulers by the numbers of foreigners they can attract to their Emirate, by how many flats have been let, and by the general level of economic activity in their State,

But nowadays more questions are being asked along the lines as "business for whom?" There is also growing resentment at not only the fact that large numbers of stores and businesses are owned by immigrants but also that even if a shop is owned by a local merchant family the revenues will only go to expansions that bring yet again more immi-grants. "Who is this business benefiting—them or us?" is

becoming a frequent refrain. Such questions strike at the very basis of the ways by which the Rulers ensure that the oil wealth is spread. It also undermines the policy of continuous development which has characterised the UAE economy ever since its creation. Such projects as aluminium smelters and sponge iron plants are becoming more and more remote and irrelevant to the bulk of the native population. The Dubai Aluminium Company has yet to receive one application for Many of the young nationals employment from a Dubal national, and yet the complex plans to have a workforce of 1,750 when completed.

from Do we need them?" Mr. Said al Ghobash, the Minister of Planning, believes that the country should prepare for an eventual population of not more than 1m. Already it is not far off that figure, and no one is talking of a halt to development. with an order.

Although the issue may be the hottest talking point among ordinary nationals, it has yet to be discussed in depth in the Supreme Council of Rulers. The truth is that the UAE has no immigration policy-or any official guidelines on such points as pass-ports and the question of whether immigrants should be allowed to bring their wives. Yet these questions have been frequently in the discussed National Assembly, and in its joint memorandum with the Federal Cabinet, Immigration and its security aspect and the dominance of foreigners in the public and private sectors were listed as major items for discus-

Controversy

sion with the Rulers.

The last time the Supreme Council discussed the issue the sheikhs decided that it was not a worry, for the immigrants were not there to stay. Now the issue will no doubt become entrammelled in the con-troversy over the joint memorandum as a whole, and it may be a long time before the immigration question is discussed seriously again by the Council.

Meanwhile problem remains — and the population continues to grow. In 1977 the equivalent of almost a quarter of the population was given visas—some 226,000 people. Of 96,000 were Indians, 53,000 Pakistanis, Arabs only 40,000. By the end of 1978 when the country had experienced around 18 months of recession, the rate, not surprisingly, had dropped slightly, but tion caused by repeated inflows even so 165,000 visas were of immigrants makes planning issued, the equivalent of 18 per cent of the total population.

Most of course left when their contract was up, but some 25,000 stayed and transferred to other jobs through the help of pany, for example, only 1.5 per become full to overflowing. Dhabi's new industrial plans

IMMIGRATION IS likely to be whatsoever, for ruling sheikhs seas will eventually take up the 80,000 people, "80,000 what." Emirate's share is increasing among the immigrants, and the hottest political issue in the have always preferred to regard managerial reins of their oil quipped one Minister. "Where Last year it had risen to 34 many of them may remain with United Arab Emirates (UAE) the immigrants as a transition industry. In the armed forces are these people going to come per cent compared with Dubai's out work for six months at 43 per cent. Each emirate has time, being kept alive by frient its own Office of Immigration and former workmates. Offic and Labour, but any attempt to lower the rate of inflow has only met with resistance from local sponsors, who storm to the Mailis and come back armed

> Not only is there no immigration policy: there is no labour code either. Work camps are little more than shanty towns, frequently with little water and with air-conditioning. Workers' accommodation often consists of tents set down on the blistering sands of the desert. Strikes, although illegal, are not infrequent, and are always hushed affairs.

If the local Ministry of Labour Office is called in in time (before the merchant can run off to the Ruler's office and get all the workers deported). its officials have to play not only the role of mediator but union representative as well. The complaints are about money accommodation, with accommodation, workers often asking merely for such simple facilities as a bed to sleep on.

Compromise.

Whenever the Ministry has been unable to intervene, the result has been a compromise. No one, say officials, has been deported. Considering their numbers and the level of wages. deported. Considering their numbers and the level-of wages, it is surprising there have not been more strikes over pay than there have been. Wages have up their own houses. In the contraction of the contraction of the contraction of the contraction of the contraction. The proof of the contraction The proof of the contraction The proof of the contraction of the contraction of the contraction of the contraction. The proof of the contraction of th not gone up for several years even though inflation is still around 20 per cent a year, and a casual unskilled labourer still gets between Dh 22-30 a day.

DUBAI'S MERCHANTS

Commercial elite

of living very primitive. The town has neither electric light nor ice, but an order has been placed for machinery. drinking water is poor and the

climate bad."

This was Dubai in 1946 when a manager of the British Bank of the Middle East (then the Imperial Bank of Iran) visited the State to negotiate a con-cession for his bank to open a branch. His letter back to head office described the arduous life that the first branch manager would have to lead, but also testified to the canny nego-tiating abilities of the Ruler's son, Shaikh Rashid, and to the wealth of the merchants, one of whom already had a capital of

By 1946 Dubai had been a growing force in the commerce of the Trucial coast for more than 50 years. It is often thought that Dubai's rise to become one of the most extraordinary commercial phenomena of modern times—and the parallel eclipse of its northern neighbour. Sharjah—date only from the end of World War II. In fact the process began much earlier, towards the end of the last century, when Sharjah languished under the weak rule of the Qawasim (once the most feared name on the Trucial Coast), while Dubai since those times has had rather

clever rulers. A banker recently ascribed Dubai's rise to the energetic, liberal and pragmatic policies of the Makhtums and to their having none of the political enthusiasms or romantic delu-sions of the Qawasim." From the late nineteenth century it seems that Sharjah's popula-tion under this ineffective

regime actually declined. One of the first commercial cours engineered by Dubai at the cynense of Sharjah occurred

"THE ARAB population, was that the Bombay and Persia There were already in Dubai including the ruling family, is almost bedouin and their mode cancel its service to Sharjah, had been there for perhaps a (southern Iran) sent a reprenumbers. Later the Imperial sentative to the Ruler of Bank of Iran manager and Sharjah to negotiate and sentative to the Ruler of Bank of Iran manager and Sharjah to negotiate and sentative to the Ruler of Bank of Iran manager and Sharjah to negotiate and sentative to the Ruler of Bank of Iran manager and sentative to the Ruler of Ba whereupon the agents of the British India Line in Lingeh Sharjah to negotiate an agreement with their own client. The Ruler of Dubai heard of this and commissioned a pearl merchant who knew the Sheikh of Sharjah to call on that sheikh's mailis daily and to talk disparagingly of foreign ships calling at Sharjah. In general terms his argument is supposed to have run as follows: "Having got rid of one lot of foreigners with their drink and bad habits, let us not replace them with others.

The result was that the Ruler of Sharjah hesitated, at which point the Ruler of Dubai sent for the agents and granted permission for the British India Line to use Dubai port. Of course this anecdote may not be literally true, but like all legends it would probably not have gained credence had it not seemed a good illustration of Dubai's qualities of resourcefulness compared with the religious fervour of Sharjah.

Bank of Iran manager estimated that 80 per cent of the merchants were Persians. merchants were Persians.
"They enjoy the Sheikh's protection and are virtually Dubai subjects, but they maintain their own language and wear the old form of Persian dress." In the years after the Persian immigration the development of Dubai attracted further arrivals, from Sharjah, including the Owais family, who were big pearl traders and today are perhaps the most prestigious merchant family in the State.

Although in the years between the wars Dubai was not nearly as big or prosperous or as outward-looking a community as Bahrain (or Kuwait for that matter) it was a far bigger centre than anywhere on the Saudi Gulf coast, Qatar or Abu Dhabi. (Interestingly Abu (Interestingly Abu Dhabi also had a reputation for tolerance, but it had none of Dubai's commercial contracts.) It was in Dubai creek that the pearl fleet of the coast congregated, even though the pearl banks were in Abu Dhabi waters, and it was also Dubai During the next few decades which in 1938 saw a constitu-Dubai gained further advantional movement force reforms tage through the arrival of on the Ruler.

development companies, and there is no shortage of optimism that it will soon see a return on its capital.

Although Sharjah is ahead on setting up a tours structure, Dubai ls catching up. Dubai National Air Travel Agency (DNATA) is setting up its own tours and is co-organisms, with a leading Middle East travel magazine, an exhibition and conference on tourism. To be held in the Dubai International Trade and Exhibition Centre, Arab Travel '80 will, it is hoped, put the UAE firmly on the holiday map.

"Now that business travel is levelling off, the facilities of hotels, airports and travel services are available for pan-Arab travel and inbound tourist traffic," say the organisers. It significant that Dubai was chosen by delegates at the last Arab travel conference, held in London in February. Over 30 per cent of those present voted for Dubai as the next venue, which DNATA believes confirms "Dubai's role as a focal point of travel in the Arab world."

DNATA will be handling all the ground arrangements in Dubai for exhibitors, delegates and visitors and will offer tours around the UAE. There is a strong belief that, once tourism actually gets beyond the talking Britain's most successful shop- stage, it will take off under its

particularly Gulf Air are believed to be putting up a pre-dictable resistance to such plans, but despite this the first cheap flights did get off the ground this summer. Airports and hotels are confident that the advent of regular cheap flights to the Gulf only a matter of time.

One way of overcoming visa regulations—which for most travellers from Europe means time consuming application to a UAE Embassy—is for hotels to act as sponsors. Some have already done this for groups from other Gulf countries (notably expatriates from Saudi Arabia who come to the UAE for R and R), but they may be reluctant to take on sponsorship of larger groups. Technically they are responsible for any misresponsible for any mis-demeanour committed by those they sponsor.

(The land reclaimed in the process has since been of great profit to Shoikh Rashid.)

After the first scheme was completed in 1963 further improvements were made more or less continuously. The creek was further deepened and by 1970 it had nearly a mile of steel-piled wharves. (Today oil production platforms are floated down the creek from McDermott's yard. Trade expanded dramstically. In 1963 imports other than gold were worth about \$25m, in 1967 the float had reached some \$85m in 1971. had reached some \$85m, in 1971 \$220m and in 1973 \$605m. Apart from goods sent to other Trucial States, about 15 per cent of the imports of 1971 were recorded as being re-exported. A large proportion of this trade, much of it in cloth and medicines, was smuggled, mainly to southern Iran.

Smuggling

What attracted much more international attention, how-ever, was the gold smuggling business. This trade came down from Kuwait in about 1952-3, as the surge in Kuwait oil revenues in those two years opened up more conventional import opportunities for its merchants. Virtually the whole of the Dubai merchant community got involved in gold: the Ghurairs, Galadaris (who had some of the best dhows and made perhaps the biggest fortune almost entirely out of gold), Juma al Majid, Mohamed al Gaz, Mohammed al-Mullah, the al-Owais family, a Pakistani known simply as Harun, Mohammed Ibrahim, Othman Sagar and many others including Europeans, who could deposit a sum of money with a smuggler and receive their dividend, together

The procedure was that the gold was flown in from London or Zurich perfectly legitimately, being bought sometimes by the smugglers themselves and sometimes by a few merchants who prefered the slightly less hazardous speculation of just playing the gold market and

pulation were con- lished in that State when they a benign sheikhly were formed at the beginning a benign sheikhly were formed at the beginning of the Middle East. This first creek project Indian exports or the overinvoicing of legitimate Dubsian re-exports, but more often by the export of Indian silver, elther in bars or in coln. .

Much of the coin dated back to East India Company days or earlier, and a lot was said to have been looted from temples. Before being flown back to London, the silver would be used as security for the bank loans financing the next batch of gold imports, though as the quantities grew bigger and bigger the banks gave up physically transferring the builion into their vaults and let it rest in the dhows. To check that the silver was genuine they would test it with nitric acid

The turnover in the gold business grew steadily until it reached a record of 259 tonnes in 1970, representing slightly more than 20 per cent of the non-Communist world's new gold supply that year. Inevitably the Indian authorities reacted Cargoes were seized or dumped and dhows started coming home riddled with bullet holes. There was even a mutiny, when a crew seized its cargo and disappeared.

Much worse for the smugglers was the rise in the price of gold in the early 1970s, which put gold beyond the reach of the Indians and led to the disastrous month of June 1973, when Dubai's imports of the metal hit zero. From this and Mrs. Ghandi's imprisonment of a lot of the importers the business has never really recovered.

In 1974 Dubai imported only 51 tonnes, in 1975 9 tonnes and in 1977 41 tonnes. Much of the imports of recent years have gone to make jewellery for legitimate re-export.

The past six or seven years have not only seen a growing proportion of Dubai's trade coming through the expanded airport and the deepwater port outside the creek, opened in 1970. They have also seen a transformation of the re-export business into something just as but almost entirely legitimate.
Dubai still imports some 10

watches per head of resident population per year, along with four transistor radios, three radios-cum-sound recorders, and one television for every two persons. It also imports the better gold jewellery, are taken out often to be sold on the black market-by the huge numbers of foreign residents returning home for their annual holidays and by the business visitors who pour through the State. part of a gallon of perfume per adult female resident.

HISTORY

Shift in the balance of power

it has ever been my misfortune to deal-a country yokel from a remote village in England or Scotland is a highly intelligent looked after by the British individual compared with a Political Residency in Bushire, Trucial Shaikh."

So wrote Col. Hugh Biscoe, the British Political Resident at Bushire, in 1932 as he tried to cajole the Rulers of the Trucial Coast—now the UAE—into allowing Britain to construct airports in several places. H. R. P. Dickson, the famous Political Agent in Kuwait, was called in to help and was barely more at sea (no "piracy" or naval impressed, saying: "It would be warfare between sheikhdoms), hard to find anywhere in Arabia a more uncouth, suspicious and backward lot of Arabs."

It took Britain eight years to arquire landing facilities for aeroplanes or fiving boats at

the rivalries between shelkhs and for the political problems they faced inside their territories — tensions Britain exacerbated by trying to force something on them from outside. (Once they became inde-pendent of Britain some Emirates had all too little hesi-

tation in building new airports.) The period between about 1910 and 1940 was crucial in the evolution of the sheikhdoms that now make up the UAE. It saw the two most southerly Emirates, Abu Dhabi and Dubal, gradually build up their strength in different ways relative to the northern Emirateseven before the discovery of oil after World War Two.

Characteristics

It is much easier to appreciate the achievement of the UAE today if one knows the recent history of the sheikhdoms, their underlying tensions and the characteristics of their ruling families. That has for the first time been made possible by Rosemarie Said Zahlan in The Origins of the United Arab Emirates (Macmillan £10).

so called because of the truce treaties Britain signed with them from 1820 onwards-were who was responsible to the government of India — for a major aim of British policy in the Gulf was to safeguard the route to India.

The Political Resident had a Residency Agent based at Sharjah, an Arab—indicative of the indirect control Britain exercised. Britain wanted peace the curbing of the slave and gun trades and the exclusion of other powers from relations with the Trucial states.

But it did not profess to intervene in the domestic affairs of Abu Dhabi. Dubai. Sharjah, Ras
al Khaimah and Kalba.

Tempers became frayed in the
process because the officials
responsible had no sympathy for
the states on the coast, which
were allowed to keep their
traditional forms of government. However, it did not
hesitate to intervene on the coast when its own interests were involved (the traditional method of intervention was to send a warship to cow people into submission, either by its presence alone or by shelling a fort or capturing some pearling

dhews). Despite being mainly external, the British role had an important effect on the balance of power within the Trucial States: by curbing the sea power of the Qawasim who rule Sharjah and Ras al Khnimah it hastened the ascendancy of the Bani Yas, the inland tribe which provided the rulers of Abu Dhabi and, through a side branch, of Dubai.

Abu Dhabi had already become the most important shelhdom on the coast before Word War I, thanks to the decline of the Qawrsim and the 46-year reign of Shelh Zavid hin Khalifah of Abu Dhabi, who died in 1909.

Sheikh Zavid, Trandfather of the present Sheikh Zayid of Abit Dhabi, extended his rule over a number of inland tribes which Qgwasim.

Dhabi town itself. It had fallen by 1939 to 10,500, Dubai's rose from 10,000 in 1908 to 20,000 in 1939, while Sharjah's Ieli from

system of rule is the absence of primogeniture or any other fixed procedure of succession. As Dr. Zahlan says: "The struggle for power has thus been almost, a natural adjunct to the death, natural or otherwise, of a ruler. and successors have had to make sure of wresting complete control of the sheikhdom from their relatives before beginning to exercise absolute power."

Instability

She goes on: "Most of the rulers of Abu Dhebi and Sharjah (in the past 150 years) have been deposed or murdered: in Ajman and Umm al Qaiwaln just a few have: and in Dubai not one ruler has been formally

Instability, because of succession problems, hit Abu Dhabi after Sheikh Zayid bin Khalifa died, and much of his achievement was undermined. In the next 19 years four rulers came to power as a result of murder. Abu Dhabi knew no stability until Sheikh Shakhbut bin Sultan, eldest brother of the current Sheikh Zayid, established his position after he came to power in 1928.

Sheikh Shakhbut, who was peacefully deposed in 1966 by his brother because of his refusal to develop his Emirate with his newly-acquired oil revenues, has generally had a bad Press. "The worst cross I ever had to bear." Sir Hugh Boultead, a later political agent. called him — but from this book Shakh Shakhbut, who still lives at El-Ain, emerges as a shrewd and far-sighted ruler who restored Ahu Dhabi's position.

He successfully resisted Saudi Arabian attempts to encrosed on his territory and consolidated formerly had been loyal to the Abu Dhabi's control of Buraimi He stood up to the rigins of the United Arab Abu Dhabt was easily the British Government for several economy was a fair price to pay Sheikhah Latimirates (Macmillan £10). biggest State on the coast, years when it wanted to establish merely to save his position." (Sheikh Zayl-The book's principal sources though its population was the RAF landing and refuelling But he stayed in power because first cousin).

"THE SHAIKHLY families of the British Persian Gulf the Trucial Coast are . . . quite the stupidest people with whom the stupidest people with the stupidest people wit fleet off from the pearlbanks: and held out longest of the Sheikhs before granting oil exploration and production con-15.000 in 1908 to 5.000 in 1939. cessions in order to get the best A key weakness of the sheikhly terms possible.

And he saw before most of his contemporaries the importance of defined recognised borders between the Emirates. He reached a border agreement with Dubai in 1937 (the agreement did not last, however, and the two Emirates fought a war from 1945 to 1948).

The foundations of Dubai's prosperity were laid by the cur-rent Sheikh Rashid bin Said's grandfather, Sheikh Maktum bin Hashar, The Emirate was always built on trade, profiting from setbacks to other trading centres (notably Sharjah and Bandar Lingeh in Iran), and from a positive attitude to innovation (as in attracting steamer services which Sharjah was half-hearted about).

Dubai was, Dr. Zahlan savs: In the vanguard of economic and social transfor-mation of the Gulf for it was there . . . that a new merchant class who did not rely entirely on the nearl trade began to be The handover of formed." power from one sheikh to another was not always undisputed but up to the accession of Shelkh Said bin Maktum in Parallels 1912 there was no serious move

to depose a ruler.

But Sheikh Said, a genial and intelligent man, had difficulty controlling his relations and was dominated by his wife, Hussah bint Murr, and, later, his son, Sheikh Rashid. Hussah bint scale and held her own mailis town planning. (court) for mea, When Shelkh Said in 1929 ran into problems that to fighting "as his fellow rulers would surely have done," Mrs. Zahlan writes.

With such relatively practical traditions it is not surprising that Duba: was the first Emirate to build up modern administration that it is so proud of its lean efficiency today). But creek in Deira who were a source of almost constant difficulty in the 1930s.

Matters came to a head in 1937, Rashid (who succeeded his father in 1958), had a monopoly of the tax! service in Dubai and was incensed by competition from a cousin who ran his own service between Dubal and Sharjah. He collected 30 armed men and attacked the rival car, wounding its driver and putting some of the rival's men in the stocks.

As a result the people of Dubai, led by the al-bu-Falasah cousins of Sheikh Said, rose up and pressed for reforms, including a budget and civil list, with fixed allowances for the ruling family: better health care and sanitation: a police force: reorganisation of the customs department, and abolition of the monopolies held by the ruler, his wife and his son (which included ferry services, motor services and the unloading of ships cargoes).

One can draw parallels between the Reform Movement of Dubai and the disturbances earlier this year in Ras al Khaimah. A majlis representing the principal people of Dubai was set up and a number of reforms implemented, laying Murr was a remarkable women the administrative foundations who enaged in trade on a large of a municipality and starting

But the reformers suffered from confusion between lofty with his own majlis, which was ideals and the self-interest of a critical of his ineffective rule, group of al-bu-Fatasah. In he offered to resign, preferring March 1939 the majlis went too far when it decided that the income of 10.000 Rupees a year, as the seventh Trucial State, "He obviously did not think A coup was staged on the that the total disruption of the occasion of Rashid's marriage to Sheikhah Latifah of Abu Dhabi formally between 1924 and 1939,

As Abu Dhabians swarmed when Sheikh Sultan bin into Dubai the opponents of the Mohammed succeeded. ruler were defeated, a few of them killed and others driven into exile. The old mails collapsed, and Said re-established his power with a new onc. but the imprint of the reforms this came about mainly through stuck. In the autumn of 1939 opposition to Sheikh Said from Said had five people in Deira his cousins, living across the arrested for alleged plotting: they were tried and had their eyes put out with hot irons. It was the end of the Dubai reform

movement. Sharjah, once the leading sheikhdom on the coastline, was already in decline towards the end of the 19th century, thanks to the suppression of Qawasim seapower, family quarrels and the rule of the feeble Sheikh Sagr bln Khalid between 1883 and 1914.

Sharjah lost the support of the bedouin on whom it had depended. In 1921 Ras al Khaimah which had had de facto independence for many years was officially recognised as a Trucial State by Britain, and this and other setbacks led to Saqr's successor Khalid bin Ahmad being forced out of power in 1924.

In 1936 Britain recognised the 'separate status of Sheikh Said bin Hamad of Kalba, a former possession of Sharjah on the Gulf of Oman, in return for Kalba becoming an emergen landing ground for imperial Airways. This involved Britain breaking a solemn promise to Sheikh Suitan bin Sagr of Sharjah in 1932 that it would "do nothing to take away your lands from you."

Asked whether Sheikh Sultan bin Sagr would take umbrage at this. Colonel (later Sir) ters even if Shaykh of Sharjah takes umbrage." Kalba survived as an independent shelkhdom till 1952, the landing ground having become redundant and its ruling family enfeebled. ruler should have a fixed Britain then recognised Fujsirah Altogether, six towns

The game, in fact, has become very big business for the per-formers and all those peripheral individuals associated with them. As the world boom spread—and the sales of rackets and balls illustrate the point, from 7m rackets in 1973 to 13.5m in 1975, 16m in 1977 and 18m last year; from 10m dozen balls in 1973 to 13m dozen in 1975, 15m dozen in 1977 and 17.5m dozen last year—the players became ideal vehicles for advertising the products.

As they became household names their endorsement value increased accordingly. A leadstatus can expect to endorse products for a sum approaching

them-14 men and three women —it is hardly surprising that signs of pressure are there just promising young athletes are the same.

Inevitably all of this frenzied than taking up other sports which used to be more lucraere cleverer than tive. No other sport can offer thought. Gladys such rich rewards as tennis can d the eight players now provide and there are thought. Gladys of fich rewards as tennis can help and protection. Hence the eight players now provide and there are like Jean King and figures to prove it. Little Tracy entrepreneurial barons selling — who became consionals banned by sional only last October at the bidder. They control their or signing a token with Mrs. Heldman she won. By the end of 1978 lish new special events for them hat there would be she had accumulated \$59,625 to compete in—all richly rewarded. for women-only and this year she has already rewarded.

Virginia Slims brand, and now year-or rather after turning future health of the tournament professional in June - he amassed \$460,285 and by June 17 this year he had won another managers who understandably

> American teenage professional. Aged only 18, she won \$19,410 from 17 tournaments last year and so far this year her 14 tournament appearances have earned her \$42,613.

A worrying side-effect of the pressure on the young hopefuls is an outbreak of appalling behaviour particularly among the young 14-to-16-year-old Americans.

Gamesmanship

There are many cases of blatant gamesmanship—such as breaking the concentration of a ing player of Bjorn Borg's serving player-leading to ugly confrontations between the com-batants and their families which \$1m per year. Even an exciting is greatly worrying USTA newcomer like the black officials. This appears to be the Frenchman Yannick Noah can inevitable outcome of dangling command a racket contract a multi-million dollar carrot in alone for \$100,000. front of ambitious players and With the examples of 17 tennis-made millionaires before them—14 men and them. that stage yet in Europe but the

activity creates pressures and the young players growing up in tive. No other sport can offer this new world of big money need help and protection. Hence

game is constantly under potential threat. from the prefer the rich pickings of special events to the long slog of the tournament circuit.

The coaches, too, now play a vital role in guiding the young players through the dense undergrowth of the tennis professional jungle. Without Lennart Bergelin it is doubtful whether Borg would have achieved such phenomenal success nor would Vilas have become such an effective match player without the shrewd guidance of the burly Romanian Ion Tiriac. And Jimmy Connors may be suffering from the lack of advice which he once so readily received from Pancho Segura.

The latest transformation of potential into solid achievement through the help of a coach has been that of the likeable Paraguayan giant 25-year-old Victor Pecci. Ever since he started working last January with Tito Vasquez, the 30-year-old Argentine International, Pecci has been threatening to make a breakthrough. It came brilliantly two weeks ago in Paris, where, in successive rounds he disposed of Barazzutti, Vilas and Connors before losing a 4 set final to

That he should have been able to carry that winning form to a grass surface at Queen's spectrum the "golden oldies" Club last week by reaching the final again, where McEnroe beat thanks to the commercial possibities which tennis now presents a commencial possibite which tennis now presents to commencial wishing to ability but also for the sents to companies wishing to soundness of Vasquez's preparation. chance to see again Rod Laver and Ken Rosewall, Roy Emerson and Fred Stolle (who incidentally has become another successful coach, his charge being Vitas Gerulaitis) has proved irresistible to the tennis-mad public in America. We shall soon be seeing this group when they make a European tour in the autumn. They are due to play in Preston and at the

Royal Albert Hall.

usual this year. If you are one of the 350,000 people expected to visit the championships in the next two weeks, you will notice new buildings, four new courts on the north side of the Centre Court which are not yet in commission, and 1,100 new seats beneath the raised roof of the Centre Court. You will also be able to check your watches by super-accurate time - the many clocks as well as the digital display above the scoreboards on the Centre and Despite a growing awareness Number One courts are all of the need to join in the commercial race Wimbledon will a sign that the All England Club look very much the same as is keeping up with the times.

The profits from the championships, expected to exceed LTA for the good of tennis throughout Britain. The first priority must be to build the national training centre which Mr. Paul Hutchins, the national team manager, has for so long been pleading for and then a series of custom-built indoor centres dotted around the country. Only then can we expect British youngsters emulating their American and European competitors and becoming teenage millionaires. Having stated the need I have to admit that I shudder at the prospect.

Employee share schemes

Sir,-Mr. Baizert (June 19) makes the very fair point that "a company which distributes shares among its employees does so to secure their loyalty and greater interest in the company for which they work . . ." In doing so, the company is quite properly following its own interests, and is entitled to put what restrictions it will on the employees' right to dispose of

He should not, however, object to employees' wishing to hold other shares. This may represent a better investment for the employee, and the social effect is no different. It is therefore difficult to see the justification for tax privileges only for employee share schemes.

In the last Budget there were other priorities. Let us hope that in his second Budget the Chancellor will find room to broaden and rationalise the present tax concessions for employee shares into a tax incentive for anyone who is prepared to save rather

Mr. Baizert would then be satisfied; he could still give shares to his employees without their being liable to tax on their ffect on wage devalue. Many other sections of our nation would also be able to build a similar capital nestegg, even if they did not work in profitable private industry. Drake Wood."

Devonshire Avenue, Amersham, Buckinghamshire.

Patterns of

poverty From the Director, Child

Poverty Action Group.
Sir,—David Freud's article on Britain's changing pattern of poverty " (June 19) was welcome in drawing attention to the extent to which increasingly poverty is to be found among families with children. He suggests that the increase in the absolute numbers of poor is largely due to the raising of the official poverty line, as measured by the supplementary benefit scale rates. It is true that there onsibility. This was has been some improvement in not liable for damage to a basically undesirable; they image a recent report the level of supplementary parcel for which they are clearly introduce both complications in International benefit relative to average net earnings which will have affected the statistics, but it is ot just a "trade union unlikely to account for such a but a middle manage big increase and it partly rebig increase and it partly re-flects the growing tax burden s also a reflection of borne by workers with children. and ability of middle In any case, as the figures pre-

The most sensible reform would be to raise child benefit to the level of child support provided for claimants of unemployment and sickness benefit. That would require an increase of £1.70 at 1979-80 benefit rates. Unfortunately, the failure of the Government to increase child benefits in the Budget will make it more difficult in future to close the gap between child sup-port for those in and out of work. It was one of the most disheartening aspects of the Budget that, in office, the Con-servative Party forgot so soon its own previous commitment to improving the child benefits

Compensation for lost mail

From the Chairman, Post Office Users' National Council

Sir,—In his letter (June 18) about the Post Office's recently launched Postal and Telecommunications Codes of Practice, the Director General of Fair Trading describes them as "a major step forward" but criticises as "grudging" the compensation limit of £12.50 for articles lost or damaged in the ordinary mail. He also takes the Post Office to task for not providing compensation for con-sequential loss.
POUNC and the Office of Fair

Trading were closely involved with the Post Office in drawing up the codes and I agree with Gordon Borrie that they are a significant advance in relations between the Post Office and its customers. We did not succeed in persuading the Post Office on every point we would have liked to secure but we made some positive advances.

The codes spell out for the first time what Post Office customers are entitled to expect of the services offered and how to go about getting redress if things go wrong. Perhaps the most important advance is that Complaints Panel to which a customer can take a case which the Post Office has not resolved to his satisfaction. The existence of this independent arbitration procedure should go a long way towards improving the Post Office's approach to the legitimate complaints of its customers. It will no longer be possible, for example, for Post Office staff to tell a customer that, although he has packed it properly, they are

POUNC has up till now devoted much of its effort to advocating customers' cases in the hope of getting redress from the Post Office on an ex gratia basis. We expect that the codes will do much to influence and

present poverty line is hardly generous particularly in the case of families. Indeed, if as a growmess of things, redress will be The codes will be monitored

annually by the Post Office. POUNC and OFT. My Council unhesitatingly welcome the codes. They are a very good beginning and something upon which we can build in the light of experience.

John Morgan. Waterloo Bridge House, Waterloo Road, SE1.

Indexing tax rates

Sir,-It has been reported that the Inland Revenue may be prepared or are considering the application of Corporation Tax on the basis of inflationadjusted accounts on the Hyde or other agreed principles.

Reference throughout has been to Limited Companies and the inference has been that tax on inflation-reduced profits will only apply to listed companies. This should be strongly resisted for inflation affects the profits of all businesses, and. the taxation of inflation-

adjusted accounts is to be adopted, it should apply to small private companies, part-nerships and sole traders alike. But this would involve complicated accounting procedures possibly beyond the capabilities and the means of the smaller traders, and I would suggest that before such concession is made that a simple formula is arrived at applicable to all business. I have seen no satisfactory explanation so far of the

are purely an academic requirement of the accountancy profes Would it not be simpler to apply an annual inflationary index to all profits or to the appropriate tax rates?

need for inflation - adjusted accounts and suspect that they

Distorted incomes

From Mr. Edgar Palamountain Sir, - The argument being carried on in your columns between Mr. Frank Field and his opponents will have no conclusion because the participants are not starting from the same place. Mr. Field obviously thinks that what he would describe as the recent "concessions" given to higher income earners are excessive against the background of a maintained "tax allowance wel-fare state." Others would point out, however, that the benethere is now an independent ficiaries of these budget changes ("the rich") are still notably poorer than their opposite numbers in comparable countries. This is not so much because our top rate of tax is higher as because higher rates still cut in at much lower levels in the UK than in the U.S. Germany or France.

Most people would probably agree with Mr. Field (and with Sam Brittan) that the various tax allowances concerned are and distortions. But they along with the tax-avoidance industry — are an inevitable consequence of the ridiculously high rates of personal taxation which the politics of envy have imposed upon us.

Cover the World in

8 Days is a new weekly International Magazine with a strong Middle East flavour. It covers politics, economics and, of course, energy. The second issue is out now.

This includes an exclusive-how Pakistan got the H Bombwith secret documentary sources and an assessment of this new member of the nuclear club in a Middle East and World Context

Published and edited in London, 8 Days will have an editorial advisory board of foreign affairs specialists including Lord George Brown, former British Foreign Secretary; Sir Geoffrey Arthur, Master of Pembroke College, Oxford, an expert on the Gulf; Sir Frank Layfield, international lawyer, Alistair Duncan, head of the Festival of Islam Trust; and St. John

Armitage, a former diplomat in the Middle East. 8 Days is founded by H. E. Mohamed Mahdi Al Tajir and is independent of all governments or political groups, rare in publications in this field. With Riad Shuaibi, a major media personality in the Arab World, as Managing Director and Colin Chapman as publisher, 8 Days will provide the most informed view of world affairs from the Middle East.

For those whose business interests are linked to the Middle East 8 Days will be essential reading and 8 Days provides, at long last, a powerful and effective advertising medium. Get your secretary to send for 8 Days now.

UK COMPANY NEWS

Electra aims investment Norcros profit toward smaller companies tops £17.1m

THE directors of Electra Invest-ment Trust have adopted a policy of gradually switching out of market leaders nto smaller listed companies. The sort of company they are looking for is one in which there are uncrecognised opportunities growth or recovery, says Mr. B. P. Jenks, the trust's chairman, in his annual report.

The following companies have notified dates of board meetings in the Stock exchange. Such meetings are usually held for the purpose of considering dates of board meetings in the Stock exchange. Such meetings are usually held for the purpose of considering dates of board meetings in the Stock exchange. Such meetings are usually held for the purpose of considering dates of board meetings in the Stock exchange. Such meetings of the purpose of considering dates of board meetings in the Stock exchange. Such meetings are usually held for the purpose of considering dates of board meetings are usually held for the purpose of considering dates of board meetings are usually held for the purpose of considering dates of board meetings are usually held for the purpose of considering dates of board meetings are usually and the such dates of board meetings are usually and the such dates of board meetings are usually and the such dates of board meetings are usually and the such dates of board meetings are usually and the such dates of board meetings are usually and the such dates of board meetings are usually and the such dates of board meetings are usually and the such dates of board meetings are usually a policy of gradually switching out in his annual report.

He adds that the Board will try to accumulate significant stakes in listed companies in special situations which have not been recognised by the market. An investment will be made only if the Board feels it will make a significant impact on the port-; folio over a number of years.

The company is researching number of smaller companies in depth and if satisfied by this research it will be prepared to take a substantial minority stake. But the charman adds that "it is not normally the intention to buy these stakes to sell them off to a would-be predator, but rather to retain them on their investment merits."

On unlisted investments Mr. Jenks says it is becoming increasingly difficult to find pro-positions which combine an adequate running return and the possibility of substantial capital growth. But the company is happy to join other institutions in syndicates to acquire minority interests in private companies.

The group is also willing to nelp in cases in which a subsidiary no longer falls within its parent's corporate plan. Mr. Jenks explains that the parent organisation may come to them to help the subsidiary's management buy out the business from the parent. This would be done in such a way as to enable the directors to participate in the

During the past year the group continued its policy of investing in unlisted companies. Invest-menta totalling £4.34m were

for the year ended March 31,
1979 increased from £14.5m from
(£32.25m) and het current assets of £45.18m (£43.1m).

comment

Norcros has narrowly beaten its forecast of £17m made in February during its successful bid battle for Johnson-Richard Tiles, its second half pre-tax growth rate being maintained at about 18 per cent. The big factor in the year's overall improvement has been the £2m cut in losses in the consumer division, where Crittall Warmlife, the double glazing business, almost offset reduced losses of £1.4m at Hygena. Elsewhere the UK divisions have shown steady progress (except cranes) but the overseas operations have been held back by losses of around £1m in France and by difficulties in Nigeria. Meantime a higher tax charge has clipped earnings per share slightly. The company will include a pro forma company will include a pro forma consoli-dation of J-R in its annual report, and although exchange losses may have affected the tile company's performance last time, the new group is starting from a pre-tax profits base of some \$23m for 1979-80. Demand is buoyant in some important areas —in tiles, for instance, and in double glazing where the delivery time is 20 weeks—but it is worrying that Hygena is still only hovering around the breakeven point in strong market conditions. At 95½ the shares yield 7.6 per cent and the p/e ratio on almost a full tax charge is 6.6.

Brook Street on course for higher first half

The current level of job egistrations flowing into anches of Brook Street Bureau of Mayfair is the highest it has known, Mr. E. Hurst, joint chairman, says in his annual state-

If the trend coutinues, operating profit in the first half of 1979 should be substantially

Following rationalisation, the Australian companies should begin to move back into profit in the current year. As reported on April 27, taxable profits were more than doubled in 1978, at £1.91m

The chairman expects considerable growth in the specialist placement operations in the next decade, with development of the branches and services network.
"This should not preclude us from diversifying into other fields should the appropriate circumstances arise," he adds. It is proposed to introduce an employee profit-sharing scheme. Meeting, 116, Pall Mall, SW. July 16 at 11 am.

Time Prods. set for further growth

Trading at Time Products in the current year is at a most satisfactory level with the first satisfactory level with the first five months showing a considerable increase in turnover. Mr. M. J. Margulies, the chairman, says in his annual report.

He is sure the group will continue its record of profitable growth, keeping pace with all developments in its field.

In view of the Budget, the

In view of the Budget, the directors are increasing the final dividend from 4.8056p to 5.0207p

making a total payment for the year to January 31, 1979 of 5.5021p against 1.696p.

Pre-tax profits in 1978-79 increased from £3.87m to £4.9m on turnover of £31.9m, against £24.9m. A two-for-one scrip issue is also appropried.

is also proposed. Last October's rights issue raised £2m and has enabled direc-tors to continue the expansion

policy while minimising bank borrowings, the chairman says. The level of turnover has meant larger stockholdings but the increases required by current trading can comfortably be met from existing facilities. The group is also in a position to expand both by organic growth

and by acquisition.
Current turnover of the retail jewellery division shows a considerable advance, against the corresponding figures last year and while it is not always easy to find suitable sites, the group expects to have 99 shops trading by the year and by the year end.

Meeting, Connaught Rooms,
W.C., July 17 at noon.

Atkins Bros. seeks higher borrowing limit

Atkins Brothers (Hosiery) coutinues to raise its targets and will maintain its policy of re-equip-ping together with expansion where possible, Mr. D. Styles, chairman, says in his annual It is proposed to increase borrowing powers from £1.1m— the amount of the authorised

share capital—to £3.03m—the total of the issued share capital plus group reserves.

The directors say that although there is no need or plan to exceed the present limit, it could prove restrictive.

Meeting, Hinckley, July 12 at 1000

Thorn expands in U.S. with £13m acquisition

Thern Electrical Industries, one of the UK's leading electronics and television manufacturers, has acquired the Systron Donner Corporation of the U.S. at a cost of \$27m (£13m). The purchase has been effected

by a merger between Systron-Doner and a U.S. subsidiary of Thorn which has been recently The California-based company

is a manufacturer of test and measurement equipment, fire protection services and com-ponents. It established a small subsidiary in the UK in 1971, in Leamington Spa, Warwicksbire. The merger is part of the UK

company's programme of acquisi-tions in the U.S. In January it acquired a small company named Modutech for S4m. At the same time it is believed that negotiations for a larger company, Modular Computer Systems in Florida, have been delayed by an investigation into MCS accounts by the U.S. Securities and Exchange Commission.

Thorn said last night that it was continuing to investigate opportunities in the U.S. and that a fuller statement on the Systron-Donner merger will be made today.

PITMAN

The U.S. subsidiary of Pitman,

Education Today had assets of 30.9m as at June 30, 1978, and made pre-tax profits of \$129,000 for the year to that date. Considerably higher profits are forecast for 1978-79.

YOUGHAL CARPETS

Again we have achieved record profits, on this occasion a rise of 38% to £1.4 million. We are proud of the fact that the Group shows a return on capital employed of 40%. The ratio of stock to turnover as high as 13.7 is a fine defensive quality not to be found in many other industries. Our excellent ratio of current assets to current liabilities includes a good liquidity element and leaves Helene poised to take advantage of any opportunities for expansion which may occur.

Helene of London Limited

Our principal activities are design and manufacture of jashion leisurewear and textile merchanting.

up at 1½ per cent late to discount houses counts as a reserve asset without reducing eligible liabilities.

The of just over 12 when houses found ust upon them on igure day. At that aks were building up netary base by to discount houses counts as a reserve asset without reducing eligible liabilities.

Last Wednesday's sharp fall in call money seemed to be little more than a coincidence however, but the prospects for the next day looked less rosey.

Disappointing

The situation would have been much worse but for the disappointing response to the two gilt edged "tsp" stocks on

offer.

For many years the discount houses have been regarded as important operators in the gilt market, but until now no one has tried to make further use of their expertise. Some houses have already moved into the area of fund management. Gillett Brothers, perhaps because of the relatively small size of its pure discount market operation, has discount market operation, has seemed more interested than most in entering pastures new. At the weekend Craigmount Unit Trust Managers launched a

E DOLLAR SPOT AND FORWARD

per cent, but this will attract Corporation Tax, which is at present at a higher rate than the standard rate of income tax. Craigmount and Gillett Brothers feel that with sterling Gillett strong and London interest rates string and condon theres; races high, now is as good a time as any to start a gilt based unit trust. They are obviously hoping for a change in tax legislation, and think that the present Government is more likely to do so than the last.

RANCE

Change of deposit sum badly needed

BY OUR INSURANCE CORRESPONDENT

INSURANCE

Court in London Mr. Justice 144(1) rules that the compul-Smith awarded each of two road sory insurance provisions "shall accident injury victims damages not apply to a vehicle owned of over £125,000 apiece for the very serious injuries they had sustained — damages which will have to be paid by the motor superior concerned. insurers concerned.

Such awards are not yet a vehicle is being driven under statistical commonplace, but the owner's control." becoming much more common.
And if the average motor
premium is taken to be around £50, then insurers will have had to spend all of the premiums paid by some 5,000 motorists on those damages alone, without being able to allocate any part of those premiums for any other purpose.

Revisions

Looking back one must wonder at the foresight of the sponsors of compulsory motor insurance in 1930, in days when injury awards of £5,000 were exceptional. For at that time it l-was nevertheless decided that motor injury liability insurance must be unlimited in amount. This requirement has avoided the need for regular revisions of financial ceilings as motorists' liabilities have increased over the years and the value of the pound has fallen.

With unlimited injury liability, cover insurers have always had to have regard to the outside financial possibili-ties—in these days a multimillion pound potential, should a couple of coaches full of pas-sengers collide at speed, or a tanker full of bazardous liquid or gas explode in a busy urban

But with substantial solvency margins, the backing of adequate reinsurance treaties and with the assistance of regular premium rating increases, motor insurers are well set to mect demands for damages made by road accident victims.

Exceptions

there are a number of statutory exceptions, mostly in favour of depositors. All that is required local authorities, police and so is a simple three or four clause on: but there is one which Bill, which should not take up stands very much in the terms much parliamentary time, in which it was formulated in because of its non-controversial

ONE DAY last week in the High dates from 1972 and section £15,000, at a time when the

Yardstick

This sum of £15,000 was In fact fixed in 1930 and by any yardstick of assessment is clearly in need of substantial revision: indeed even before the war, in 1937, the Cassel Commit-tee put on record its thought that at that time the sum was scarcely sufficient for an acci-dent involving several severe

But over the years nothing has been done. In 1976 when the Labour government was trying to make insurers responsible for hospital charges, their drafts of their Road Traffic Casualty Bill contained clauses to amend the 1972 Act first by increasing the £15,000 limit to £150,000 and second by allowing the government to further increase this new level by statutory instrument. But nothing came of the proposal and since 1976 no attempt has been made to remedy the inadequacy of the deposit, which was made more obvious this week by the two High Court awards.

Minimum

Quite clearly if the deposit exception to compulsory insur-ance is to stand, £250,000 should now be considered the absolute minimum. Amendment of the absurd £15.000 is required because an increasing number of vehicle operators seem to be seeking ways and means (and the deposit is an obvious course) of avoiding paying their requisite share of the cost of motor insurance.

It is in the interest of all Exceptions

Although insurance is compulsory for the ordinary citizen. kitty to meet claims against time, nature and would probably win The present Road Traffic Act all-party support.

Ronson Board changes

sonnel and management services. Mr. John Godwin has relinquished his appointment. Mr. M. Buttery, Mr. H. Catterall, Mr. A. Tipping and Mr. O. Trigg become executive directors, from July 2.

Mr. N. M. Hudson, group adjuster of marine claims, Commercial Union Assurance Group. has been re-elected chairman of THE SALVAGE ASSOCIATION and Mr. J. A. R. Moller, Lloyd's underwriter, has been re-elected deputy chairman.

Mr. Gerald Hawksworth bas been appointed managing director of AIRGUARD, a member of the Lawtex Group, from July 1. He joined Airguard last year as deputy chief executive. Mr. W. W. Landauer, founder of Airguard, has relinquished the responsibilities of chief executive but remains a director of the com-

Professor John Small, head of the Department of Accounting and Finance at Heriot-Watt Uniand Finance at Heriot-Watt Om-versity, and Mr. Alexander Stone, a banker and partner of Alexander Stone and Co. have joined the new advisory board to DOUGLAS LLAMBIAS ASSO-CIATES in Scotland.

Mr. Anthony Read is to be director of the Book Development Council, the international division of the PUBLISHERS ASSOCIATION. Mr. Read is currently the international marketing manager of the Oxford University Press. He will move to the Book Development Council in September. The Council is responsible for developing the market for British books throughout the world.

Mr. C. D. Malmaeus has been made assistant manager, Europe, Middle East and Africa, London regional office and Mr. N. R. Gibson appointed managing director, TORONTO DOMINION INTER-NATIONAL BANK,

Potter, as regional manager, south region; Mr. J. Monaghan, as regional pensions manager, south region; Mr. A. J. Tiller, as regional pensions manager, Scottish region; and Mr. D. A. Pitkethiy, as area pensions manager, Glasgow. pensions manager, Glasgow.

Mr. Allan Griffin is the new Mr. Allan Griffin is the new food group marketing controller of the NORTH EASTERN CO-OP which last year had a turnover of £54m in its 300 food stores. Mr. Griffin, was previously service trades controller at the Co-op and succeeds Mr. John Beer who recently left to pursue personal business interests. personal business interests.

OFFICE INTERNATIONAL
LEASING has been formed as a
member of the Office International Group (OIG)—an office
equipment group. It will provide
the 110 office equipment sales
subsidiaries and branches of the
group with leasing facilities.
Chief executive is Mr. R. W.
Forsyth, who prior to joining
OIG, was Scottish manager for
Hamilton Leasing. Other
directors are Mr. L. E. Sculthorp
and Mr. W. C. Gillespie, respectively chairman and financial
director of OIG; and Mr. J. D.
Butler, managing director of
David S. Butler—one of the
group companies. group companies.

again expressing concern last week at the manner in which the primary market in dollar bonds was functioning. While What continues to attract dealers were trying to cut their

between lead managers and underwriters could take on a sharper tone. With the EIB preparing what many believe will be a form of public tender bidding for the next issue it wants to float, the coming week

could prove eventful.

The FRN sector of the market remained active but prices weakened as the volume of new on offer increased

By FRANCIS GHILES

In the DM sector prices moved up by average of 1 point across the board with more activity reported by dealers than at any time in the past month and a half. The market in Swiss franc bonds mirrored this movement. The capital markets Sub-Committee will meet on Wednesday to decide what volume of new D-Mark issues can be accommodated

next month.

Some German bankers now feel that because of the instability in the currency markets it would be wiser for this Submmittee to meet every two weeks and set a calendar for that length of time rather than operate on a monthly basis. Whatever the outcome on this particular point, a doubling of new issues to DM 400-500m is widely anticipated.

In the Swiss franc sector, the Republic of South Africa is making what is believed to be the first private placement for at least three years, through Swiss Bank Corporation. The amount is SwFr 100m for five years and the borrower is paying an interest rate of 51 per cent with pricing at par. smaller private placement for a South African State company is expected to be arranged through UES early next month.

reach levels where British industry will be increasingly uncompetitive in export

London financial markets speculate that various steps could be taken to restrain sterling—such as accelerated dismantling of outward exchange controls on UK residents, new controls on inward flows or accelerated repayment of extensive amounts of foreign debt undertaken by Britain in recent years. latest sale of one-year Treasury

By historic standards, sterling seems vulnerable to a sudden outflow of these high foreign accumulations, since much is clearly of a short-term specula-

But Britain's currency reserves, at some \$22bn, are deemed-sufficient to prevent any currency major disruption should overseas funds leave London suddenly.

BOND PRICES are holding the Comparable industrials yielded no further narrowing in the gains they notched up since late about 9 per cent. There was a differential between U.S. and May thanks to a stream of data slight weakening in the muniforeign interest rates. suggesting that an economic cipal bond market. The Dow slowdown is at hand. But the Jones yield index moved to

rally lost some of its nerve last 6.8 per cent from 6.7 per cent week, not so much because of a week earlier. doubts about where the economy These changes took place against the mounting certainty is heading, but because of the pall cast by the weakening dollar and the forthcoming that the economy has reached the peak of its latest cycle. All to both its Fed has stuck a slackening in demand and production. Meanwhile, the discount rates, short-term gasoline shortage has finally sharpest drops. The prime was

sharpest drops. The prime rate is now almost universally 111 per cent and three months expected to push interest rates down, the market has shown a Treasury bills closed last week marked resistence to weakening at around 9 per cent. The bond price trends.

One reason is the recent sethills went at an average 8.83 per back for the dollar (caused in cent, the lowest since last part by the drop in U.S. interest rates) which virtually guaran-But other sectors of the tees that the Fed will not market have become more wary change its monetary posture in the immediate future. Indeed, in the last few days. Long-term corporate bonds were either virtually unchanged or mixed any downward shift in the Fed funds or discount rates has been ruled out by the market, parover the week. New top grade ticularly in the light of Treasury utility yields hovered around 9.15 per cent on medium-term Secretary Michael Blumenthal's ing of inflationar issues and 9.35 on long term. remark last week that he saw credit demands."

The OPEC meeting also poses a major question mark over the proceedings, both because Saudi Arabia has given conflicting signals about its intentions, and because Wall Street finds it hard to predict the impact of massive oil price rises on the credit markets.

In the short term, the markets pose investors with a test of nerve. Some of the data due out this week could ease their predicament: the consumer price index on Tuesday, U.S. foreign trade on Wednesday and the May leading indicators on Friday.
In the longer term, though,

prospects are getting clearer. Mr. Allen Lerner, economist at Bankers Trust, summed them up as follows: "While the markets may continue to digest some of their recent gains, focusing on the dollar and the latest burst of monetary expansion, the longer-term signs point to a week economy and. further down the road, a slacken-

The group has adopted Accounting Standard 15 and consequently, there is a substantial drop in the tax charge. The 1977 figures have been re-stated.

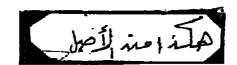

- Union Minière The profits were lower due to reduced turnover and interest receivable as a result of further investment in North America which is not yet revenue-producing.
- Benguela Railway Subject to interruptions, local traffic was maintained in 1978, but although normal relations have been resumed between Angola and Zaire, no international traffic was carried
- Elbar Industrial Despite strikes and bad weather the profit increased. Tanks now owns 70% of Elbar.
- Tanks Oil and Gas The P/6 gas field offshore Netherlands will enter development phase next year.
- Tanaust Exploration results from the 9.1% interest in the Ashton Venture in Australia are

While developments in the North Sea and Australia are encouraging, and it is hoped that conditions in Angola will improve, income from these sources cannot be expected for some time. Under these circumstances no significant change in revenue can be assumed for 1979.

Yugoslavia

In world affairs Yugoslavia, under the active leadership of President Tito, is leading the struggle to preserve the genuine independence of the non-aligned nations movement. At home steps are being taken to stabilise an overheated economy, while the principle of collective leadership has been further refined in preparation for the post-Tito era.

ldle rse

it socialism at home aught with considerculties in recent

to resist any possible attack on its achievements," he said. This is not to say that Yugoslavia is suffering from a lager complex—the atmosphere is

But relations with the Soviet Union, from whose embrace Yugoslavia broke away in 1948, are currently as strained as at any time since the aftermath the Warsaw Pact invasion Czechoslovakia in 1968. Although very few Yugoslavs believe that the Soviet Union would ever physically attack Yugoslavia, the assumption is that the Soviet Union very ant abroad and self-much desires access to the Mediters are stated to the Mediters access to the much desires access to the mediters. Mediterranean and the ideological satisfaction which would come from the re-integration of Yugoslavia into the Soviet bloc. It is this belief more than

t it sees as Soviet- any other factor which under-uban efforts to split lines the tough, if not ruthless, gued movement. At methods which the Yugoslav security forces are prepared to use to suppress what they define as nationalist extremists and others who, they believe, could be used by foreign powers to divide and weaken federal

It is a powerful argument and has been used to justify sup-pression of both Stalinist pro-Moscow and nationalist factions, as well as liberal advocates of by respecting the legitimate aspirations of the six nations and 18 ethnic groups which make up this extra-ordinarily complex country. But this has not satisfied the

various anti-Communist and nationalist emigre groups who have been waging a terrorist

diplomats abroad. Up to now Yugoslav authorities feel they have not received as much support as they deserve in their attempt to secure the extradition or suppression of such groups by the governments in whose still one of relatively affluent

territories they are based. Although 87 years old last month President Tito is still mentally and physically active continues enormous prestige at home and abroad. The mechanism of collective leadership on a revolving basis aims to institutionalise the succession, but in the meantime President Tito remains the final arbiter within and above the system.

At present his main pre-occupation is that of heading off attempts to split the nonaligned movement at the noneligned summit meeting in Havana in September. To this another round of strenuous personal diplomacy.

Impress

This included a "friendly working visit" to Moscow last month in an effort to impress upon the Soviet leadership Yugoslav concern about Cuba's attitude towards the non-aligned movement and a multi-party system. Yngoslavia atmosphere of Yngoslav-Soviet has probably gone as that as it relations. This was soured possibly can in its efforts to initially by Chairman Hua secure the unity of Yngoslavia Guo-Feng's visit to Yngoslavia. Romania and Iran last August and Yugoslavia's subsequent stance over the South East Asia situation.

Yugoslavia was deeply critical of Vitenam's invasion of

President Tito of Yugoslavia

Chinese invasion of Vietnam's Malta shortly after his return own border areas to the original from Moscow. act of aggression by Vietnam. On both accounts the Soviet Union strongly criticised the Yugoslav attitude.

Yugloslavia's determination to pursue its own independent non-aligned policies President Tito has also been actively seeking the support of Arab countries for the Yugoslav view of a genuinely non-aligned movement. To head off a threat to the movement posed by Arab determination to expel agoslavia is prepared campaign, against Yugaslav State, and linked the subsequent to visit Libya and Algeria plus achieve.

It is not yet clear whether Yugoslavia will succeed in keeping the movement both united ugoslav attitude.

Apart from trying to impress the level of Yugoslav commitment reflects the fact that if the Union movement were to split at Havana it would immensely complicate Yugoslavia's own position.

By playing an active role in the affairs of the 86 nation grouping Yugoslavia has gained an influence which is vastly greater than a developing nation of 22m inhabitants be-Cambodia, seen as yet another Egypt, President Tito visited longing to neither of the great Soviet-backed interference in Iraq, Syria, Kuwait and Jordan power block could otherwise the internal affairs of another last February and then went on have realistically hoped to

Membership of the non-slavia's sole political party. At aligned movement has provided the party congress last June ideological and practical support for Yugoslavia's efforts to retain its independence and pursue its own form of self-management socialism at home. In Yugoslav eyes the two are inextricably linked-hence President Tito's commitment to try to preserve the framework of genuine nonalignment as a continuing basis for the continuation of Yugoslav independence under his suc-

Paradoxically, however, President Tito's vigour and longevity also has its problematic aspects. One is that he is outliving his

The death of Mr. Edvard Kardelj in February removed not only the main ideological architect of Yugoslavia's four post war constitutions and the theories of self-management but also the only man to share with President Tito the status of an all-Yuzoslav figure. The other leaders of the so-called partisan generation like Vladimir Bakaric of Croatia or Petar Stambolic are all connected with their individual Republican backgrounds.

Since the death of Tito's heir apparent there has been a noticeable shift in ideological direction. Less and less is heard of Kardelj's theory of the plurality of self managing interests. The emphasis has shifted towards collective leadership.

Under the 1974 constitution the supreme organs of both the Yugoslav federal state and the individual resublics and autonomous provinces are all con-trolled at the top by collective presidencies whose chief executive is rotated annually. The principle also extends to the League of Communists, Yugo-

IF YOU ARE SEEKING NEW BUSINESS VENTURES COME TO

PRIVREDNA BANKA ZAGREB

S. F. R. Yugoslavia and S. R. Croatia have embarked on a new Five-Year Plan which will bring a sharp upsurge in industrial and agricultural production, foreign trade and investments. Yugoslavia is an area of major economic importance—a large consumer market based on an estimated growth of the economy in the years to come.

Investments in all major fields — from oil and gas exploration and production to petrochemicals and chemicals - from hydro to nuclear powers stations - from agriculture, tourism. communications to electronics.

All these provide many business opportunities, from trade to co-operation in industrial technology and joint ventures. Trading with Yugoslavia also provides excellent opportunities for trading with third world countries.

Privredna Banka Zagreb is here to help you. As the leading medium and long-term credit bank we are the bank of the major Croatian companies and are involved in the largest and most refined projects. Consequently, if you wish to do business with Croatia, it will be to your advantage to consult us first. We are the best people to tell you about business opportunities in the booming Croatian economy.

THE BANK THAT KNOWS CROATIA BEST

RESULTS IN 1978

ENERGOINVEST's business activities are spread throughout Yugoslavia, and with increased participation in Yugoslav economic international relations, all economic developments within Yugoslavia and worldwide have had a significant impact on ENERGO-INVEST'S business during the past year.

The 16% growth in production and the total income increase of 29%, accompanied by a smaller increase in expenditure, resulted in ENERGOINVEST's total gross profit increase in 1978 of 33% compared to 1977. Productivity measured by the physical volume of production per worker, went up by 8.2%.

The major contributory factors to this growth were: the concentration of highly skilled personnel in the two separate divisions of ENERGOINVEST; ENERGOKOMERC and ENERGOPETROL, as well as

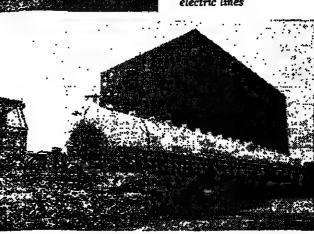

Pylon for long distance electric lines

stages of completion and

projects on the turn-key

principle. All these

factors are also the

guarantee of further expansion by ENERGOINVEST at home and abroad.

The already obtained international contracts to be carried out in 1979 amount to 6,725m dinars (US\$355m). These contracts include complete pylons for long distance electric lines, the manufacture of various fittings, design, engineering and consulting services, alumina, gas separators for

nuclear power stations, a comprehensive range of electrical equipment, transport installations, etc. In the home market, 65% of the planned turnover for 1979 is already contracted.

Abroad, ENERGOINVEST had business dealings with countries of all five continents. Total exports amounted to 4,015m dinars or US\$212m.

Expressed in percentages the greatest part is related to Arab countries 33.8% and Comecon countries 31.1%. This is followed by Asian countries 18.4%. Africa, 11.3%, North and South America 4.3% and Western Europe 1.1%.

A substantial part of these exports are gas separators for nuclear power stations and the family of high voltage breakers with SF-6 gas as the medium for extinguishing the arc. This is a new product and is regarded as one of the world's greatest technical achievements in this field.

The scientific research and product development in ENERGOINVEST has a direct bearing on the results achieved so far by ENERGOINVEST as a whole. The best proof of achievement at this high technical and technological level is the fact that ENERGOINVEST sells its own licences in the field of electrical industries and automation to reputable companies in the highly developed countries of Holland and the USA. The scientific research and product development personnel are concentrated in nine ENERGO-INVEST institutes. They represent also a strong link with scientific institutions outside ENERGOINVEST. In that sense, four ENERGOINVEST institutes have concluded with the Academy of Science and Art of Socialist Republic Bosnia and Herzegovina a selfmanagement agreement concerning mutual rights and obligations, thus the Academy became a co-founder of the institutes.

The results of the past year were achieved through the efforts of 36,634 workers of which 53.6% possess highly skilled technical and professional qualifica-

Although the structure of the qualifications of ENERGOINVEST workers is on the whole satisfactory, a great deal of attention is paid to the continuous and permanent education of workers in order to enable each worker to perform successfully his function in the self-management system and as a member of the Yugoslav socialist society.

Further information may be obtained from: Public Relations Office, Energoinvest, POB 158, 71000 Sarajevo, Yugoslavia, and Energoinvest London Office, Imperial Buildings, 56 Kingsway, London WC2B 6DX.

investment projects have been started without adequate cover. Henceforth financial enterprises will have to demonstrate that they can provide 25/30 per cent of the total cost of the investment from their own internal resources and have credit guarantees from the banks covering the rest. Obtaining these guarantees will be extremely difficult within the present monetary and credit guidelines and only top-priority projects, especially those with a guaranteed export earning potential, will be approved. Many existing investment projects are now grinding to a halt or being slowed down

Subsidies on food and other essential items are also being phased out purchases taxes have been increased on luxury items and much tougher hire purchase terms have been applied to cars and a wide range consumer durables. With an eye on burgeoning oil imports the Federal Government has also introduced new petrol saving measures including the second rise in petrol prices within six months, speed restrictions and a ban on driving for one day per week and one weekend The Government hopes to save 300.000 tons of petrol and 500,000 tons of oil products this year in this way.

warned that an economic crisis would make it more difficult for Yugoslavia to continue along its chosen path of independence

Negated

At the same time enterprises complain that their theoretical rights over the distribution of income they produce have been largely negated in fact by the demands placed upon them by local and state authorities and the so-called communities of in-terest. These complaints are now being listened to.

Thus while the enterprises themselves are under pressure to restrain the growth in personal incomes, a ban has been placed on construction of new buildings for the various bureaucracies and the self-managing organisations which run the hospitals, schools and other social services are being obliged to freeze their budgets after a lengthy period when social spending outstripped the growth in GNP generally. The net effect of these measures is expected to reduce claims on the enterprises and improve their retained profits. Failing this, the credit squeeze will have a much fiercer effect than anti-

The hope is that restrictions now will allow resumption of more stable growth in 1980. With over 12 per cent of the labour force and some 730,000 people unemployed, and mil-

in agriculture Yugoslavia needs resources supplying them. Thus rapid economic growth to ensure both higher employment and the kind of infrastructure and other investments required for its transformation into a fully modern economy. Economic growth is also essential if progress is to be made in reducing the enormous regional im-

balances. Slovenia, the most developed republic, has a per capita income which is nearly seven times higher than that of Kosovo, the largely Albanian speaking autonomous province in the south. Furthermore the gap between the rich and poor regions of the country appears to be increasing—in spite of loans and straight transfers from the developed regions.

Fortunately the poorest regions of Yugoslavia also tend to be those with the greatest mineral and energy resources. Under the Yugoslav system of self-management agreements enterprises which use power are expected to contribute to the

tougher restrictions on new degree of political exhortation, lions more still under-employed development of specific power-investment. Hitherto many President Tito himself has in agriculture Yugoslavia needs resources supplying them. Thus enterprises in Slovenia or Croatia are investing in new power and raw material prolects in the less developed regions. Kosovo in particular is also trying to interest foreign investors in the development of electricity for export based on lignite fired power stations to be built on the extensive coal deposits found in the province.

The next five year plan, now under preparation, will continue to give priority to the develop-ment of raw material and energy sources, transport an other infrastructures and agri culture. It presumes a continuance of strong rates o growth into the 1980's. Before getting there however the economy currently faces one o those sharp squeezes which have been a characteristic inter mittent feature of the economy over the last decade. At uncomfortable few months ii

leaves President Tito standing head and shoulders above every institution and everybody. Beneath him an elaborate system of checks and balances is designed to prevent either the emergence of a strong individual or excessive claims by any of the republics. In theory, the system will continue functioning rather like the Swiss constitution with presidents politely rotating annually and committees of collectively responsible leaders harmoniously continue communications and committees of collectively responsible leaders harmoniously seeking compromise solutions to

But Yugoslavia is not Switzer-land and even though Yugoslavia has changed enormously over the last 30 years through political change, industrialisation, urbanisation and education it is still ultimately a Balkan federation capable of eruption into fierce passions if ever the circumstances should get out of hand.

It is arguable that the best guarantee against such an eventuality is Yugoslav awareness that if they do not hang together "they risk hanging separately." Thus the creation of a genuinely federal state with devolution of considerable political and economic powers to the republics and to the self managing enterprises and other organisations has been paral-most Yugoslavs are enjoying leled by the strengthening of the fruits of what is a relatively the military and the successful consumer

Republican and party level central bank and federal chamber of the economy in the economic sphere, form the vertebral structure of the otherwise devolved system. Taken together their functions are to preserve Yugoslavia's territorial integrity, ideological loyalty to self-management socialism and economic stability.

Alarm

Over the last year the latter has been giving cause for alarm. President Tito himself has warned that economic growth under stable conditions is vital for Yugoslavia's continuing independence. But the economy has shown clear signs of overheating in recent months with over-investment and sharp rises in personal incomes sucking in imports and leading to more than 20 per cent inflation. The earthquake in Montenegro also caused widespread damage worth hundreds of millions of dollars while drought has also severely damaged agricultural prospects this year. In order to down the economy deflationary package has been put together and Yugoslavs are being called on to tighten their

In spite of current and perspective problems, however, security forces. These two insti- created out of an original tutions, together with the mixture of Western technology league of communists plus the and Marxist-inspired

Socialism. Yugoslavia it seems to work But Yugoslavs freely admit that the system is not perfect. Progress towards reducing the huge gap between the most developed north and still relatively under-developed south is proving much slower than originally hoped for. Last year over 100 strikes broke out, and many enterprises and communi ties of interest continue to invest far more than they can afford and pay higher wages

than economically justified. For the last year Yugoslavia and the EEC have been involved in difficult negotiations for a new five-year trade agreement. At the same time Yugoslav military leaders have also estab lished closer contacts with the Western defence establishment through a series of top level visits and meetings between Yugoslav and Nato military personnel. The U.S. has agreed to sell more defensive arms At the same time, however, economic relations with Come con are also developing and Yugoslavia has no desire to join either of the military or economic blocs.

It would hate to find itself in the situation where it had choose between one side or the other. Hence the current emphasis on maintaining the independence of the non-aligned movement and creating the political and economic conditions for a smooth transition of power in the post-Tito period, self- whenever that may be.

YUGOSLAVIA III

Rising trade deficit forces more borrowing abroad

economy generally

of the hoped for im-: final figures showed ar, however, imports ent to \$1.9bn. This

ng the authorities to precisely to head off this evencurrent round of re-tuality that the Government has aimed at damping imposed the restrictions which should lead to an improvement mand for imports in in the trade account over the cond half.

The bulk of last year's deficit in the trade deficit was with the developed western final figures showed countries and nearly 60 per cent eficit which was vir-tical to the previous Of the total deficit with the the first four months EEC of \$2.53bn West Germany at \$1.33bn accounted for more than half while the most favour-able trading relationship was with neighbouring Italy where e saw the export Yugoslav exports covered 64 p only 47 per cent of per cent of its import bill.

Negotiations with the EEC my 57 per cent last over the proposed new five-year European goods of all kinds but ese trends had been sui generis agreement have not is denied the means of paying

intermittently for more than a year and with a new round of stagilation on the horizon the chances of a significant breakthrough do not look too promis-

general words of encouragement and recognition of Yugoslavia's on specific promises of easier access for a fairly lengthy list of Yugoslav industrial and agricultural exports. Like so many operation shows that the Yugo other countries trying to break slav credit rating is still good: into the EEC market, Yugo-

obliges Yugoslavia to rely heavily on export credits and other loans. The gross foreign debt amounted to around \$11bn at the end of 1978 and reserves Seen through Yugoslav eyes at \$3.2bn. Since then, however, the EEC has been long on reserves have been run down to reserves have been run down to around \$2.5bn, but recent borrowings of \$300m from the IMF, the \$660m financial package associated with the Davy Loewy steel plant contract and a suc-cessful debt restructuring operation shows that the Yugo-

Financing a deficit is all well slavia resents the fact that it and good but arriving at a more is a major market for West balanced pattern of two-way and good but arriving at a more trade with the Community is the top marrity for Yugoslavia.

VIA'S DETERIOR- allowed to continue the overall been progressing as quickly or for these imports by access to Trade with the developing or at least drive a hard counter-reign trade position 1979 trade deficit would have as well as originally hoped. They export markets in the Community.

Trade with the developing or at least drive a hard counter-countries is stagnating at trade bargain where possible around 15 per cent of the total Suppliers of capital goods will be a supplier of capital goods as against the 25 per cent target in the current five-year plan -while Comecon accounts for around 34 per cent. Comecon takes 42 per cent of Yugoslav exports and 29 per cent of Yugoslav imports come from this

Obliged

This proportion is already as high as Yugoslavia wants to see but it may be obliged to increase Comecon trade further particularly as the recentlyagreed multi-national tariff reductions reduce the already limited preference accorded to Yugoslav goods in the EEC market under the generalised system of preferences. The entry of Greece into the Community is also expected to make it harder to compete in this small but useful market while the eventual adherence of Spain and Portugal will add two further competitors to Yugo slavia's export range.

Understandably Yugoslavs are worried, especially as they face a higher oil bill and the sort of resurgence of tectionism which could well intensify if or rather when another round of stagflation hits the world economy.

Importers are bound to find the Yugoslav market much more difficult in coming months as Yugoslav enterprises are encouraged to substitute imports

Suppliers of capital goods will also be asked to include a higher proportion of Yugoslav made goods in their equipment and be willing to examine the possibility of co-operation in third country contracts.

Consumer demand for impor-ted goods is also being curbed by higher consumer taxes and by a combination of high infla-tion and a squeeze on incomes.

Hitherto the self-manage ment communities of interest for foreign economic relations, which have been established in all republics and provinces as the bodies responsible for en-suring the balance of payments targets, have not worked as efficiently as expected. There is still some confusion of roles between the communities at a local or republican level and the federal secretariat for foreign trade, and the federal chamber of the economy. As the fight for foreign exchange gets flercer there is bound to be some acrimonious arguments over priorities as projects in volving imports are subject to competitive scrutiny.

The hope is that exporters will grasp the nettle and seek to ease the foreign exchange situation by increasing their own foreign currency earnings instead of relying too heavily on the more profitable domestic market which they have tended to do over the last two years.

This suspicion of centralism and the belief that the Yugoslav pattern had to be one of "unity in diversity" was one of the factors behind the Yugoslav Communist Party's rejection of the Soviet-inspired model in 1948. Since then the process of devolving economic power to self-managing enterprises and political power to the six republics and two autonomous provinces has continued apace.

The path has not been groups as the gypsies, who have smooth in 1971 an outbreak of their own fiag and are probably what is now termed "nationalist better treated than anywhere euphoria" broke out in Croatia else in Europe.

Thus each republic and autonomous province sends one representative to the nine-man partisans who took power at the partisans who took power at the end of World War II the prewar Yugoslav State was too centralised and too Serbdominated to create either a dominated to create either a man collective Presidency of the League of Communists Committee, the highest party organ.

At the same republics have their own separate Parliaments and institutions and are responsible for a wide range of services. They even have responsibility for their own balance of payments. Throughout Yugoslavia the six nations and 18 linguistic, cultural, religious and other groups have rights of selfexpression — including such

This devolution of power and tion, construction of a modern mutually advantageous developresponsibility on a political road, railway and air network, ment of energy resources in possessed by the self-managing of a consumer society have done

main areas of Federal responsibility. Overall equilibrium depends on an infinitely complex process of inter-republican and inter-enterprise discussions which are organised on a system of elected delegates who are mandated to represent the views of their particular constituency-whether social or political.

League

Apart from the army and the security forces, the other main Yugloslay-wide body is the Communists-League although even this is also organised on a republican and provincial basis with the same kind of collective leadership as functions at the Federal level. Under this highly complex

and original system Yugoslavia has managed not only to develop politically and socially but has also gone through a profound process of economic change. Although the average income of Slovenia is still the spread of educa-

Davy Loewy for the Smederevo

But Serbia, along with all the other parts of the country, is now having to shelve several of its long term infrastructure of \$561 in spite of the fact that investments, or at least to slow climate improves.

Thus work is slowing down on the much needed motorway through to the border with Greece and on reorganisation ies and has been largely re-built and re-routeing of the Belgrade railway network, including construction of a new railway station. Two sugar refineries and other industrial projects have also been held up by lack and through the centralist phases of the Tito era, the comthe demands of a rapidly rising most populous state in the population.

countries largest enterprises are

Where only small-gauge rail-ways existed there are now normal gauge electrified lines connecting all industrial centres. At Ploce, a Dalmatian town on the territory of Croatia, Bosnia has developed its own port integrated in the Bosnian transport system. Where there road there are now several thousand kilometres of modern roads, connecting all communes of the republic. The construction of the first motorway is in progress, partly financed by the IBRD.

The biggest iron and steel complex in Yugoslavia is at Zenica, in Bosnia, with close to 40,000 workers. Its iron ore mines also supply other domestic iron and steel complexes, coking plants, several iron and steel mills, rolling mills and other processing units. Annual production approaches 2m tonnes of steel and the same quantity of rolled products.

Forests

Bosnia-Herzegovina is also the home of Sipad, Yugoslavia's largest forest and timber product's industry with some 65.000 workers. It exploits 23 per cent of all Yugoslav forests and accounts for a high per-centage of various semi-finished and finished wood products. Sipad has also been one of the biggest Yugoslav exporters, selling a quarter of its output Energoinvest Sarajevo is another. Bosnian which deserves firm mention. It has a reputation as the first Yugoslav conglomerate. It covers a wide range of activities, from oil and gas exploration and processing, of Yugoslavia and being the gas exploration and processing, central battlefield of the and non-ferrous metals exploitanational liberation war for four tion to manufacturing of years it was completely deva-stated in 1945. It has probably ment. Energoinvest has been a successful exporter and is in a way a multinational corporation, with several firms abroad. UNIS of Sarajevo is another republics, but mainly through major industry which manufac-

organised its agriculture and firms as Olympia, for type-made big strides in culture. writers, calculators and office equipment, SKF bearings, Singer gas meters, NCR cash registers, LM Ericson telecommunication equipment and others. Soko of Mostar manufactures training and combat animal farming, orchards and jets with Rolls-Royce engines.

> Krajina or Hepok have been among the biggest and most agro-businesses in Yugoslavia. They have revolu-tionised Bosnian agriculture. Formerly backward peasants mere 1.2 per cent. are being turned into modern small farmers who produce what is needed on the market as told by experts of the large combines.

Now Bosnian farmers can produce enough food not only to satisfy own needs but also some surpluses. However the leadership still

feels that their republic is not making full use of its rich instead of selling raw materials and energy to others it should not been immune to economic

problems plaguing Yugoslavia. Last year investments were 30bn dinar above plan. In 1979 some 17bn dinar worth of investments have been started without secure funding. Some projects will have to be postponed or abandoned like the third stage of the Zenica ironworks con-struction, the 380 kV power grid and some hospitals and schools. But the main problem facing the Bosnian leadership is to persuade the other republics that it should still be a major beneficiary of federal development funds over the life of the next five-year plan. In spite of the impressive strides made so far the per capita income of \$1,232 still makes it one of the developing areas of Yugoslavia. By the end of the next fiveyear plan however it hopes to be much closer to the federal

which formerly existed. The republics contribute nearly 3 per cent of their income in the form of loans and credits to various regional development funds. Some YD27.8bn, around \$1.4bn, will be spent this year

on projects aimed at bridging the wide gap between the industrial north and formerly backward southern regions. As Italy and other countries with similar problems have shown, this is a much longer and more complex task than originally perceived. But the will to reduce the gap is there—and much originality is shown in trying to link, say, the energy

needs of Slovenia with the

less developed areas. It is all part of the policy of creating much to event out many of the a sense of national unity of enormous cultural differences ригрозе.

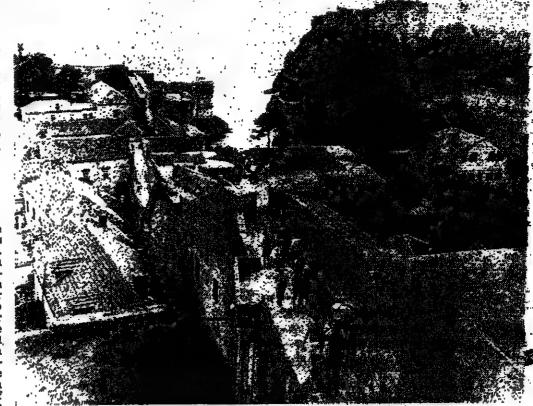

Younger people in particular are far more ready to describe themselves as Yugoslavs than were their parents. Greater physical and social mobility has also led to greater population more mixed Only a small shifts and marriages. Only a small proportion of Yugoslav citizens write Yugoslav on the entry line in their passport asking their nationality. But the freedom to remain, say, a Croat or a Serb or a Moslem within federal Yugoslavia is probably one of the reasons why it has been possible for Yugoslavia to

educated than their fellow South Slavs, they are occasionally called "the Swiss of Eastern Europe." Roman Catholic and using the latin alphabet, the Slovenes speak a language that differs consider-

geographical distance from Beigrade, the difference in language and a shrewd political leadership combined to preserve a surprising degree of internal autonomy. Further-more. Slovenia is the one the one republic without internal national or minority problems because almost 96 per cent of the population are Slovenes. The fact that Slovenia is a pacemaker of economic progress has also been due to such factors as its proximity to Italy and Austria, the tradition of highly developed and specialised vineyards and last but not least a relatively high cultural Several big agro-industrial least a relatively high cultural combines, like UPI. Bosanska and technological level. According to the 1971 census, illiterates made up 15 per cent of the Yugoslav population (over ten years old). But in Slovenia the percentage was a

The opening of the borders with neighbouring Italy and Austria and the impetus given by the so-called Osimo Agreements between Yugoslavia and Italy have produced a new forward-looking mood concerning economic co-operation. The creation of a customs-free zone feels that their republic is not the Osimo agreement, is seen as a significant fillip to economic atural resources and that instead of selling raw materials and energy to others it should process more itself.

Bosnia-Herzegovina has also of been immune to account the Osimo agreement, is seen as a significant fillip to economic collaboration. With Austria, relations were subjected to strains and stresses in the past because the Austrian side has because the Austrian side has still not fulfilled completely the near Sezana as provided for by relevant paragraphs of the 1955 there has been some improve-ment in the atmosphere and it is hoped that after the recent general elections, the socialist government in Vienna will at last take further measures to satisfy the small Slovene minority in Carinthia.

Ironically, Slovenia's economic successes have created both resentment and charges that the Slovenes exploit the under-developed areas of Yugoslavia. In turn, the Slovenes feel that a far too large slice of their social product is siphoned off for often unproductive investments in the south. Slovenian spokesmen like to point out that the Slovenes cannot be expected to compare their standard to the Albanians or Mace. donians. They compare themselves with their neighbours, the Italians and Austrians.

Yet it is also a fact that in

Ever since the birth of modern Yugoslavia, the Slovenes have represented an element of political and social stability. Thrifty and industrious, emotionally stable and better educated than their most underdeveloped Kosova ing for a mark 2 new setting up of negotiating the setting up of new ventures in Europe, Afri and Asia.

Gorenje is of course in ms trious, emotionally stable and heater educated than their most underdeveloped Kosova ing for a mark 2 new setting up of new ventures in Europe, Afri Slovenia and Asia.

Slovenia was 184 as against a new ventures in Europe, Afri and Asia.

Gorenje is of course in ms trious, emotionally stable and heater educated than their underdevelope

region. In short, the relative gap has widened and not narrowed with the Slovene per head GNP between \$3,300 and \$3,400 compared to the all-Yugoslav figure of \$1,912. It was no accident but almost a logical development that Slovenia produced the country's

first truly multinational company. It name, "Gorenja" has become almost a household name to Austrian and West German listeners to radio commercials. This producer of household eppliances, set up in 1953 in Velenje, an old industrial centre in Slovenia on a self-management basis, now employs over 20.000 workers with an annual turnover of some \$1.1bn, exports account for \$140m. By 1985 the 12 plants operating or under construction in Yugoslavia and the subsidiaries abroad (Austria, Greece, Denmark, and France) should attain a sales volume of \$2bn with exports worth \$500m. Starting with household appli-

ances, Gorenje now manufac-tures 2,000 different sophisticated electronic items and components. Its greatest and to many West Germans almost unbelievable coup was the takeover last year of the Koerting Radio Werk, which, operating in the Bavarian town of Grassau had a labour force of 1,350. Badly hit by the recession Koerting accumulated losses to the tune of DM 80m and had to dismiss half of its labour force. Finally, Gorenje acquired the plant for DM 22m. The new nanaging director, Mr. Oskar Pistor, who comes from Gorenje, is hopeful that what is now called Koerting Electronic GmbH might be put on a selfsupporting basis by the end of this year. Gorenje is currently

ing for a mere a per cen the Yugoslav territory and per cent of the total populati provides a disproportionat large segment of the countr production and exports. The turns out 17 per cent of Yugoslav GNP which is alm as much as the combined G of two other republics Bost Herzegovina and Macedonia. Even these figures do not g

complete picture for should also take into accosuch factors as quality, des. and packaging. No wonder t Slovenia ships about 60 per c of its exports to Europe and North America against 40 per cent for country as a whole. Slove accounts for 18 per cent of Yt slavia's aggregate exports 27 per cent of all-Yugoslav s to Western Europe and Cone-fifth of shipments to No America.

described as a separate frationality in Yugoslav censuses, historically they considered themselves Serbs—and played a vital role in preserving Serbia's fighting spirit. By contrast, is was the Serbs of the Vojvodina who provided the intellectual stimulus by virtue of their links to the Austro-Hungarian empire Hungarian empire.

As an English historian, H. W. V. Temperley, once put it: "The Serbs of Serbia were saved from despair by the Serbs of Montenegro and from ignor-ance by the Serbs of Vojvodina." Montenegro played a similar role during the Second World War when its mountain fastnesses became the centre of resistance by Marshal Tito's Communist partisans to Nazi occupation. After the war, in one of those ebbs and flows of population between mountain and plain that are so charac-teristic of Balkan history, the

Belgrade. The influence of Montenegrins within the Federal administration has been declining in recent years with the gradual and the shipyard at Bijela on ment coming from the Soviet appears to have survived intact. The replacement of partisans by the Bay of Kotor was completely destroyed.

Michael Dobbs

A recent survey conducted by

the Rand Corporation showed that while Montenegrins account for only 2.5 per cent of Yugo-slavia's total population, they provide 10.3 per cent of the officers in the Yugoslav People's per cent of the accommodation Army—and a staggering 19.3 per usually available for tourists in cent of the generals. Monte-private homes.

negro also has as many representatives in the policymaking LCY Presidium as Croatia—a republic with nine

times the population. Montenegro's political clout is one reason why the Republic has been able to attract so much investment since the war-diversifying its economy in the process from dependence on agriculture to industry and tourism. While 80 per cent of Montenegrins worked on the land in 1946, today the agrarian population has dropped to around 30 per cent.

Unfortunately for Montenegro, it was the richest and most developed part of the Republic victorious Montenegrin parti-sans took over many of the best jobs in the Federal capital, Belgrade. series of some 2,500 tremors and aftershocks. The modern port of Bar, Yugoslavia's main outlet to the southern Adriatic, lost two thirds of its equipment

According to officials, between the traditional ties of friendship one third and one half of the between Montenegro and buildings along the Montene-

Priority

Senior Montenegrin officials are reluctant to give overall estimates of the damage caused by the earthquake, but the President of the Montenegrin Assembly, Budislav Soskie, recently estimated that the Republic would need several years to reach its previous level of economic development. He said all the Yugoslav peoples, we priority would be given to building new houses since an estimated 40,000 people are still in fact, Montenegrins are very and out under the company of the said all the Yugoslav peoples, we priority would be the most likely to acquiesce to a Soviet take-over. camped out under tents—a situation which has already led to considerable nervous tension and could become unbearable

by winter. Foreign aid has poured into Montenegro since the earthquake, with apparently the largest donation of a complete factory for building pre-fabricated homes and millions of dollars worth of medical equip-

between Montenegro and Russia which were once so grin coastline have been either strong that a Royalist Montenetotally destroyed or heavily grin minister used to boast: "Together with the Russians, we are

200 million people."

If, however, present-day Soviet leaders are hoping to gain anything more than gratitude from their gift to Montenegro, they are likely to be disappointed. Sitting in one of Titograd's crowded restaurants and indulging in his countryman's pas sion for conversation, a Monte-negrin journalist explained that admiration for Mother Russia had its limits.

"The sentimental feelings are still there, of course—but they are often misinterpreted by foreigners who imagine that, of acquiesce to a Soviet take-over. In fact, Montenegrins are very different from Russians, At heart we're anarchist indivi-dualists—you know the saying, two Montenegrins three opinions—and we'd be the first to resist any outsider telling us what to do," he said.

Whatever the economic and cultural devastation wrought by the earthquake, the Monte-negrins' love of independence is an attitude of mind which

Macedonia

Victorian politicians called the Mihajlo Apostolski for Yugo-Eastern question" Macedonia slavia. In her memoirs, Mrs. has dropped out of the newspaper headlines in the West in of the Bulgarian polithureau, recent years. But it has remained a thorny and recurring issue in Yugoslav-Bulgarian relations—and by extension Yugoslav-Soviet relations.

Put simply, Yugoslav politi-cians fear that what they regard as Bulgaria's historic grudge at being deprived of much of Macedonia could provide the Kremlin with an ideal excuse for stirring up trouble in the Balkans after Tito's death. For their part, the Bulgarians have accused the Yugoslavs of interfering in their internal affairs by insisting that they recognise the concept of a Macedonian

At stake is an exceptionally beautiful land of lakes and mountains stretching across three countries — Yugoslavia, Bulgaria and Greece. With its wonderfully clear water and pinkish trout, Lake Ochrid in Yugoslav Macedonia has become one of the most popular tourist spots in the Balkans. Perfect medieval monasteries full of fine frescoes nestle beneath the snowcapped mountains that rise up along the

Albanian border. Over the past year, Bulgaria and Yugoslavia have accused each other of harbouring secret territorial claims and distorting history to their own advantage. In support of their arguments, each side has distributed bookcases full of pamphlets in four or five languages to a largely

ONCE THE essence of what cheva for Bulgaria and General issue this century) now reflects from the avaricious demands of Mihajlo Apostolski for Yugo the clash between two totally slavia. In her memoirs, Mrs. different systems of governrecalled the medieval Bulgarian empire which stretched from the Adriatic to the Black Sea.

Delegations

The memoirs were promptly denounced as "a forgery" General Apostolski, president of the Macedonian Academy of Sciences, who himself accused Bulgaria of always seeking profit by hiding behind the coattails of a great power — first Tsarist Russia, then Nazi Germany, and now the Soviet Union. The Bulgarians, he fumed, "are trying to prove that they came to the Balkans ahead of the Slavs, that all of this belongs to them and that it is 'their historic goal to be the hegemonists in the Balkans."

Tentative attempts are now under way to take the heat out of the Macedonian issue with exchanges of high-level delegations between the two sides. It was solved when Marshal Tito interest to settle the question once and for all in Tito's lifetime. Bulgaria too says it has an interest in a stable and prosperous Yugoslavia on its Western borders. Such professionals of peace-

ful intent usually provoke ridicule among Yugoslav officials who, as far as Macedonia is concerned, are firm believers in 1966. the conspiracy theory of history. Reflecting the preoccupation with the past, the bitterest exchanges have been traded between two sentingers. observed, that Yugoslavia can of Macedonia since the war.

different systems of govern-ment As a multi-national state. Yugoslavia is committed to devolution of decision-making, workers' self-management, and full minority rights. Bulgaria, on the other hand, has been trying to build a strong unitary nation-state and is committed to

central planning. Since the Second World War, Yugoslav policy towards its segment of Macedonia has been twofold: to do everything possible to inculcate the idea of Macedonian nationhood, and to raise the standard of living in what used to be one of the most impoverished corners of Europe.

Before the war, the region was merely regarded as the southern part of Serbia - a situation which led to considerable resentment against. Bel-grade among the local popula-tion, at least some of whom felt

decided to give republican status of its own ordinary 16 per cent annually, The result is that today the is one of the highest in Yugo-Yugoslav Republic of Macedonia slavia, and has been helped by has its own national assembly, abundant deposits of minerals government, language (in such as iron ore, lead, and zinc.

The Yugoslavs can also peint Nevertheless it is true, as a to the undeniable economic suc-Western diplomat in Sofia cesses attained in their section cesses attained in their section One legacy of 500 years of Turkish rule is that many Macedonians still build high

public officials.

The sense of stubborn fatalism, however, is gradually being eroded with the shift in population from the countryside to the town and increasing material wealth. With their sense of vibrant nationalism, Macedonian officials exude a self-confidence that is absent in some other parts of Yugoslavia.

Macedonia's population of 1.6 million provided many of the so-called gasterbeiter, or guest workers, who left Yugoslavia in the late 1960s and 70s to find work abroad, particularly West Germany.

Today many gasterbeiter are returning, bringing back with them new skills, values, and money: In the village of Vevchani near Lake Ohrid, for example, the pot-holed country lanes are lined with Mercedes and Volkswagens bought in

West Germany. Finding jobs for the returning gasterbeiter is a major problem despite the rapid expansion of industry. The Repub-

Among the most important industrial plants are the Skopje iron and steel mills with planmed production of one million tons of steel a year, a chemical works and bus factory also in Skopje, and a lead-zinc smelting mill in Titov Veles, and half a dozen textile factories.

Tobacco plants in Prilep, Skopje, and Kumanovo produce over 20,000 tons of cigarettes made from Macedonian tobacco

annually.

The Croat problem can only be understood against this back-ground and the memory of the Great Serbian domination in the interwar period. The feeling of hurt national pride infused such emotions into an essentially economically motivated battle for a higher slice of the all-Yugoslav cake in the late 1960s and early 1970s. The crisis culminated in the mass movement, led and manipulated by national-minded Communist leaders of the post-war genera-tion. Their action was seen by The return of migrant workers is also a problem. On the whole, however, the life of the 4.5m inhabitants is characterised by a growing impact of dynamic industrialisation and the windfall from tourism. But the outward political calm may well be somewhat deceptive and the influence of the Roman Catholic Church particularly after the enormous impact of the Papal visit in Poland, should also be taken into consideration by the Communist authorities.

Another sign of the times is that Croatia has also been the first area in a socialist country to be affected by the anti-nuclear movement. Official estimates indicate that indigenous hydro, coal and other power sources will only supply one third of Yugoslavia's energy needs by the fourth decade of the next century and that nuclear energy will have to fill the gap.

But this has not stopped the inhabitants of Zadar and local communities in the area protesting against plans to build a nuclear power station on the island of Vir. The 2,000 islanders feared the impact on tourism. fishing and their vineyards. But the protest spread, so that eventually the proposal to build the station was deleted from the

economic plan. Now more and more towns and villages along the coast are protesting against the environmental impact of new industries and their related power and other needs. As elsewhere economic progress is increasingly seen to have its disad-vantages as well as its

advantages.

Paul Lendvai

A LEADING YUGOSLAV ELECTRONIC COMPANY SUCCESSFUL IN WORLD-WIDE MARKETS

High quality and outstanding products' design has won Iskra a high reputation on world markets. Iskra's international marketing network consists of eight trading companies and eight representative offices throughout the world with a total turnover of U.S.\$ 180m in 1978, of which U.S.\$ 101.5m was in exports. At the same time, the output value increased by 22 per cent and the export value by 23 per cent. From its total turnover of one billion dollars last year, it was classified among the first 35 manufacturers of electrical products in Europe.

Thanks to highly favourable prospects in the field of co-operation exports to Western Europe and USA reached 46 per cent, and to Comecon countries 26 per cent. The remaining 28 per cent went to Asia, Africa and South America. The 1979 export plan provides for an export contingent up to the value of U.S.\$ 120m. Regional structure will not change appreciably.

As a partner in the social agreement on the groundwork of the development plan in the Yugoslav Republic of Slovenia for the 1976-1980 period, Iskra has undertaken to produce in this period of time, goods to the value of 40,000 million dinars and to realize an export value of U.S.\$ 500m. In the period 1976-1983 Iskra is expected to export products and know-how to the value of one billion dollars.

Iskra is a young, dynamic electronic industry consisting of 75 factories, research, marketing and other organisations, employing 28,000 workers and specialists in electronics, opto-electronics, computers, automation, communications and electro-mechanics. Thanks to the continued growth of its business and income. Iskra takes first place in the electronic industry in Yugoslavia and belongs among the first industrial enterprises in Yugoslavia.

In its development, Iskra is oriented to tomo row's activities which go far beyond the traditional Imits of electro-mechanics and tend to the widest amplication of electronics, with priority being given to the promotion of the development of opto-electronics. micro-electronics, computers, communications and automation. The high quality of Iskra's development, research and engineering activities, carried out by over 1,600 specialists in co-operation with experts from firms, institutes and universities of international reputation, gives good economic results. In 1978 more than 5 per cent of the production value was invested in various research and development

From its wide production programme Iskra invests most in developing the following segments:

Micro-electronics-With all technological variations including thick and thin film technology, the majority of thin film is made in MOS technology. Semiconductor materials and components.

Business and Data Processing Computers—Business computer systems and programming equipment, development work on micro-computers and development of micro-processors.

Onto-electronics-Development of telecommunication components as optically coupled relays. Holography, mainly for use in memory banks. Optoelectronics for measuring purposes.

Integrated Telecommunication Systems—Based on digital technology as PCM Multiplex and PCM Communication equipment.

Automation-Security and signalling systems, road traffic control, railway automation and signalling. Environmental and ecological instrumentation and equipment. Automation of industrial processes, machine tools and welding machines. Automation of electric power stations, distribution networks and power control. Remote control for complete power generating systems.

Consumer Goods—Electric household appliances. Electronic entertainment products. Electric power

ENGINEERING ACTIVITIES—Engineering for road and railway automation, for automation of industrial processes, electric power stations and distribution network. Engineering for high-voltage installations for power compensation. Engineering for telecommunication equipment. Engineering for watt hour meters, consumer goods and various others in the specialised field of technology.

In the future, large investments are planned in the construction of new manufacturing plants. Emphasis will be placed on all research and development activities within the company. This will enable Iskra to increase efficiency further, adopt up-to-date technology and introduce the most complex products and systems, thus keeping in step with the leaders in world technology.

Left wing challenges Callaghan's control

LABOUR LEADERS will begin the massive task of overhauling the party's policies and organi-sation this week in an attempt to recover the electoral support mentary party. lost at the General Election.

and the Left-wing over future control of the party.

Mr. Ron Hayward, Labour's general secretary, pleaded forcefully at the week-end for a united effort to strengthen the movement.

Left-wing leaders, however, intend an immediate and determined challenge to Mr. Callaghan's authority.
The party's Finance Commit-

tee is to discuss today the demands of Mr. Norman Atkin-son, Labour freasurer, that the £165,000 public funds allocated to the Opposition should be controlled by Transport House. The Shadow Cabinet agreed last week that the funds should be controlled by Mr. Callaghan, since they are assigned for the party's parliamentary activities. The Labour leader has offered to use some £40.000 to run the parliamentary secretariat, at present paid from Labour's general funds.

so that they can influence the appointment of political advisers to the Shadow Cabinet.

moves initiated by Mr. Anthony Wedgwood Benn to extend Leftwing influence over the pre-dominantly moderate parlia-

The executive is being asked The process will inevitably develop into a bitter struggle between Mr. James Callaghan and votes on the reselection of and votes on the re-election of the party leader.
Reselection of MPs as candi-

dates at each general election would increase the influence of Left-wing constituency activists. Left-wing constituency activists. Similarly, any widening of the electoral roll for the party leadership, at present confined to Labour MPs, would improve the chances of a Left-wing candidate for the post.

The Left's challenge will also

be directed later against Mr. Callaghan's powers of appointing Front-Bench spokesmen apart from the 12 members of the Shadow Cabinet and against his overwhelming influence on the party's election manifesto.

The Labour leader, however, intends to go ahead today with the appointment of 30 backbench MPs to junior Front-Bench posts.

The struggle for the party's levers of power" seems likely Left-wingers, however, want to divert the party from its main the money channelled through task of regaining electoral the party's National Executive popularity and support. Although some organisational

improvements may be made without much argument—the The executive will discuss the Finance Committee will, for issue on Wednesday, with other example, today consider substan-

tial pay increases for party agents—the overhaul of policy might be delayed and hampered by internal disputes.

Yet both the party's Right-and Left-wings agree that the election defeat demands urgent revision of attitudes, day-to-day tactics and longer-term strategy. Mr. Hayward told the party southern regional council: "Our membership is deplorable . .

We have lost the support of young people, of many trade unionists, of council-house tenants—all those sections of society which we used to claim

Mr. Merlyn Rees, former Home Secretary, said that party — we expect too much at low pay from those who work for us —and more and search on policies to meet the needs of current social and economic changes.

From the Left wing, Mi Benn gave a warning that Labour would not necessarily gain advantage from any failures of the Thatcher Govern-

ment.
"We must develop and argue alternative policies for public investment and public ownership," he declared.

Mr. Eric Heffer called on the party to rebuild a mass membership "deeply rooted among the people." Rank-and-file MPs should have more influence and the parliamentary party should be more responsive to con-

EEC move to review shipping policies

By Giles Merritt in Brussels

today that any industrial take industrial action against action mounted by unions the effects of the new policies, to prevent job losses or and expect to enjoy TUC increase pay offers in the support.

representatives. What the ripple effect of the proposed EEC clampdown will be remains to be seen. Only EEC shipping lines and those lines using community ports will be directly affected, but they are estimated to be a significant proportion of the world's 350 of so shipping conferences

Air link

The Brussels move is described as the first attempt to review the conference system. The Commission initiative on shipping is comparable, too, with moves being made to review European airline fare

agreements.
Uptil a 1973 ruling by the European Court of Justice, both shipping and aviation had been exempted effectively from EEC competition rules by a 1962

regulation.
Since the ruling that reversed the exemption, there has been growing pressure from the European Parliament and from within the Commission for a major review of both

Earlier this mouth a U.S. federal judge imposed fines of \$6.1m on seven international shipping lines and 13 executives in a case brought under antitrust legislation.

Fines totalling \$5.45m were imposed on the companies and \$650,000 on the officials, all of whom pleaded "no contest" to price-fixing charges on container freight between the U.S. and Europe.

The decision to prosecute was attacked by Mr. David Ropner, president of the General Council of British Shipping, who said it reflected the U.S. Administration's one-sided view of shipping still at a low level compared ensure that more North Sea oil

Carter's energy plea dominates Tokyo summit

BY OUR FOREIGN STAFF RESIDENT CARTER bas

called for concerted action by the industrialised world to solve the energy crisis.

He said he would be asking Western leaders attending this week's economic summit in

Tokyo to co-operate in three By meeting their targets for reducing oil imports this year as effectively as the U.S., and

by reducing imports still further Stopping what he called unacceptable competitive bidding

over world oil prices.

• Trying to produce more alternative energy sources like coal, solar energy, and synthetic fuels. President Carter was speak-ing in Washington before leaving for Tokyo, where he arrived yesterday. He said the energy crisis would be the main topic on the agenda at the talks starting on Thursday which bring together the leaders of the U.S., Japan, Canada, France, Britain, Italy and West Gar-

last week's Common Market summit, the EEC leaders pledged themselves to continue cutting energy consumption and to keep the volume of oil imports at or below the same level

Today President Carter meets Mr. Masayoshi Ohira, Japan's Prime Minister. The subjects taken up at this meeting are expected to include, besides energy, refugees from Vietnam and the "suspended" U.S. plan to withdraw ground troops from South Korea

as last year.

President Carter will hold an initial round of talks in Tokyo with Mr, Ohira this afternoon and a second round on Tuesday country house outside

Bilateral trading issues are not expected to figure promi-nently in the Carter-Ohira talks since the main issue between the two countries (liberalisation of Japanese Government procurement procedures to allow bidding by U.S. companies) was settled during a recent visit to Tokyo by Ambassador Robert

Japan is understood to favour implementation of an effective one-year programme to cut advanced countries oil consumpthis is enough to deal with the present oil squeeze and prevent further runaway increases in It does not favour a joint pro-

gramme of demand management by summit member countries, or the various alternatives of two- or five-year import freezing plans that are being floated by other summit participants. Japan is especially sensitive

to the impact of oil import cuts on economic performance, since a much higher proportion of its oil imports is consumed by industry than is the case with any other advanced industrial

The Carter-Ohira discussions on Asia, which will take place on Tuesday, will almost certainly on Hessay, will almost certainly include an attempt by Japan to discover U.S. intentions on Korean troop withdrawals and to remind the U.S. once again of Japan's concern with the military balance on the Korean peninsula.

Other topics that could well be covered include the political stance of North Korea (which both Japan and the U.S. are anxious to see retain its neutrality between the Soviet Union and China) and the pro-gress of China's economic modernisation plans.

Europeans reject Caledonian plan to cut air fares

BRITISH CALEDONIAN plaus for low air fares on three European routes have been rejected by France, Belgium and Holland. The rejections come only days cation to British air authorities for a low-fare Skytrain service

to 35 European cities following a call by the European Commission for "substantial cuts in the cost of EEC air travel. An inter-Government row may follow if British Caledonian's proposed 40 per cent cuts in offpeak fare from Gatwick, London to Paris, Brussels and Amster-

dam are accepted by the British The airline already flies these routes and has proposed a new off-peak return fare of £56.

British Caledonian said yester-day that it would press the three Governments—through the UK Civil Aviation Authority-to introduce lower fares on the

The authority is already considering a separate British Cale-donian plan for off-peak fares on a proposed list of new scheduled services to 20 European cities. This was launched early in May and Sir Freddie
Laker's proposed European-Skytrain service would embrace in Rome.

many of the same cities, although his list is almost twice as large as the British Caledonian's. "This duplication would ap-

pear to be a wasteful effort," British Caledonian said. welcomed the support from Laker for lower fares in Europe, hist warned vesterday that it would challenge Laker on its application to serve routes al-ready operated or applied for by British Caledonian.

 Britain and Italy have one week to sort out their dispute over charter aircraft refuelling. which could have a serious effect on the tourist industry between the two countries, Rupert Corn-well writes from Rome. The Italian Transport Ministry said this weekend that it had replaced its ban on refuelling of British charter flights stopping in Italy until July 1.

This follows the move by UK oil companies to provide kero-sene for Italian charters in Britain until June 30. Meanwhile, the DC-9 of Itavia, the private Italian airline which started the trouble after being held up at Galwick last week for lack of fuel, is now back

UK oil output

Their prices have risen by half since the beginning of the year and Algeria is talking of raising its price by at least another \$1 to \$1.50 a barrel to take account of its quality premium over Middle East

without a further general OPEC price rise, that would set most of its crude at \$22 to \$22.50 a barrel in the second half of the year, compared with \$14.10 at the end of 1978 of 1978.

The market for drilling rigs in the North Sea has tightened considerably in recent weeks, with a sudden flurry of new exploration in the Norwegian Wood Mackennie says that all

rigs available have secured contracts and hire rates have

risen from about \$28,000 to about 933,000 a day.

Eight wildcat exploration
wells are being drilled in Norwegian waters, four off the coast of Ireland and nine on the UK

continental shelf. Exploration in UK waters is with previous years, however, stays in the UK.

three African members: Algeria, and the Government is talking Libya and Nigeria. They pro-duce similar, light, low-sulphur operators with a view to increasing activity. Sue Cameron writes:

Government is reviewing the position of the British National Oil Corporation and is to pub-lish its findings before the parliamentary recess.

The review is expected to recommend the ending of some of BNOC's privileges, possibly

including the corporation's right to a 51 per cent stake in production licences.

However, the increase in world oil prices is expected to do more to encourage North Sea oil exploration than any limits placed on BNOC's activities.

Oil companies are not obliged to involve BNOC in their initial exploration. An exploration licence permits them to look for oil anywhere in the North Sea outside blocks that have been allocated for development and

Mr. David Howell, Energy Secretary, is expected to insist that companies operating in the North Sea pay their 12.5 per cent royalties in oil rather than cash from the beginning of next year. The aim would be to

The real earnings conundrum

As the equity market wilts at the thought of 17½ per cent in-flation by the end of the year it is worth taking another look at the academic arguments going on over the valuation of equities. The basic puzzle continues to be the simple one of why a share in equity does not in practice offer a satisfactory hedge against the ravages of inflation. Why have shares not performed as well in terms of price as houses, or gold, or vin-

The normal answer is that the eceleration of inflation over the last ten years or so, since share prices in Britain touched a peak in real terms, has coincided with serious decline in the level of real profitability. The Government and other bodies have produced estimates of company profits adjusted for replacement cost depreciation and stock

Real returns

Last week, for instance, the Bank of English published a table of real pre-tax rate of return figures for industrial and commercial companies, indicating that returns in the range 10 to 12 per cent in the 1960s had shrunk to less than 5 per cent in recent in the 1973 the estirecent years. For 1978 the esti-

But the Bank acknowledges that such calculations underestimate the return on the equity interest. High rates of interest, containing a premium for inflation, are charged as costs, while there is no benefit allowed from holding assets which are rising in value with inflation and are partly financed by debt. The Bank's researchers have calculated that the real protax return on equity for 1977 was over 7 per cent, and on a still more favourable basis allowing for differential inflation in comfor differential inflation in company assets the return was 9 per

cent.

These are pre-tax figures. Bearing in mind that the effective tax burden has been reduced because companies do not pay any tax on unrealised valuation gains and are protected against tax on stock gains (in the UK through stock relief, in the U.S. because of the acceptance of LIFO stock accounting policies) it appears that the comparison with the apparently hugely profitable periods of the 1950s and 1960s is not quite as unfavourable as might appear.

In fact some economists have collapse in real company profitability is a myth. In March. Modigliani and Cohn published a paper in the U.S. Financial

After-Tax Real Bates of Return on Equity

Analysts Journal under title "Inflation, Rational Valu-ation and the Market." They argued that there was no evidence that the total after tax return to equityholders had been reduced by inflation, and investors appeared to suffer from a variety of inflation illusions. They concluded that the U.S. equity market was hugely undervalued.

Now an American academic visiting Britain, Professor Basil Moore, has carried out a similar exercise into UK profitability using as his data base the Department of Industry's files containing the aggregated income accounts and balance sheets of over 1,000 large quoted companies. He comes to the same conclusion from this UK data as Modigliani did from U.S. evidence. Conventionally adjusted after

tax returns, net of replacement cost depreciation and stock appreciation, have failen sharply since the middle 1960s and even became negative by about 1973. But net after tax profits, fully adjusted for re-valuation gains due to inflation, whilst at times highly volatile. have not shown any evidence of secular deterioration.

At this point, however, Moore diverges from the Modigliani theory that investors are behaving irrationally, and attempts to find a rational explanation of the stock market's attitude. His explanation boils down to the view that It is not investors but company managements who have got it all wrong.

Payout ratios.

share price reflects the market's by rapid inflation. and Miller theorem a central . proposition of modern financial payout ratios are irrelevant for Prudence has its advantag share prices. But Moore has but it may also have a cost

famed that is contrast to the Phintipoly stable trend of anguston carnings, real divident payments have been falling in the UK. He suggests that the competibile, between inflation and lower payout raties provides the main explanation for what has happened to share prices in real temps. prices in real terms. If dividend has fallen in more years sino 1965, the peak sine lear, and h 1976 the rest width had falle by ower a third. Since there has been a mode recovery. But fire downward adjustment of seal dividend means that whereas companie paid out over three-markers. paid out over three

Discouraging

During this period there he seen a sharp decline in the so-called valuation ratio, with relates equity market valuation the equity interest in corporat absets at replacement cost. I the 1960s it varied between in and 1.4. but in 1976 it was only 0.68. Companies are not paying high enough dividends a encourage investors to vaking shares at anything like true in

1980s they have cut this rate to about two-fifths in the 1970

The removal of dividend ca trois affect 5% years at he eliminates one source of disto tion. But the question remain whether Moore is right about the trend of real profits (the is much argument about the calculation of after tax return and, if he is, whether it he any relevance to the policies companies.

The concept of fully adjusts profits is based upon accruant realisations. This mea that companies could only p out dividends to the full exte of such "earnings" by borro ing to do so. There is a contra here with the more limit searing adjustments of the current cost accounting exp sure draft ED 24 which effe tively cause only tealised gains, to be credited to profits.

explanation boils down to the view that it is not investors but company managements who have got it all wrong.

Payout ratios

It is only prudent of co panies to seek partly through greater retentions—to reduce their genting at times of their genting a valuation of the future earnings now often talk of having a te stream. The famous Modigliani get current cost cavar of twi whereas ten years ago histo theory, shows that dividend have been thought acceptab

THOMSON'S EQUITY & LIFE BROKERS

Investment Gearing

The Chancellor has provided the first real opportunity to build up capital by cutting personal taxes. This must not be missed as it should not be forgotten that the lifetime of a Government is still only five years.

If you invest £1000 via a policy the actual net assets acquired will be £1150* i.e. an immediate profit of 15%. This allows for the initial charge: it is simply the tax relief you can now deduct when making the investment. You can withdraw after only 4 years without loss of this benefit.

Everyone can invest a minimum of £1200 p.a. and gain this benefit, and a person with an income of say £30,000 p.a. is allowed over £4000 p.a. You can invest in equities, commercial property, the giftedged market or even building societies. The choice is yours and you can change funds as you wish in

The scheme applies to anyone with an existing investment portfolio or wishing to make savings from income. For the older person the benefit can be taken in the form of extra income. Please write or telephone for further details.
